Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Common stock

Trading symbol

EBAY

Name of exchange on which registered

The Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☒ No ☐

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Non-accelerated filer

Accelerated filer

Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

As of June 30, 2022, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$22,856,350,223 based on the closing sale price as reported on The Nasdaq Global Select Market.

536,880,282 shares of common stock issued and outstanding as of February 21, 2023.

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including statements that involve expectations, plans or intentions (such as those relating to future business, future results of operations or financial condition, including with respect to the ongoing effects of COVID-19, inflationary pressure, foreign exchange rate volatility and geopolitical events (such as the ongoing war in Ukraine), new or planned features or services, or management strategies). You can generally identify these forward-looking statements by words such as “may,” “will,” “would,” “should,” “could,” “expect,” “anticipate,” “believe,” “estimate,” “intend,” “plan” and other similar expressions. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, among others, those discussed in “Item 1A: Risk Factors” of this Annual Report on Form 10-K, as well as in our consolidated financial statements, related notes, and the other information appearing elsewhere in this report and our other filings with the Securities and Exchange Commission (“SEC”). We do not intend, and undertake no obligation, to update any of our forward-looking statements after the date of this report to reflect actual results or future events or circumstances. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements.

ITEM 1: BUSINESS

Overview

eBay Inc. was formed as a sole proprietorship in September 1995 and was incorporated in California in May 1996. In April 1998, we reincorporated in Delaware, and in September 1998, we completed the initial public offering of our common stock. Our principal executive offices are located at 2025 Hamilton Avenue, San Jose, California, 95125, and our telephone number is (408) 376-7008. Unless otherwise expressly stated or the context otherwise requires, when we refer to “we,” “our,” “us,” or “eBay” in this annual report on Form 10-K, we mean eBay Inc. and its consolidated subsidiaries.

eBay is a global commerce leader through our Marketplace platforms which connect millions of buyers and sellers in more than 190 markets around the world. The platforms include our online marketplace located at www.ebay.com and its localized counterparts, including an off-platform business in Japan, as well as eBay’s suite of mobile apps. Our Marketplace platforms are accessible through an online experience (e.g. desktop and laptop computers), iOS and Android mobile devices (e.g. smartphones and tablets) and our application programming interfaces (“APIs,” platform access for third party software developers).

Our Strategy

As a global commerce leader and third-party marketplace, our technologies and services are designed to provide buyers choice and a breadth of relevant inventory from around the globe, and to enable sellers’ access to eBay’s 134 million buyers worldwide. Our business model and pricing are designed so our business is successful when our sellers are successful. We earn revenue primarily through fees collected on paid sales, inclusive of payment processing and first-party advertising.

eBay’s strategy is to leverage technology to enhance the marketplace experience for our customers to drive growth in Gross Merchandise Volume (“GMV”), while increasing the rate of revenue growth through our managed payments and advertising initiatives and delivering healthy operating margins. Beginning in 2020, we embarked on a multi-year journey to build more compelling category experiences for enthusiastic consumers, to become the partner of choice for sellers and to strengthen trust in relationships with buyers on our Marketplace platforms. We derived a majority of GMV in 2022 from the following product categories — parts & accessories, collectibles, electronics, fashion, and home & garden.

Since late 2021, eBay has managed payments for all transactions on our Marketplace platforms, delivering buyers and sellers a simplified end-to-end payments experience. Through managed payments, we are able to provide a frictionless experience for current and next-generation customers, consistent with today’s retail standards. We offer buyers more flexibility and choice in how they’d like to pay and offer sellers a more streamlined way to run their businesses.

eBay remains focused on growing our first-party advertising revenue through our Promoted Listings suite of products while reducing non-strategic, third-party advertising. We currently offer four Promoted Listings products: Promoted Listings Standard (a cost-per-acquisition product for fixed-price listings), Promoted Listings Express (a cost-per-acquisition product for auction listings), Promoted Listings Advanced (a cost-per-click product) and External Promoted Listings (an off-platform advertising product). Through our portfolio of Promoted Listings offerings, we are providing sellers with data-driven recommendations to optimize their conversion and drive velocity, while testing and building more technology features to drive growth, position eBay as the seller's platform of choice and surface relevant inventory to buyers.

We have acquired, and also disposed of, a significant number of businesses, technologies, services and products, and we maintain investments in certain businesses. We regularly review and manage our investments to ensure they support eBay's strategic direction and complement our disciplined approach to value creation, profitability and capital allocation. We expect to continue to evaluate and consider potential strategic transactions as part of our strategy, including business combinations, acquisitions and dispositions of businesses, technologies, services, products and other assets, as well as strategic investments and joint ventures.

Our Customer Offerings

We provide a number of features for our sellers and buyers that align with our approach to becoming the partner of choice for sellers and building life-long, trusted buyer relationships. These offerings are designed to build trust and confidence on our Marketplace platforms and drive GMV.

To become the partner of choice for sellers, eBay continuously invests in technology to deliver quality selling experiences and products to grow the seller tools ecosystem. The unified listing experience offers an intuitive and cohesive design across all Marketplace platforms — desktop, mobile and app — simplifying the listing flow and enhancing seller benefits like video in the listing and doubling the number of images to 24. eBay expanded the Promoted Listings offerings to make it easier for sellers to drive growth in successful listings. We also launched personalized tools, such as coded coupons and newsletters, to support a richer online seller experience. In addition, all Seller Hub users are able to access Terapeak Product Research for free across a number of our markets — U.S., U.K., Germany, Australia, France, Italy, Spain and Canada — providing pricing insights and listing quality reports.

To further strengthen our buyers' confidence and trust in our services, we offer "eBay Money Back Guarantee," which allows buyers to receive their money back if the item they ordered does not arrive, is faulty or damaged or does not match the listing. eBay Money Back Guarantee covers most items purchased on the eBay Marketplace platform in the U.S., the U.K., Germany, Australia, Canada, France, Italy and Spain through a qualifying payment method. In addition, eBay authenticates eligible luxury and collectible items in five categories through "Authenticity Guarantee", an independent authentication service available in the U.S., the U.K., Germany, Australia and Canada. In our parts & accessories category, we are focused on fitment to ensure that Motors enthusiasts are able to find the right part to fit their vehicle. We also continue to expand our eBay Refurbished offering, a dedicated destination that brings inventory from pre-selected brands and top rated sellers with standardized condition grading, to meet consumer demand for top products backed by a warranty.

Our Impact and Responsibility

eBay's purpose is to empower people and create economic opportunity for all through our technology for our global community of users. Every day, people build businesses on our Marketplace platforms. With a low cost of entry for sellers, we offer a highly accessible way for all types of users to interact in a global marketplace that's inclusive and connects people of all backgrounds. Accordingly, we prioritize our corporate responsibility efforts to impact the areas of economic empowerment and sustainable commerce. Key economic programs include eBay for Charity, the eBay Foundation and our small business enablement efforts, such as our Up & Running Grants program.

eBay for Charity empowers buyers and sellers to support charities around the world. In 2022, eBay for Charity matched donations made to Nova Ukraine, Save the Children and the American Red Cross, and partnered with GLIDE for the 21st and final Power of One Luncheon with Warren Buffett, raising \$19 million for the GLIDE Foundation. In 2022, more than \$163 million was raised by buyers and sellers to support charities via eBay for Charity.

The eBay Foundation helps to build economically vibrant and thriving communities. During 2022, the eBay Foundation granted nearly \$23 million to support historically excluded entrepreneurs and through our employee gift-matching program. The eBay Foundation also saw record-level amounts of employee giving through our employee gift-matching program and a reimagined employee volunteer and giving program. To date, the eBay Foundation has awarded more than \$100 million to more than 1,800 nonprofits.

Recommerce has been an integral part of eBay's purpose since the Company was founded in 1995. As a pioneer of the circular economy, eBay has created a space where people can buy and sell pre-owned goods. This helps preserve the world's natural resources and reduces the Company's carbon footprint by saving on the water and energy typically used in producing new goods while also reducing waste.

eBay continues its work to reach its goal of 100% renewable energy by 2025 and remains a carbon neutral company for our scope 1 and scope 2 emissions. In our continued efforts to address climate change, we announced an updated carbon reduction goal in 2021 that was approved by the Science Based Target initiative. We are on track to reduce our scope 1 and scope 2 emissions by 90% by 2030 from a 2019 base year and to reduce value chain (scope 3) emissions from downstream transportation and distribution by 20% in the same timeframe. eBay was ranked in the U.S. Environmental Protection Agency's Green Power Partnership National Top 100 and Top 30 Tech & Telecom for the third year. This year, eBay was also recognized for its commitment to sustainability and responsible business by its inclusion in the Dow Jones Sustainability World and North American Indices for the fourth straight year. eBay also scored an A on the CDP Climate Change questionnaire.

Financial Information

We measure our footprint in our addressable market according to GMV. GMV consists of the total value of all paid transactions between users on our Marketplace platforms during the applicable period inclusive of shipping fees and taxes. In 2022, we generated \$74 billion in GMV, of which approximately 51 percent was generated outside the U.S. We believe that GMV provides a useful measure of the overall volume of paid transactions that flow through our Marketplace platforms in a given period.

At the end of 2022, eBay had 134 million active buyers and approximately 1.7 billion live listings globally. The term "active buyer" means, as of any date, all buyer accounts that paid for a transaction on our Marketplace platforms within the previous 12-month period. Buyers may register more than once and, as a result, may have more than one account.

We generate revenue primarily through fees collected on paid sales, inclusive of payment processing and first-party advertising. The majority of our revenue comes from a take rate on the GMV of transactions paid on our Marketplace platforms. We define "take rate" as net revenues divided by GMV.

Our Marketplace platforms are designed to enable our buyers and sellers to leverage our economies of scale and capital investments, such as in sales and marketing, mobile, customer acquisition, technology innovation and customer service.

Competition

We encounter vigorous competition in our business from numerous sources. Our users can list, sell, buy, and pay for similar items through a variety of competing online, mobile and offline channels. These include, but are not limited to, retailers, distributors, liquidators, import and export companies, auctioneers, catalog and mail-order companies, directories, search engines, commerce participants (consumer-to-consumer, business-to-consumer and business-to-business), shopping channels and networks. As our product offerings continue to broaden into new categories of items and new commerce formats, we expect to face additional competition from other online, mobile and offline channels for those new offerings. We compete on the basis of price, product selection and services, and global scale.

For more information regarding competitive factors impacting our business, see the information in "Item 1A: Risk Factors" under the captions "Substantial and increasingly intense competition worldwide in ecommerce may harm our business" and "We are subject to regulatory activity under competition laws that could adversely impact our business."

Government Regulation

Government regulation impacts key aspects of our business. In particular, we are subject to laws and regulations that affect the ecommerce industry in many countries where we operate.

Our business is subject to payments reporting requirements for U.S. sellers as a result of federal legislation. During 2021, legislation was passed requiring all businesses that process payments to issue a Form 1099-K for all sellers who receive more than \$600 in net payments in a year, a decrease from the previous reporting threshold of \$20,000 and 200 transactions. The Internal Revenue Service ("IRS") recently announced a one-year delay of this rule. As a result, Form 1099-Ks for the new thresholds will be issued beginning in January 2024, subject to potential new federal legislation raising the threshold and/or future IRS action. Tax collection responsibility and the additional costs associated with complex sales and use tax collection, remittance and audit requirements, or reporting, could create additional burdens for buyers and sellers on our websites and mobile platforms.

Legislation requiring increased seller information collection, verification and disclosure for online marketplaces was passed into law in a number of states in 2022. Federal legislation is also being considered by Congress. Increased seller mandates could create additional burdens for sellers on our websites and mobile platforms.

In 2022, the Inflation Reduction Act was signed into law containing provisions effective January 1, 2023, including a 15% corporate minimum tax and a 1% excise tax on stock buybacks, both of which we expect to be immaterial to our consolidated financial statements. We will continue to evaluate its impact as further information becomes available.

The European Union recently enacted the Digital Services Act (the "DSA"), which became effective in November 2022 and will begin to be enforced in early 2024. The DSA imposes legal obligations on online marketplaces operating in Europe, requiring them to verify and ensure the accuracy and disclosure of required information, as well as the safety and authenticity of products posted by third-party merchants. The DSA also enforces new content moderation obligations, notice obligations, advertising restrictions and other requirements on digital platforms that will create additional operational burdens and compliance costs for us.

For more information regarding regulatory risks, see the information in "Item 1A: Risk Factors" under the caption "Our business is subject to extensive and increasing government regulation and oversight, which could adversely impact our business" and "Our business and our sellers and buyers may be subject to sales and other tax regimes in various jurisdictions, which may harm our business."

Seasonality

We expect transaction activity patterns on our Marketplace platforms to mirror general consumer buying patterns. Please see the additional information in "Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations" under the caption "Seasonality."

Technology

The eBay Marketplace uses a combination of proprietary technologies and services as well as technologies and services provided by others. We have developed intuitive user interfaces, buyer, seller and developer tools and transaction processing, database and network applications that help enable our users to reliably and securely complete transactions on our sites. Our technology infrastructure simplifies the storage and processing of large amounts of data, eases the deployment and operation of large-scale global products and services and automates much of the administration of large-scale clusters of computers. Our infrastructure has been designed around industry-standard architectures to reduce downtime in the event of outages or catastrophic occurrences.

In support of our commitment to innovation and a better customer experience, we have been on a multi-year evolution to modernize our marketplace. Through technologies like artificial intelligence, we are anticipating the needs of buyers, sellers and developers, empowering entrepreneurs looking to grow their business, and making the platform more accessible to everyone. We aim to create highly personalized and inspiring shopping experiences powered by advanced technologies.

For information regarding technology-related risks, see the information in “Item 1A: Risk Factors” under the captions “Our business is subject to online security risks, including security breaches and cyberattacks,” “Systems failures and resulting interruptions in the availability of or degradation in the performance of our websites, applications, products or services could harm our business” and “New laws and increasing levels of regulation in the areas of privacy and protection of user data could harm our business.”

Intellectual Property

We regard the protection of our intellectual property, including our trademarks (particularly those covering the eBay name), patents, copyrights, domain names, trade dress and trade secrets as critical to our success. We aggressively protect our intellectual property rights by relying on federal, state and common law rights in the U.S. and internationally, as well as a variety of administrative procedures. We also rely on contractual restrictions to protect our proprietary rights in products and services. We routinely enter into confidentiality and invention assignment agreements with our employees and contractors and nondisclosure agreements with parties with whom we conduct business to limit access to and disclosure of our proprietary information.

We pursue the registration of our domain names, trademarks and service marks in the U.S. and internationally. Additionally, we have filed U.S. and international patent applications covering certain aspects of our proprietary technology. Effective trademark, copyright, patent, domain name, trade dress and trade secret protection is typically expensive to maintain and may require litigation. We must protect our intellectual property rights and other proprietary rights in an increasing number of jurisdictions, a process that is expensive and time consuming and may not be successful.

We have registered our core brands as trademarks and domain names in the U.S. and a large number of other jurisdictions and have in place an active program to continue to secure trademarks and domain names that correspond to our brands in markets of interest. If we are unable to register or protect our trademarks or domain names, we could be adversely affected in any jurisdiction in which our trademarks or domain names are not registered or protected. We have licensed in the past, and expect to license in the future, certain of our proprietary rights, such as trademarks or copyrighted material, to others.

From time to time, third parties have claimed — and others will likely claim in the future — that we have infringed their intellectual property rights. We are typically involved in a number of such legal proceedings at any time. Please see the information in “Item 3: Legal Proceedings” and in “Item 1A: Risk Factors” under the captions “The listing or sale by our users of certain items, including items that allegedly infringe the intellectual property rights of rights owners, such as pirated or counterfeit items, illegal items or items used in an illegal manner may harm our business,” and “We may be unable to adequately protect or enforce our intellectual property rights and face ongoing allegations by third parties that we are infringing their intellectual property rights.”

Human Capital Management

As of December 31, 2022, we employed approximately 11,600 people globally. Approximately 6,800 of our employees were located in the U.S. eBay has robust people-focused programs to support and retain our employees globally and to attract our future employees. Our recruitment, development, compensation and benefits, and wellness programs are designed to reflect our values, ensure eBay's competitiveness in the market for talent, and be a place that is welcoming and inclusive. eBay's management is focused on delivering programs that develop and support our people and connect them with our customers, our community, and each other. Given the importance of eBay's employees to our overall success, in 2022 we expanded the Compensation Committee's charter to include oversight of the company's human capital management strategy and practices, including activities such as talent recruitment, development and retention, employee engagement, succession planning, and diversity, equity and inclusion.

Culture

eBay's purpose to connect people and build communities to create economic opportunity for all continues to serve as the backbone of our culture and generates a sense of pride and commitment to our purpose amongst our employees. We bring this purpose to life through five core beliefs that every eBay employee embodies as part of their day-to-day work. These beliefs reflect our shared desire to be part of a company focused on our customers and delivering value while having fun. Our Beliefs are:

- Empower our community
- Innovate boldly
- Deliver with impact
- Be for everyone
- Act with integrity

In addition to our beliefs, there are thoughtful and specifically designed benefits and programs that ensure our people are well cared for, listened to, and supported while at eBay.

Evolving How We Work

We continue to monitor and adapt to workplace changes brought on by the COVID-19 pandemic. As eBay reopened its offices around the globe our employees now have the opportunity to work in one of three models: onsite, remote, or hybrid. We implemented eBay FlexWork to support hybrid workers and continue to provide equipment, systems and resources to facilitate a connected workforce regardless of whether employees are in the office or working from home, including for our customer experience team members who are continuing to work from home in most cases. While we've seen an increase in employees that are returning to the office, we've maintained programs that we leveraged during the pandemic to provide back-up in-home child and adult care in the U.S., U.K., Canada, Germany and Ireland to support families and caregivers. In addition, as we continued to hire employees throughout the pandemic, we have reimaged the employee onboarding experience to be more virtual and self-service.

Diversity, Equity and Inclusion

Diversity, Equity and Inclusion (DE&I) remains a priority area of focus for eBay. In 2022 we made the decision to get clearer about the outcomes we're driving towards as it relates to DE&I in service of our commitment to being a richly diverse, truly equitable and fearlessly inclusive place to work, grow, sell and buy. Our four DE&I objectives are to increase representation, cultivate a sense of belonging, engage our communities and allies, and build inclusive technology. Equity remains at the forefront of all we do to hire, grow, and retain top talent, enhance corporate performance, and foster a welcoming and inclusive place to work, learn and grow. We continue to enhance our people processes, leverage actionable data insights, provide ongoing learning and development practices to ensure we move this work forward. Delivering a governance model to ensure that we drive shared accountability throughout the organization remains a priority. Our Communities of Inclusion welcome and connect eBay employees all over the world to help us nurture employees, allies and external communities. They host events and forums to connect employees to groups organized around age, disability status, race/ethnicity, gender, military status, caregiver status, sexual orientation, and gender identity and expression. We are currently preparing our sixth Global Diversity, Equity & Inclusion report for publication in the second quarter of 2023.

Well-Being Support for Employees and Their Families

eBay has continually engaged with our people to support their physical, financial, and mental well-being for them and their families through expanded wellness resources, webinars, telehealth access and expansion of company-paid mental health support globally as well as additional training for managers and peers to support mental health and manage burnout. As part of these efforts, we've focused on ensuring our employees and their families have timely access to high quality care.

In addition to competitive pay and benefits, eBay offers additional parental time off beyond what is required by law in the U.S. and in most countries where we operate. This benefit is offered for parents welcoming a new child into the family whether by giving birth, adopting or welcoming a child through surrogacy. This is an important demonstration of our commitment to working parents and their families.

Acting with Integrity

We maintained our commitment to ethics and acting with integrity in 2022. We took actions to ensure that we are open, honest, ethical and authentic with ongoing trainings, quarterly "tone from the top" engagements between leaders with their employees and daily ethics contests during Ethics and Compliance Week.

Employee Voice & Values

In addition to multiple channels for sharing feedback, we also regularly survey our employees on trust and engagement, their experience with diversity, equity and inclusion, ethics and integrity, and this year regarding their thoughts on returning to the office. Our employees welcome sharing their points of view with us and are encouraged by how their input molds several strategic programs and our values which covers our beliefs and includes our commitments in critical areas such as Impact and Responsibility.

Available Information

Our Internet address is www.ebay.com. Our investor relations website is located at investors.ebayinc.com. We make available free of charge on our investor relations website under the heading “Financial Information - SEC Filings” our Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and amendments to those reports as soon as reasonably practicable after such materials are electronically filed with (or furnished to) the SEC at www.sec.gov.

We webcast our earnings calls and certain events we participate in or host with members of the investment community on our investor relations website. Additionally, we provide notifications of news or announcements regarding our financial performance, including SEC filings, investor events, press and earnings releases, and blogs on our investor relations website. Company sustainability information for investors is available on our investor relations website under the heading “ESG Investors.” Corporate governance information, including our governance guidelines for our Board of Directors (“Board”), Board committee charters and code of conduct, is also available on our investor relations website under the heading “Corporate Governance.”

The contents of our websites and webcasts and information that can be accessed through our websites and webcasts are not incorporated by reference into this Annual Report on Form 10-K or in any other report or document we file with (or furnish to) the SEC, and any references to our websites and webcasts are intended to be inactive textual references only.

Item 1A: RISK FACTORS**Risk Factors Summary:**

The summary of risks below provides an overview of the principal risks we are exposed to in the normal course of our business activities:

- Our operating and financial results are subject to various risks and uncertainties that could adversely affect our business, financial condition, results of operations and cash flows, as well as the trading price of our common stock and debt securities.
- Substantial and increasingly intense competition worldwide in ecommerce may harm our business.
- The global COVID-19 pandemic could harm our business and results of operations.
- Fluctuations in foreign currency exchange rates could negatively impact our financial results.
- Our international operations and engagement in cross-border trade are subject to risks, which could harm our business.
- Our business may be adversely affected by geopolitical events, natural disasters, seasonal factors and similar factors.
- If we cannot keep pace with rapid technological developments or continue to innovate and create new initiatives to provide new programs, products and services, the use of our products and our revenues could decline.
- Changes to our programs to protect buyers and sellers could increase our costs and loss rate, and failure to manage such programs effectively can result in harm to our reputation.
- Operations and continued development of our payments system and financial services offerings require ongoing investment, are subject to evolving laws, regulations, rules, and standards, and involve risk, including risks related to our dependence on third-party providers.
- We may be unable to adequately protect or enforce our intellectual property rights and face ongoing allegations by third parties that we are infringing their intellectual property rights.
- Failure to deal effectively with fraudulent activities on our platforms would increase our loss rate and harm our business, and could severely diminish merchant and consumer confidence in and use of our services.
- Our business is subject to online security risks, including security breaches and cyberattacks.
- Systems failures and resulting interruptions in the availability of or degradation in the performance of our websites, applications, products or services could harm our business.
- We may not be able to attract, retain, and develop the highly skilled employees and senior management that we need to support our business.
- Problems with or price increases by third parties who provide services to us or to our sellers could harm our business.
- Our business is subject to extensive and increasing government regulation and oversight, which could adversely impact our business.
- New laws and increasing levels of regulation in the areas of privacy and protection of user data could harm our business.
- We are regularly subject to litigation and regulatory and government inquiries, investigations and disputes, as our business evolves and as governments and regulators seek to extend new and existing laws to reach our business model.
- We are subject to regulatory activity under competition laws that could adversely impact our business.
- The listing or sale by our users of certain items, including items that allegedly infringe the intellectual property rights of rights owners, including pirated or counterfeit items, illegal items or items used in an illegal manner may harm our business.
- We are subject to risks associated with information disseminated through our services.
- Fluctuations in interest rates could adversely impact our financial results.
- We have substantial indebtedness, and we may incur substantial additional indebtedness in the future, and we may not generate sufficient cash flow from our business to service our indebtedness.
- Our business and our sellers and buyers may be subject to sales and other tax regimes in various jurisdictions, which may harm our business.
- Acquisitions, dispositions, joint ventures, strategic partnerships and strategic investments could result in operating difficulties and could harm our business.
- We could incur significant liability if the Distribution of PayPal is determined to be a taxable transaction.
- We may be exposed to claims and liabilities as a result of the Distribution of PayPal.

Risk Factors:

You should carefully review the following discussion of the risks that may affect our business, results of operations and financial condition, as well as our consolidated financial statements and notes thereto and the other information appearing in this report, for important information regarding risks that affect us. Current global economic events and conditions may amplify many of these risks. These risks are not the only risks that may affect us. Additional risks that we are not aware of or do not believe are material at the time of this filing may also become important factors that adversely affect our business.

Business, Economic, Market and Operating Risks

Our operating and financial results are subject to various risks and uncertainties that could adversely affect our business, financial condition, results of operations and cash flows, as well as the trading price of our common stock and debt securities.

Our operating and financial results have varied on a quarterly basis during our operating history and may continue to fluctuate significantly as a result of a variety of factors, including as a result of the following risks and other risks set forth in this “Risk Factors” section.

- our ability to convert visits into sales for our sellers;
- the amount and timing of expenses;
- our success in attracting and retaining sellers and buyers;
- changes in consumer discretionary spending trends, including shifts in interests away from any of our major categories;
- our success in executing on our strategy and the impact of any changes in our strategy;
- the timing and success of product launches, including new services and features we may introduce;
- the success of our marketing efforts; and
- the impact of competitive and industry developments and our response to those developments.

In view of the rapidly evolving nature of our business, period-to-period comparisons of our operating results may not be meaningful, and you should not rely upon them as an indication of future performance. It is difficult for us to forecast the level or source of our revenues or earnings (loss) accurately, particularly given that substantially all of our net revenues each quarter come from transactions involving sales during that quarter. Due to the inherent difficulty in forecasting revenues, it is also difficult to forecast expenses as a percentage of net revenues. Quarterly and annual expenses as a percentage of net revenues reflected in our consolidated financial statements may be significantly different from historical or projected percentages. Because our business model is dependent upon consumer spending, our results of operations are sensitive to changes in or uncertainty about macro-economic conditions. Our buyers may in the future have less capacity for discretionary purchases and may reduce their purchases from our sellers as a result of various factors, including job losses, inflation (such as recent inflationary pressure), higher taxes, reduced access to credit, changes in federal economic policy, the impact of the COVID-19 pandemic, recent global economic uncertainty, lower consumer confidence and demand for discretionary goods, and geopolitical events such as recent international trade disputes and the ongoing war in Ukraine.

Substantial and increasingly intense competition worldwide in ecommerce may harm our business.

The businesses and markets in which we operate are intensely competitive. We currently and potentially compete with a wide variety of online and offline companies providing goods and services to consumers and merchants, a number of which have significant resources, large user communities and well-established brands. The Internet and mobile networks provide new, rapidly evolving and intensely competitive channels for the sale of all types of goods and services. We compete in two-sided markets, and must attract both buyers and sellers to use our platforms. Consumers who purchase or sell goods and services through us have more and more alternatives, and merchants have more channels to reach consumers. We expect competition to continue to intensify. The barriers to entry into these channels can be low, and businesses can easily launch online sites or mobile platforms and applications at nominal cost by using commercially available software or partnering with any of a number of successful ecommerce, search, advertising or social companies. As we respond to changes in the competitive environment, we may, from time to time, make pricing, service, policy or marketing decisions or acquisitions that may be controversial with and lead to dissatisfaction among sellers, which could reduce activity on our platform and harm our reputation and profitability.

We face increased competitive pressure online and offline. In particular, the competitive norm for, and the expected level of service from, ecommerce and mobile commerce has significantly increased due to, among other factors, improved user experience, greater ease of buying goods, lower (or no) shipping costs, faster shipping times and more favorable return policies. In addition, certain platform businesses, such as Alibaba, Alphabet (Google), Amazon, Apple, Meta (Facebook and Instagram), many of whom are larger than us or have greater capitalization, have a dominant and secure position in other industries or certain significant markets, and offer other goods and services to consumers and merchants that we do not offer. If we are unable to change our products, offerings and services in ways that reflect the changing demands of ecommerce and mobile commerce marketplaces, or if products offered through eBay are not available for purchase where the consumers shop, particularly the higher growth of sales of fixed-price items and higher expected service levels (some of which depend on services provided by sellers on our platforms), or if we are unable to compete effectively with and adapt to changes in larger platform businesses, our business and reputation will suffer.

Competitors with other revenue sources may also be able to devote more resources to marketing and promotional campaigns and buyer acquisition, adopt more aggressive pricing policies and devote more resources to website, mobile platforms and applications and systems development than we can. Other competitors may offer or continue to offer faster and/or free shipping, delivery on Sunday, same-day delivery, favorable return policies or other transaction-related services which improve the user experience on their sites and which could be impractical or inefficient for our sellers to match. Competitors may be more narrowly focused on a particular type of goods and create a compelling community, be able to innovate faster and more efficiently, and new technologies may increase the competitive pressures by enabling competitors to offer more efficient or lower-cost services.

Some of our competitors control other products and services that are important to our success, including credit card interchange, Internet search, and mobile operating systems. Such competitors could manipulate pricing, availability, terms or operation of service related to their products and services in a manner that impacts our competitive offerings. For example, Alphabet, which operates a shopping platform service, has from time to time made changes to its search algorithms that reduced the amount of search traffic directed to us from searches on Google. If we are unable to use or adapt to operational changes in such services, we may face higher costs for such services, face integration or technological barriers or lose customers, which could cause our business to suffer.

Consumers who might use our sites to buy goods have a wide variety of alternatives, including traditional department, warehouse, boutique, discount and general merchandise stores (as well as the online and mobile operations of these traditional retailers), online retailers and their related mobile offerings, online and offline aggregation and classified services, social media platforms and other shopping channels, such as offline and online home shopping networks. In the United States, these include, but are not limited to, Amazon, Facebook, Instagram, Google, Walmart, Target, Macy's, Etsy, StockX, Shopify, Wayfair, TheRealReal, Overstock.com and Rakuten, among others. In addition, consumers have a large number of online and offline channels focused on one or more of the categories of products offered on our site, including but not limited to, Back Market, Chrono24, FARFETCH and GOAT Group, among others.

Consumers also can turn to many companies that offer a variety of services that provide other channels for buyers to find and buy items from sellers of all sizes, including social media, online aggregation and classifieds platforms, such as websites operated by Adevinta or Naspers Limited and others such as craigslist, Oodle.com and Meta. Consumers also can turn to shopping-comparison sites, such as Google Shopping, or social networks that enable purchases such as Pinterest, Facebook and Instagram. In certain markets, our fixed-price listing and traditional auction-style listing formats increasingly are being challenged by other formats, such as classifieds. We use product search engines and paid search advertising to help users find our sites, but these services also have the potential to divert users to other online shopping destinations. Consumers may choose to search for products and services with a horizontal search engine or shopping comparison website, and such sites may also send users to other shopping destinations. In addition, sellers are increasingly utilizing multiple sales channels, including the acquisition of new customers by paying for search-related advertisements on horizontal search engine sites, such as Google, Naver and Baidu.

Consumers and merchants who might use our sites to sell goods also have many alternatives, including general ecommerce sites, such as Amazon, Alibaba, and Zalando, and more specialized sites, such as Etsy. Our international sites also compete for sellers with general and specialized ecommerce sites. Sellers may also choose to sell their goods through other channels, such as multi-channel services like Shopify or classifieds platforms. Consumers and merchants also can create and sell through their own sites, and may choose to purchase online advertising instead of using our services. In some countries, there are online sites that have larger customer bases

and greater brand recognition, as well as competitors that may have a better understanding of local culture and commerce. We may increasingly compete with local competitors in developing countries that have unique advantages, such as a greater ability to operate under local regulatory authorities.

We generate a meaningful amount of our revenue from our Promoted Listings (a first-party advertising offering) and, to a lesser extent, third-party advertising. To sustain or increase our advertising revenue, we must continue to provide customers with compelling advertising products to maintain or increase the amount of advertising purchased through our platform. If we are unable to compete effectively for advertising spend, our business and operating results could be harmed.

In addition, certain manufacturers may limit or cease distribution of their products through online channels, such as our sites. Manufacturers may attempt to use contractual obligations or existing or future government regulation to prohibit or limit ecommerce in certain categories of goods or services. Manufacturers may also attempt to enforce minimum resale price maintenance or minimum advertised price arrangements to prevent distributors from selling on our platforms or on the Internet generally, or drive distributors to sell at prices that would make us less attractive relative to other alternatives. The adoption of those or other policies could adversely affect our results of operations and result in loss of market share and diminished value of our brands.

The principal competitive factors for us include the following:

- ability to attract, retain and engage buyers and sellers;
- volume of transactions and price and selection of goods;
- trust in the seller and the transaction;
- customer service;
- brand recognition;
- community cohesion, interaction and size;
- website, mobile platform and application ease-of-use and accessibility;
- system reliability and security;
- reliability of delivery and payment, including customer preference for fast delivery and free shipping and returns;
- level of service fees; and
- quality of search tools.

We may be unable to compete successfully against current and future competitors. Some current and potential competitors have longer operating histories, larger customer bases and greater brand recognition in other business and Internet sectors than we do.

The global COVID-19 pandemic could harm our business and results of operations.

The global spread of COVID-19 variants and related measures to contain its spread (such as government mandated business closures and shelter in-place guidelines) have created significant volatility, uncertainty and economic disruption. The extent to which the COVID-19 pandemic impacts our business, results of operations, financial condition and liquidity in the future will depend on numerous evolving factors that we cannot predict, including the duration and scope of the pandemic, including as a result of the emergence of new variants; any resurgence of the pandemic; the availability and distribution of effective treatments and vaccines; governmental, business and individuals' actions that have been and continue to be taken in response to the pandemic, including China's former "zero-COVID" policy and its impact to the global supply chain; the impact of the pandemic on national and global economic activity, unemployment levels and financial markets, including the possibility of a national or global recession; the potential for shipping difficulties, including slowed deliveries from sellers to their customers; and the ability of consumers to pay for products. The COVID-19 pandemic has generally resulted in a shift in consumer spending, which could have an adverse impact on our sellers through reduced consumer demand for their products and availability of inventory, which could in turn negatively impact the demand for use of our platforms. Additionally, the COVID-19 pandemic caused us to require employees to work remotely for an extended period of time. More recently, we have shifted to a flexible working model, which, in addition to providing for onsite and hybrid work arrangements, allows some of our employees to work fully remote, which could negatively impact our business and harm productivity and collaboration. If there is a prolonged impact of COVID-19, it could adversely affect our business, results of operations, financial condition and liquidity, perhaps materially. The future impact of COVID-19 and these containment measures cannot be predicted with certainty and may increase our borrowing costs and other costs of capital and otherwise adversely affect our business, results of operations, financial

condition and liquidity, and we cannot assure that we will have access to external financing at times and on terms we consider acceptable, or at all, or that we will not experience other liquidity issues going forward.

The COVID-19 pandemic and the related measures to contain its spread did not adversely affect our consolidated results of operations. Initially, our Marketplace platforms experienced improved traffic and buyer acquisition due to the ongoing impact of mobility restrictions taken globally to contain the spread of COVID-19 and changes in consumer behaviors that resulted in more online shopping. However, as restrictions have loosened and mobility continues to increase, we have seen net revenues decrease and GMV decrease across major categories, primarily due to a decline in traffic resulting from the normalization of consumer behavior in 2022 compared to the elevated traffic experienced on our Marketplace platforms from the impact of COVID-19 during 2021. These trends may continue, and the impacts seen may continue to create volatility in our results and a wider range of outcomes as consumer behaviors and mobility restrictions continue to evolve.

We are exposed to fluctuations in foreign currency exchange rates, which could negatively impact our financial results.

Because we generate approximately half of our revenues outside the United States but report our financial results in U.S. dollars, our financial results are impacted by fluctuations in foreign currency exchange rates, or foreign exchange rates. The results of operations of many of our internationally focused platforms are exposed to foreign exchange rate fluctuations as the financial results of the applicable subsidiaries are translated from the local currency into U.S. dollars for financial reporting purposes.

While from time to time we enter into transactions to hedge portions of our foreign currency translation exposure, it is impossible to predict or eliminate the effects of this exposure. Fluctuations in foreign exchange rates could significantly impact our financial results, which may have a significant impact on the trading price of our common stock and debt securities.

Our international operations and engagement in cross-border trade are subject to risks, which could harm our business.

Our international businesses, especially in the United Kingdom, Germany and Australia, and cross-border business from greater China, have generated approximately half of our net revenues in recent years. In addition to uncertainty about our ability to generate revenues from our foreign operations and expand into international markets, there are risks inherent in doing business internationally, including:

- uncertainties and instability in economic and market conditions resulting from inflationary pressures, increasing interest rates and the ongoing war in Ukraine;
- uncertainties caused by decreasing consumer confidence and demand for discretionary goods;
- expenses associated with localizing our products and services and customer data, including offering customers the ability to transact business in the local currency and adapting our products and services to local preferences (e.g., payment methods) with which we may have limited or no experience;
- trade barriers and changes in trade regulations;
- difficulties in developing, staffing, and simultaneously managing a large number of varying foreign operations as a result of distance, language, and cultural differences;
- stringent local labor laws and regulations;
- credit risk and higher levels of payment fraud;
- profit repatriation restrictions, foreign currency exchange restrictions or extreme fluctuations in foreign currency exchange rates for a particular currency;
- global or regional economic conditions that impact companies and customers with which we do business;
- political or social unrest, economic instability, repression, or human rights issues;
- geopolitical events, including natural disasters, public health issues (such as COVID-19 variants), acts of war (such as the ongoing war in Ukraine), and terrorism;
- supply chain disruptions;
- import or export regulations;
- economic and trade sanctions;
- compliance with U.S. laws such as the Foreign Corrupt Practices Act, and foreign laws prohibiting corrupt payments to government officials, as well as U.S. and foreign laws designed to combat money laundering and the financing of terrorist activities;
- antitrust and competition regulations;

- potentially adverse tax developments and consequences;
- economic uncertainties relating to sovereign and other debt;
- different, uncertain, or more stringent user protection, data protection, privacy, and other laws;
- risks related to other government regulation or required compliance with local laws;
- national or regional differences in macroeconomic growth rates;
- payment intermediation regulations;
- local licensing and reporting obligations; and
- increased difficulties in collecting accounts receivable.

Violations of the complex foreign and U.S. laws and regulations that apply to our international operations may result in fines, criminal actions, or sanctions against us, our officers, or our employees; prohibitions on the conduct of our business; and damage to our reputation. Although we have implemented policies and procedures designed to promote compliance with these laws, there can be no assurance that our employees, contractors, or agents will not violate our policies. These risks inherent in our international operations and expansion increase our costs of doing business internationally and could harm our business.

Cross-border trade is an important source of both revenue and profits for us. Cross-border trade also represents our primary (or in some cases, only) presence in certain important markets, such as China, and various other countries. The interpretation and/or application of laws, such as those related to intellectual property rights of authentic products, selective distribution networks, and sellers in other countries listing items on the Internet, could impose restrictions on, or increase the costs of, purchasing, selling, shipping, or returning goods across national borders. The shipping of goods across national borders is often more expensive and complicated than domestic shipping. Any factors that increase the costs of cross-border trade or restrict, delay, or make cross-border trade more difficult or impractical would lower our revenues and profits and could harm our business.

Our business may be adversely affected by geopolitical events, natural disasters, seasonal factors and other factors that cause our users to spend less time on our websites or mobile platforms and applications, including increased usage of other websites.

Our users may spend less time on our websites and our applications for mobile devices as a result of a variety of diversions, including: geopolitical events, such as war (including the ongoing war in Ukraine), the threat of war, or terrorist activity; natural disasters or the effects of climate change (such as drought, flooding, wildfires, increased storm severity and sea level rise); power shortages or outages, major public health issues, including pandemics (such as COVID-19 variants); less discretionary spend due to increasing utility prices in the European Union; social networking or other entertainment websites or mobile applications; significant local, national or global events capturing the attention of a large part of the population; and seasonal fluctuations due to a variety of factors. If any of these, or any other factors, divert our users from using our websites or mobile applications, our business could be materially adversely affected.

In 2022, we experienced reduced traffic in most markets resulting from geopolitical events (such as the ongoing war in Ukraine), inflationary pressure, foreign exchange rate volatility and lower consumer confidence. These factors are negatively impacting discretionary consumer spending and may continue to do so indefinitely, which could harm our business.

If we cannot keep pace with rapid technological developments or continue to innovate and create new initiatives to provide new programs, products and services, the use of our products and our revenues could decline.

Rapid, significant technological changes continue to confront the industries in which we operate and we cannot predict the effect of technological changes on our business. We also continuously strive to create new initiatives and innovations that promote growth, such as our payments and advertising offerings and other features that enhance the customer experience. In addition to our own initiatives and innovations, we rely in part on third parties, including some of our competitors, for the development of and access to new technologies. We expect that new services and technologies applicable to the industries in which we operate will continue to emerge. These new services and technologies may be superior to, or render obsolete, the technologies we currently use in our products and services. Incorporating new technologies into our products and services may require substantial expenditures and take considerable time, and ultimately may not be successful. In addition, our ability to adopt new services and develop new technologies may be inhibited by industry-wide standards, new laws and regulations, resistance to change from our users, clients or merchants, or third parties' intellectual property rights. Our success will depend on our ability to develop new technologies and adapt to technological changes and evolving industry standards.

Changes to our programs to protect buyers and sellers could increase our costs and loss rate, and failure to manage such programs effectively can result in harm to our reputation.

Our eBay Money Back Guarantee program represents the means by which we compensate users who believe that they have been defrauded, have not received the item that they purchased or have received an item different from what was described. We expect to continue to receive communications from users requesting reimbursement or threatening or commencing legal action against us if no reimbursement is made. Our liability for these sorts of claims is beginning to be clarified in some jurisdictions. Litigation involving liability for any such third-party actions could result in increased costs of doing business, lead to adverse judgments or settlements or otherwise harm our business. In addition, affected users will likely complain to regulatory agencies that could take action against us, including imposing fines or seeking injunctions.

Since transitioning to our payments system, we have also experienced and may continue to experience increased costs from chargebacks on payments, due to instances of forced transaction reversals initiated by buyers through their payment card issuers. These forced transaction reversals can be initiated for a number of reasons, including, but not limited to, fraud or seller nonperformance, among others.

Additionally, in order to further strengthen our buyers' confidence and trust in our services and the goods offered on our marketplace, we introduced "Authenticity Guarantee," an independent authentication service, in 2020 in select categories in the U.S. and have since expanded this service to more luxury categories and more markets. If we are unable to effectively manage the authentication process, including the third-party service providers on whom we rely for much of our item authentication, we may suffer harm to our reputation and may be subject to litigation, which could be costly and time-consuming for us.

Operations and continued development of our payments system and financial services offerings require ongoing investment, are subject to evolving laws, regulations, rules, and standards, and involve risk, including risks related to our dependence on third-party providers.

We have invested and plan to continue to invest internal resources into our payments tools in order to maintain existing availability, expand into additional markets and offer new payment methods and other types of financial services to our buyers and sellers. If we fail to invest adequate resources into payments on our platform, or if our investment efforts are unsuccessful, unreliable or result in system failure, our payments and financial services may not function properly or keep pace with competitive offerings, which could negatively impact their usage and our Marketplace. Future errors, failures or outages could cause our buyers and sellers to lose confidence in our payments system and could cause them to cease using our marketplace.

If we transition to new third-party payment service providers for any reason, we may be required to invest significant financial and personnel resources to support such transition or could be unable to find a suitable replacement service provider. As we offer new payment methods and financial services to our sellers and buyers, we are now subject to additional regulations and compliance requirements, and exposed to heightened fraud and regulatory risk, which could lead to an increase in our operating expenses.

We rely on third-party service providers to perform services related to compliance among other activities, credit card processing, payment disbursements, currency exchange, identity verification, sanctions screening, and fraud analysis and detection. As a result, we are subject to a number of risks related to our dependence on third-party service providers. If any or some of these service providers fail to perform adequately or if any such service provider were to terminate or modify its relationship with us unexpectedly, our sellers' ability to use our platform to receive orders or payments could be adversely affected, which would increase costs, drive sellers away from our marketplaces, result in potential legal liability, and harm our business. In addition, we and our third-party service providers may experience service outages from time to time that could adversely impact payments made on our platform. Additionally, any unexpected termination or modification of those third-party services could lead to a lapse in the effectiveness of certain fraud prevention and detection tools.

Our third-party service providers may increase the fees they charge us in the future, which would increase our operating expenses. This could, in turn, require us to increase the fees we charge to sellers and cause some sellers to reduce listings on our marketplaces or to leave our platform altogether by closing their accounts.

Payments and other financial services are governed by complex and continuously evolving laws and regulations that are subject to change and vary across different jurisdictions in the United States and globally. As a result, we are required to spend significant time and effort to determine whether various licensing and registration laws relating to payments and other financial services we offer apply to us and to comply with applicable laws and licensing and registration regulations. In addition, there can be no assurance that we will be able to obtain or retain any necessary licenses or registrations. Any failure or claim of failure on the part of the Company or its third-party service providers to comply with applicable laws and regulations relating to payments or financial services could require us to expend significant resources, result in liabilities, limit or preclude our ability to enter certain markets and harm our reputation. In addition, changes in payment regulations, or other financial regulation, including changes to the credit or debit card interchange rates in the United States or other markets, could adversely affect payments on our platform and make our payments systems less profitable.

Further, we are indirectly subject to payment card association operating rules and certification requirements pursuant to agreements with our third-party payment processors. These rules and requirements, including the Payment Card Industry Data Security Standard and rules governing electronic funds transfers, are subject to change or reinterpretation, making it difficult for us to comply. Any failure to comply with these rules and certification requirements could impact our ability to meet our contractual obligations to our third-party payment processors and could result in potential fines. In addition, changes in these rules and requirements, including any change in our designation by major payment card providers, could require a change in our business operations and could result in limitations on or loss of our ability to accept payment cards or other forms of payment, any of which could negatively impact our business. Such changes could also increase our costs of compliance, which could lead to increased fees for us or our sellers and adversely affect payments on our platform or usage of our payments services and Marketplace.

Our payments system is susceptible to illegal uses, including money laundering, terrorist financing, fraud and payments to sanctioned parties. If our compliance program and internal controls to limit such illegal activity are ineffective, government authorities could bring legal action against us or otherwise suspend our ability to offer payment services in one or more markets.

We may be unable to adequately protect or enforce our intellectual property rights and face ongoing allegations by third parties that we are infringing their intellectual property rights.

We believe the protection of our intellectual property, including our trademarks, patents, copyrights, domain names, trade dress, and trade secrets, is critical to our success. We seek to protect our intellectual property rights by relying on applicable laws and regulations in the United States and internationally, as well as a variety of administrative procedures. We also rely on contractual restrictions to protect our proprietary rights when offering or procuring products and services, including confidentiality and invention assignment agreements entered into with our employees and contractors and confidentiality agreements with parties with whom we conduct business.

However, effective intellectual property protection may not be available in every country in which our products and services are made available, and contractual arrangements and other steps we have taken to protect our intellectual property may not prevent third parties from infringing or misappropriating our intellectual property or deter independent development of equivalent or superior intellectual property rights by others. Trademark, copyright, patent, domain name, trade dress and trade secret protection is very expensive to maintain and may require litigation. We must protect our intellectual property rights and other proprietary rights in an increasing number of jurisdictions, a process that is expensive and time consuming and may not be successful in every jurisdiction. Also, we may not be able to discover or determine the extent of any unauthorized use of our proprietary rights. We have licensed in the past, and expect to license in the future, certain of our proprietary rights, such as trademarks or copyrighted material, to others. These licensees may take actions that diminish the value of our proprietary rights or harm our reputation. Any failure to adequately protect or enforce our intellectual property rights, or significant costs incurred in doing so, could materially harm our business.

Additionally, we have repeatedly been sued for allegedly infringing other parties' patents. We are a defendant in various patent suits and have been notified of several other potential patent disputes.

As the number of patent owners and products in the software industry increases and the functionality of these products further overlap, and as we acquire technology through acquisitions or licenses, litigation may be necessary to determine the validity and scope of the intellectual property rights of others and we may become increasingly

subject to patent suits and other infringement claims, including copyright, and trademark infringement claims. Such claims may be brought directly against us and/or against our customers whom we may indemnify either because we are contractually obligated to do so or we choose to do so as a business matter. Patent claims, whether meritorious or not, are time-consuming and costly to defend and resolve, and could require us to make expensive changes in our methods of doing business, enter into costly royalty or licensing agreements, make substantial payments to satisfy adverse judgments or settle claims or proceedings, or cease conducting certain operations, which would harm our business.

Failure to deal effectively with fraudulent activities on our platforms would increase our loss rate and harm our business, and could severely diminish merchant and consumer confidence in and use of our services.

We face reputational and other risks with respect to fraudulent activities on our platforms and periodically receive complaints from buyers and sellers who may not have received the goods that they had contracted to purchase or payment for the goods that a buyer had contracted to purchase. In some European and Asian jurisdictions, buyers may also have the right to withdraw from a sale made by a professional seller within a specified time period. While we can, in some cases, suspend the accounts of users who fail to fulfill their payment or delivery obligations to other users, we do not have the ability to require users to make payment or deliver goods, or otherwise make users whole other than through our protection programs. Although we have implemented measures to detect and reduce the occurrence of fraudulent activities, combat bad buyer experiences and increase buyer satisfaction, including evaluating sellers on the basis of their identity and transaction history and restricting or suspending their activity, there can be no assurance that these measures will be effective in combating fraudulent transactions or improving overall satisfaction among sellers, buyers, and other participants. If these measures fail to address fraud effectively, buyers and sellers could lose trust in our marketplace, and our reputation and results of operations could suffer as a result. Additional measures to address fraud could negatively affect the attractiveness of our services to buyers or sellers, resulting in a reduction in the ability to attract new users or retain current users, damage to our reputation, or a diminution in the value of our brand names.

Our business is subject to online security risks, including security breaches and cyberattacks.

Our businesses involve the storage and transmission of users' personal information, including financial information. In addition, a significant number of our users authorize us to bill their payment card accounts directly for all transaction and other fees charged by us or, in certain cases, third-party service providers utilized in our payment services. An increasing number of websites, including those owned by several other large Internet and offline companies, have disclosed breaches of their security, some of which have involved sophisticated and highly targeted attacks on portions of their websites or infrastructure. Our information technology and infrastructure may be vulnerable to cyberattacks (including ransomware attacks) or security incidents and third parties may be able to access our users' proprietary information and payment card data that are stored on or accessible through our systems. Any security breach at a company providing services to us or our users could have similar effects.

We may also need to expend significant additional resources to protect against security breaches or to redress problems caused by breaches. Additionally, our insurance policies may not be adequate to reimburse us for losses caused by security breaches and we may not be able to fully collect, if at all, under these insurance policies.

Systems failures and resulting interruptions in the availability of or degradation in the performance of our websites, applications, products or services could harm our business.

Our systems may experience service interruptions or degradation due to hardware and software defects or malfunctions, computer denial-of-service and other cyberattacks, human error, earthquakes, hurricanes, floods, fires, natural disasters, power losses, disruptions in telecommunications services, fraud, military or political conflicts, terrorist attacks, computer viruses, or other events. Our systems are also subject to break-ins, sabotage and intentional acts of vandalism. Some of our systems are not fully redundant and our disaster recovery planning is not sufficient for all eventualities.

We have experienced and will likely continue to experience system failures, denial-of-service attacks, human error and other events or conditions from time to time that interrupt the availability or reduce the speed or functionality of our websites and mobile applications, including our payments services. These events have resulted and likely will result in loss of revenue. A prolonged interruption in the availability or reduction in the speed or other functionality of our websites and mobile applications or payments services could materially harm our business. Frequent or persistent interruptions in our services could cause current or potential users to believe that our

systems are unreliable, leading them to switch to our competitors or to avoid our sites, and could permanently harm our reputation and brands. Moreover, to the extent that any system failure or similar event results in damages to our customers or their businesses, these customers could seek significant compensation from us for their losses and those claims, even if unsuccessful, would likely be time-consuming and costly for us to address. We also rely on facilities, components and services supplied by third parties and our business may be materially adversely affected to the extent these components or services do not meet our expectations or these third parties cease to provide the services or facilities. In particular, a decision by any of our third party hosting providers to close a facility that we use could cause system interruptions and delays, result in loss of critical data and cause lengthy interruptions in our services. We do not carry business interruption insurance sufficient to compensate us for losses that may result from interruptions in our service as a result of systems failures and similar events.

Our success largely depends on key employees. Because competition for our key employees is intense, we may not be able to attract, retain, and develop the highly skilled employees we need to support our business. The loss of senior management or other key employees could harm our business.

Our future performance depends substantially on the continued services of our senior management and other key employees, including highly skilled engineers and product developers, and our ability to attract, retain, and motivate them. Competition for highly skilled individuals is intense, especially in the Silicon Valley where our corporate headquarters are located, and we may be unable to successfully attract, integrate or retain sufficiently qualified employees. In making employment decisions, particularly in the Internet and high-technology industries, employees often consider the value of their total compensation, including share-based awards such as restricted stock units, that they could receive in connection with their employment. In addition, our employee hiring and retention also depend on our ability to build and maintain a diverse, welcoming and inclusive workplace. If our share-based or other compensation programs cease to be viewed as competitive, including due to fluctuations in our stock price, or our workplace is not viewed as welcoming and inclusive, our ability to attract, retain, and motivate employees would be weakened, which could harm our business. We do not have long-term employment agreements with any of our key employees and do not maintain any “key person” life insurance policies. The loss of the services of any of our senior management or other key employees, or our inability to attract highly qualified senior management and other key employees, could harm our business. Our business is primarily non-unionized, but we have some works councils outside the U.S. There has been a general increase in workers organizing to form or join a union in the U.S. While we have not seen a material increase in such efforts among our employees, the unionization or related activism of significant employee populations could result in higher costs and other operational changes necessary to respond to changing conditions and to establish new relationships with worker representatives.

Problems with or price increases by third parties who provide services to us or to our sellers could harm our business.

A number of third parties provide services to us or to our sellers. Such services include seller tools that automate and manage listings, merchant tools that manage listings and interface with inventory management software, storefronts that help our sellers list items, shipping providers that deliver goods sold on our platform, managed payments intermediation and item authentication services, among others. Financial or regulatory issues, labor issues (e.g., strikes, lockouts, worker shortages or work stoppages), or other problems that prevent these companies from providing services to us or our sellers could harm our business.

Price increases by, or service terminations, disruptions or interruptions at, companies that provide services to us and our sellers and clients could also reduce the number of listings on our platforms or make it more difficult for our sellers to complete transactions, thereby harming our business. While we continue to work with global carriers to offer our sellers a variety of shipping options and to enhance their shipping experience, postal rate increases may reduce the competitiveness of certain sellers’ offerings, and postal service changes and disruptions could require certain sellers to utilize alternatives which could be more expensive or inconvenient, which could in turn decrease the number of transactions on our sites, thereby harming our business.

We have outsourced certain functions to third-party providers, including some customer support, managed payments, product development functions and much of our item authentication service, which are critical to our operations. If our service providers do not perform satisfactorily, our operations could be disrupted, which could result in user dissatisfaction and could harm our business.

There can be no assurance that third parties who provide services directly to us or our sellers will continue to do so on acceptable terms, or at all. If any third parties were to stop providing services to us or our sellers on acceptable terms, including as a result of bankruptcy, we may be unable to procure alternatives from other third parties in a timely and efficient manner and on acceptable terms, or at all.

Regulatory and Legal Risks

Our business is subject to extensive and increasing government regulation and oversight, which could adversely impact our business.

We are subject to laws and regulations affecting our domestic and international operations in a number of areas, including consumer protection, data privacy requirements, intellectual property ownership and infringement, prohibited items and stolen goods, tax, antitrust and anti-competition, export requirements, anti-corruption, labor, advertising, digital content, real estate, payments and financial services, billing, ecommerce/marketplace liability, promotions, quality of services, telecommunications, mobile communications and media, environmental, packaging and waste, and health and safety regulations, as well as laws and regulations intended to combat money laundering and the financing of terrorist activities. In addition, we are, or may become, subject to further regulation in some of the above-mentioned areas or new areas as a result of the continued development and expansion of our payments capabilities. Further, certain government agencies seek to hold us liable for third party sales on our Marketplace platforms to the extent such sales implicate laws and regulations enforced by those agencies, including specifically the Environmental Protection Agency (the “EPA”) and the Drug Enforcement Agency (the “DEA”), as described more fully under “Note 13 — Commitments and Contingencies — Litigation and Other Legal Matters” and below under the heading “The listing or sale by our users of certain items, including items that allegedly infringe the intellectual property rights of rights owners, including pirated or counterfeit items, illegal items or items used in an illegal manner may harm our business.”

Compliance with these laws, regulations, and similar requirements may be onerous and expensive, and variances and inconsistencies from jurisdiction to jurisdiction may further increase the cost of compliance and doing business. Any such costs, which may rise in the future as a result of changes in these laws and regulations or in their interpretation, could individually or in the aggregate make our products and services less attractive to our customers, delay the introduction of new products or services in one or more regions, or cause us to change or limit our business practices. We have implemented policies and procedures designed to ensure compliance with applicable laws and regulations, but there can be no assurance that our customers, employees, contractors, or agents will not violate such laws and regulations or our policies and procedures. If we are held liable for any such violations, including relating to actions by third parties using our Marketplace platforms, we could be subject to monetary penalties, which depending on the matter could be material to us. Furthermore, our reputation could suffer harm as a result of any such violations.

New laws and increasing levels of regulation in the areas of privacy and protection of user data could harm our business.

We are subject to multiple laws relating to the collection, use, sharing, retention, security, transfer and other handling of personally identifiable information about individuals, including our users and employees around the world. Data protection and privacy laws may differ, and be interpreted and applied inconsistently, from country to country. In many cases, these laws apply not only to user data, employee data and third-party transactions, but also to transfers of information between or among ourselves, our subsidiaries, and other parties with which we have commercial relations. These laws continue to develop around the globe and in ways we cannot predict and that may harm our business.

Regulatory scrutiny of privacy, data protection, and collection, use and disclosure of personal data is increasing on a global basis. We are subject to a number of privacy laws and regulations in the countries in which we operate and these laws and regulations will likely continue to evolve over time, both through regulatory and legislative action and judicial decisions. In addition, compliance with these laws may restrict our ability to provide services to our customers that they may find to be valuable. For example, the General Data Protection Regulation (“GDPR”) became effective in May 2018. The GDPR, which applies to personal data collected in the context of all of our activities conducted from an establishment in the European Union, related to products and services offered to individuals in the European Union or related to the monitoring of individuals’ behavior in Europe, imposes a range of significant compliance obligations regarding the handling of personal data. Actions required to comply with these obligations depends in part on how particular and strict regulators interpret and apply them. If we fail to comply with

the GDPR, or if regulators assert we have failed to comply with the GDPR, we may be subject to regulatory enforcement actions, that can result in monetary penalties of up to 4% of our annual worldwide revenue, private lawsuits, and/or reputational damage. In June 2021, the European Commission published new versions of the Standard Contractual Clauses, which are used as a legal cross-border mechanism allowing companies to transfer/allow access to personal data outside the European Economic Area. Also in June 2021, the European Data Protection Board finalized its recommendations regarding supplemental transfer measures to protect personal data during cross-border transfers. We must incur costs and expenses to comply with the new requirements, which may impact the cross-border transfer of personal data throughout our organization and to/from third parties.

In the U.S., several states, including California, Colorado, Connecticut, Utah and Virginia, have adopted generally applicable and comprehensive privacy laws. These new and developing state laws provide a number of new privacy rights for residents of these states and impose corresponding obligations on organizations doing business in these states. Not only do these laws require that we make new disclosures to consumers, business contacts, employees, job applicants and others about our data collection, use and sharing practices, but they also require that we provide new rights, such as the rights to access, delete and correct personal data. While the California law (CCPA) became effective in 2020, it has already been amended significantly, and compliance with the amended law (CPRA) will be required in January 2023. Compliance with the other states' laws will be required at different times during 2023. These new and amended laws will require us to continue to incur costs and expenses in our effort to comply. In addition, a number of other U.S. states are considering adopting laws and regulations imposing obligations regarding the handling of personal data. Compliance with the GDPR, the new state laws, and other current and future applicable U.S. and international privacy, data protection, cybersecurity, artificial intelligence and other data-related laws can be costly and time-consuming. Complying with these varying national and international data and privacy-related requirements could cause us to incur substantial costs and/or require us to change our business practices in a manner adverse to our business and violations of data and privacy-related laws can result in significant penalties.

A determination that there have been violations of laws relating to our practices under communications-based laws could also expose us to significant damage awards, fines and other penalties that could, individually or in the aggregate, materially harm our business. In particular, because of the enormous number of emails, texts and other communications we send to our users, communications laws that provide a specified monetary damage award or fine for each violation (such as those described below) could result in particularly large awards or fines.

For example, under the federal Telephone Consumer Protection Act, or TCPA, we face potential exposure to liability for certain types of telephonic communication with customers, including but not limited to text messages to mobile phones. Under the TCPA, plaintiffs may seek actual monetary loss or statutory damages of \$500 per violation, whichever is greater, and courts may treble the damage award for willful or knowing violations. We are regularly subject to class-action lawsuits, as well as individual lawsuits, containing allegations that our businesses violated the TCPA. These lawsuits, and other private lawsuits not currently alleged as class actions, seek damages (including statutory damages) and injunctive relief, among other remedies. While a 2021 Supreme Court decision narrowed the applicability of the TCPA's restrictions, plaintiffs continue to test the boundaries of the decision, and a few states, including Florida and Oklahoma, have adopted TCPA-like laws that similarly provide for statutory damages and a private right of action. Additional states may follow suit. Given the enormous number of communications we send to our users, a determination that there have been violations of the TCPA or other communications-based statutes could expose us to significant damage awards that could, individually or in the aggregate, materially harm our business.

We post on our websites our privacy notices and practices concerning the collection, use, sharing, disclosure, deletion and retention of our user data. Any failure, or perceived failure, by us to comply with our posted privacy notices or with any regulatory requirements or orders or other federal, state or international privacy or consumer protection-related laws and regulations, including the GDPR, CCPA and CPRA, could result in proceedings or actions against us by governmental entities or others (e.g., class action plaintiffs), subject us to significant penalties and negative publicity, require us to change our business practices, increase our costs and adversely affect our business. Data collection, data usage, privacy and security have become the subject of increasing public concern. If Internet and mobile users were to reduce their use of our websites, mobile platforms, products, and services as a result of these concerns, or not consent to the use of their personal data for certain marketing or advertising purposes, our business could be harmed. We also have experienced security breaches and likely will in the future, which themselves may result in a violation of these laws and give rise to regulatory enforcement and/or private litigation.

Other laws and regulations could harm our business.

It is not always clear how laws and regulations governing matters relevant to our business, such as property ownership, copyrights, trademarks, and other intellectual property issues, parallel imports and distribution controls, taxation, libel and defamation, and obscenity apply to our businesses. Many of these laws were adopted prior to the advent of the Internet, mobile, and related technologies and, as a result, do not contemplate or address the unique issues of the Internet and related technologies. Many of these laws, including some of those that do reference the Internet are subject to interpretation by the courts on an ongoing basis and the resulting uncertainty in the scope and application of these laws and regulations increases the risk that we will be subject to private claims and governmental actions alleging violations of those laws and regulations.

As our activities, the products and services we offer, our investment in other companies, and our geographical scope continue to expand, regulatory agencies or courts may claim or hold that we or our users are subject to additional requirements (including licensure) or prohibited from conducting our business in their jurisdiction, either generally or with respect to certain actions. For example, we have the ability to acquire investments in other companies (such as Adevinta, Adyen, KakaoBank and Gmarket, formerly known as Apollo Korea) that raise the potential for us to be deemed an investment company as defined by the Investment Company Act of 1940 (the “Investment Company Act”). While we intend to conduct our operations such that we will not be deemed an investment company, such a determination would require us to initiate burdensome compliance requirements and comply with restrictions imposed by the Investment Company Act that would limit our activities, including limitations on our capital structure and our ability to transact with affiliates, which would have an adverse effect on our financial condition. Further, financial and political events have increased the level of regulatory scrutiny on large companies, and regulatory agencies may view matters or interpret laws and regulations differently than they have in the past and in a manner adverse to our businesses.

Numerous U.S. states and foreign jurisdictions, including the State of California, have regulations regarding “auctions” and the handling of property by “secondhand dealers” or “pawnbrokers.” Several states and some foreign jurisdictions have attempted to impose such regulations upon us or our users, and others may attempt to do so in the future. Attempted enforcement of these laws against some of our users appears to be increasing and we could be required to change the way we or our users do business in ways that increase costs or reduce revenues, such as forcing us to prohibit listings of certain items or restrict certain listing formats in some locations. We could also be subject to fines or other penalties, and any of these outcomes could harm our business.

The European Union recently enacted the Digital Services Act (the “DSA”), which became effective in November 2022 and will begin to be enforced in early 2024 (or earlier if we qualify as a “very large online platform”). The DSA imposes legal obligations on online marketplaces operating in Europe, requiring them to verify and ensure the accuracy and disclosure of required information, as well as the safety and authenticity of products posted by third-party merchants. The DSA also enforces new content moderation obligations, notice obligations, advertising restrictions and other requirements on digital platforms that will create additional operational burdens and compliance costs for us. For online platforms like ours, noncompliance with the DSA could result in fines of up to 6% of annual global revenues, which would be adverse to our business.

The European Union is also considering additional proposed regulations relating to the safety and sustainability of products on the EU market, which would bring new obligations both on us directly and our sellers and vendors. Additionally, certain EU-member countries have enacted anti-waste regulations that create direct obligations on sellers and impose compliance verification obligations on us. These anti-waste regulations vary by EU-member country, creating additional operational burdens and compliance costs on our sellers and us. These proposed and ongoing regulations could cause our marketplaces to be less attractive to current and prospective sellers and buyers, which could materially impact our business.

Government regulators globally are also imposing new data reporting requirements on platforms for user tax compliance. These laws (e.g., DAC 7 in the EU, or 1099-K in the US) may make users more reluctant to use our services due to increased sensitivity around personal data collection and reporting, even when mandated by applicable laws and regulations.

As we expand and localize our international activities, we are increasingly becoming obligated to comply with the laws of the countries or markets in which we operate. In addition, because our services are accessible worldwide and we facilitate sales of goods and provide services to users worldwide, one or more jurisdictions may claim that we or our users are required to comply with their laws based on the location of our servers or one or more

of our users, or the location of the product or service being sold or provided in an ecommerce transaction. Laws regulating Internet, mobile and ecommerce technologies outside of the United States are generally less favorable to us than those in the United States. Compliance may be more costly or may require us to change our business practices or restrict our service offerings, and the imposition of any regulations on us or our users may harm our business. In addition, we may be subject to multiple overlapping legal or regulatory regimes that impose conflicting requirements on us (e.g., in cross-border trade). Our alleged failure to comply with foreign laws could subject us to penalties ranging from criminal prosecution to significant fines to bans on our services, in addition to the significant costs we may incur in defending against such actions.

We are regularly subject to litigation and regulatory and government inquiries, investigations and disputes, as our business evolves and as governments and regulators seek to extend new and existing laws to reach our business model.

We are regularly subject to claims, lawsuits (including class actions and individual lawsuits), government investigations, and other proceedings involving competition and antitrust, intellectual property, privacy, consumer protection, accessibility claims, securities, tax, labor and employment, commercial disputes, content generated by our users, services and other matters. The number and significance of these disputes and inquiries have increased as our Company has grown larger, our businesses have expanded in scope and geographic reach, and our products and services have increased in complexity. As the global regulatory and legal landscape evolves, we may also become subject to product liability or other claims when products sold by third parties using our platforms result in personal injury, illness, death, injury to property or harm to the environment, or such sales are alleged to be in violation of the law.

As described more fully under “Note 13 — Commitments and Contingencies — Litigation and Other Legal Matters” and below under the heading “The listing or sale by our users of certain items, including items that allegedly infringe the intellectual property rights of rights owners, including pirated or counterfeit items, illegal items or items used in an illegal manner may harm our business,” certain government agencies are seeking to hold us liable for third party sales on our Marketplace platforms to the extent such sales implicate laws and regulations enforced by those agencies, including specifically the EPA and the DEA.

In addition, as also more fully described under “Note 13 — Commitments and Contingencies — Litigation and Other Legal Matters,” we are responding to inquiries from the U.S. Attorney for the District of Massachusetts regarding potential criminal liability of the Company arising from the stalking and harassment in 2019 of the editor and publisher of Ecommercebytes, a website that publishes ecommerce news and information. Six former Company employees and one former contractor have pleaded guilty to crimes arising from the conduct. The Company has begun discussions with the U.S. Attorney’s Office, which discussions include a potential settlement. We expect any such settlement may include fines, other payments, and non-monetary remedies, such as additional remediation, compliance and reporting requirements. Furthermore, the editor and publisher also have a pending civil action against the Company, which seeks unspecified damages arising from the above-described conduct.

The outcome and impact of such claims, lawsuits, government investigations, and other proceedings cannot be predicted with certainty. Regardless of the outcome, such investigations and proceedings can have a material adverse impact on us because of legal costs, diversion of management resources, and other factors. Determining reserves for our pending litigation and other proceedings is a complex, fact-intensive process that is subject to judgment calls. Based on currently available information, reasonably possible losses arising directly from such claims, lawsuits, government investigations, and other proceedings (i.e., monetary damages or amounts paid in judgment or settlement) in excess of our recorded accruals are not material. However, if one or more matters were resolved against us in a reporting period for amounts in excess of management’s expectations, the impact on our operating results or financial condition for that reporting period could be material. These proceedings could also result in criminal sanctions, consent decrees, reputational harm, harm to our relations with various government agencies and regulators, or orders preventing us from offering certain products or services, or requiring a change in our business practices in costly ways, or requiring development of non-infringing or otherwise altered products or technologies. Any of these consequences could harm our business.

We are subject to regulatory activity under competition laws that could adversely impact our business.

We are subject to scrutiny by various government agencies under U.S. and foreign laws and regulations, including antitrust and competition laws. Some jurisdictions also provide private rights of action for competitors or consumers to assert claims of anti-competitive conduct. Other companies and government agencies have in the

past and may in the future allege that our actions violate the antitrust or competition laws of the United States, individual states, the European Union or other countries, or otherwise constitute unfair competition. An increasing number of governments are regulating competition law activities, including increased scrutiny in large markets such as China. Our business partnerships or agreements or arrangements with customers or other companies could give rise to regulatory action or antitrust litigation. Some regulators, particularly those outside of the United States, may perceive our business to be used so broadly that otherwise uncontroversial business practices could be deemed anticompetitive. Certain competition authorities have conducted market studies of our industries. Such claims and investigations, even if without foundation, may be very expensive to defend, involve negative publicity and substantial diversion of management time and effort and could result in significant judgments against us or require us to change our business practices.

The listing or sale by our users of certain items, including items that allegedly infringe the intellectual property rights of rights owners, including pirated or counterfeit items, illegal items or items used in an illegal manner may harm our business.

The listing or sale by our users of unlawful, counterfeit or stolen goods or unlawful services, or sale of goods or services in an unlawful manner, has resulted and may continue to result in allegations of civil or criminal liability for unlawful activities against us (including the employees and directors of our various entities) involving activities carried out by users through our services. In a number of circumstances, third parties, including government regulators and law enforcement officials, have alleged that our services aid and abet violations of certain laws, including laws regarding the sale of counterfeit items, laws restricting or prohibiting the transferability (and by extension, the resale) of digital goods (e.g., books, music and software), the fencing of stolen goods, selective distribution channel laws, customs laws, distance selling laws, and the sale of items outside of the United States that are regulated by U.S. export controls.

In addition, allegations of infringement of intellectual property rights, including but not limited to counterfeit items, have resulted in threatened and actual litigation from time to time by rights owners. These and similar suits may also force us to modify our business practices in a manner that increases costs, lowers revenue, makes our websites and mobile platforms less convenient to customers, and requires us to spend substantial resources to take additional protective measures or discontinue certain service offerings in order to combat these practices. In addition, we have received significant media attention relating to the listing or sale of illegal or counterfeit goods, which could damage our reputation, diminish the value of our brand names, and make users reluctant to use our products and services.

As described more fully under “Note 13 — Commitments and Contingencies — Litigation and Other Legal Matters,” we have received requests for information from government agencies related to our potential liability for products sold by sellers on our Marketplace platforms. We have responded to inquiries from the U.S. Department of Justice regarding products sold on our Marketplace platforms alleged to violate certain laws and regulations, including regulations of the EPA and, separately, regulations of the DEA. The inquiries relate to whether and to what extent we should be liable for the sale of regulated or illicit products manufactured and sold by others who listed such products on Marketplace platforms in a manner that evaded and/or was designed to evade detection by us. If we are found to be liable for such activities on our Marketplace, we likely will be subject to monetary damages, changes in our business practices, or other remedies that could have a material adverse impact on our business, and our reputation could suffer harm.

We are subject to risks associated with information disseminated through our services.

Online services companies may be subject to claims relating to information disseminated through their services, including claims alleging defamation, libel, breach of contract, invasion of privacy, negligence, copyright or trademark infringement, among other things. The laws relating to the liability of online services companies for information disseminated through their services are subject to frequent challenges both in the United States and foreign jurisdictions. Any liabilities incurred as a result of these matters could require us to incur additional costs and harm our reputation and our business.

Our potential liability to third parties for the user-provided content on our sites may increase. If we become liable for information provided by our users and carried on our service in any jurisdiction in which we operate, we could be directly harmed and we may be forced to implement new measures to reduce our exposure to this liability, including expending substantial resources or discontinuing certain service offerings, which could harm our business.

Interest Rate and Indebtedness Risks

Fluctuations in interest rates, and changes in regulatory guidance related to such interest rates, could adversely impact our financial results.

During 2022, the Federal Reserve raised benchmark interest rates to combat inflation, and interest rates are expected to continue to increase in 2023. Our borrowing costs will be impacted by rising interest rates, which could negatively impact our results of operations and financial condition. The cost of future fixed rate indebtedness may be more expensive than existing fixed rate indebtedness that is coming due and being refinanced. Further, although as of December 31, 2022 we had no outstanding borrowings under our revolving credit facility, our revolving credit facility is subject to floating interest rates and therefore is also subject to interest rate risks to the extent we borrow in the future. We have in the past and may in the future enter into interest rate hedging arrangements, but we can provide no assurances that these arrangements will fully mitigate the increased borrowing costs.

In addition, investments in both fixed-rate and floating-rate interest-earning instruments carry varying degrees of interest rate risk. As described more fully under “Note 7 – Investments,” in 2022, the fair market value of our fixed-rate investment securities was adversely impacted due to a rise in interest rates, which may continue to occur. This increase was partially offset by increased interest income resulting from higher yielding investments in a higher interest rate environment. If rates were to return to lower levels, we would expect to see the opposite effect with a corresponding reduction in investment income and increase in fair value.

We have substantial indebtedness, and we may incur substantial additional indebtedness in the future, and we may not generate sufficient cash flow from our business to service our indebtedness. Failure to comply with the terms of our indebtedness could result in the acceleration of our indebtedness, which could have an adverse effect on our cash flow and liquidity.

We have a substantial amount of outstanding indebtedness and we may incur substantial additional indebtedness in the future, including under our commercial paper program and revolving credit facility or through public or private offerings of debt securities. Our outstanding indebtedness and any additional indebtedness we incur may have significant consequences, including, without limitation, any of the following:

- requiring us to use a significant portion of our cash flow from operations and other available cash to service our indebtedness, thereby reducing the amount of cash available for other purposes, including capital expenditures, dividends, share repurchases, and acquisitions;
- our indebtedness and leverage may increase our vulnerability to downturns in our business, to competitive pressures, and to adverse changes in general economic and industry conditions;
- adverse changes in the ratings assigned to our debt securities by credit rating agencies will likely increase our borrowing costs;
- our ability to obtain additional financing for working capital, capital expenditures, acquisitions, share repurchases, dividends or other general corporate and other purposes may be limited; and
- our flexibility in planning for, or reacting to, changes in our business and our industry may be limited.

Tax Risks

Our business and our sellers and buyers may be subject to evolving sales and other tax regimes in various jurisdictions, which may harm our business.

The application of indirect taxes such as sales and use tax, value-added tax (“VAT”), goods and services tax (“GST”) (including the “digital services tax”), business tax, withholding tax and gross receipt tax, and tax information reporting obligations to businesses like ours and to our sellers and buyers is a complex and evolving issue. Many of the fundamental statutes and regulations that impose these taxes were established before the adoption and growth of the Internet and ecommerce. Significant judgment is required to evaluate applicable tax obligations and as a result amounts recorded are estimates and are subject to adjustments. In many cases, the ultimate tax determination is uncertain because it is not clear when and how new and existing statutes might apply to our business or to our sellers’ businesses. In some cases it may be difficult or impossible for us to validate information provided to us by our sellers on which we must rely to ascertain any obligations that may apply to us related to our

sellers' businesses, given the intricate nature of these regulations as they apply to particular products or services and that many of the products and services sold in our marketplace are unique or handmade. If we are found to be deficient in how we have addressed our tax obligations, our business could be adversely impacted.

From time to time, some taxing authorities in the United States have notified us that they believe we owe them certain taxes imposed on our services. These notifications have not resulted in any significant tax liabilities to date, but there is a risk that some jurisdiction may be successful in the future, which would harm our business. While we attempt to comply in those jurisdictions where it is clear that a tax is due, some of our subsidiaries have, from time to time, received claims relating to the applicability of indirect taxes to our fees. Additionally, we pay input VAT on applicable taxable purchases within the various countries in which we operate. In most cases, we are entitled to reclaim this input VAT from the various countries. However, because of our unique business model, the application of the laws and rules that allow such reclamation is sometimes uncertain. A successful assertion by one or more countries that we are not entitled to reclaim VAT could harm our business.

Various jurisdictions are seeking to, or have recently imposed additional reporting, record-keeping, indirect tax collection and remittance obligations, or revenue-based taxes on businesses like ours that facilitate online commerce. If requirements like these become applicable in additional jurisdictions, our business, collectively with eBay sellers' businesses, could be harmed. For example, taxing authorities in the U.S. and in other countries have targeted e-commerce platforms as a means to calculate, collect, and remit indirect taxes for transactions taking place over the internet, and have enacted laws and others are considering similar legislation. To date, 45 states, the District of Columbia and Puerto Rico have enacted Internet sales tax legislation with additional states anticipated to adopt legislation in the coming years. Our business is also required to increase payments reporting requirements for U.S. sellers as a result of federal legislation. All businesses that process payments are now required to issue a Form 1099-K for all sellers who receive more than \$600 in net payments in a year, a decrease from the previous reporting threshold of \$20,000 and 200 transactions. The IRS recently announced a one-year delay of this rule. As a result, Form 1099-Ks for the new thresholds will be issued beginning in January 2024, subject to potential new federal legislation raising the threshold and/or future IRS action. Tax collection responsibility and the additional costs associated with complex sales and use tax collection, remittance and audit requirements, or reporting, could create additional burdens for buyers and sellers on our websites and mobile platforms. Moreover, any failure by us to prepare for and comply with this and similar reporting and record-keeping obligations could result in substantial monetary penalties and other sanctions, adversely impact our ability to do business in certain jurisdictions and harm our business.

These legislative changes or new legislation could adversely affect our business if the requirement of tax to be charged on items sold on our marketplaces causes our marketplaces to be less attractive to current and prospective buyers, which could materially impact our business and eBay sellers' businesses. This legislation could also require us or our sellers to incur substantial costs in order to comply, including costs associated with tax calculation, collection, remittance, and audit requirements, which could make selling on our marketplaces less attractive.

We may have exposure to greater than anticipated tax liabilities.

The determination of our worldwide provision for income taxes and other tax liabilities requires estimation and significant judgment, and there can be from time to time transactions and calculations where the ultimate tax determination is uncertain. Like many other multinational corporations, we are subject to tax in multiple U.S. and foreign jurisdictions and have structured our operations to reduce our effective tax rate. Our determination of our tax liability is always subject to audit and review by applicable domestic and foreign tax authorities, and we are currently undergoing a number of investigations, audits and reviews by taxing authorities throughout the world, including with respect to our business structure. Any adverse outcome of any such audit or review could harm our business, and the ultimate tax outcome may differ from the amounts recorded in our financial statements and may materially affect our financial results in the period or periods for which such determination is made. While we have established reserves based on assumptions and estimates that we believe are reasonable to cover such eventualities, these reserves may prove to be insufficient.

In addition, our future income taxes could be adversely affected by a shift in our jurisdictional earning mix, by changes in the valuation of our deferred tax assets and liabilities, changes in the valuation of our investments, as a result of gains on our foreign exchange risk management program, or changes in tax laws, regulations, or accounting principles, as well as certain discrete items.

Transactional Risks

Acquisitions, dispositions, joint ventures, strategic partnerships and strategic investments could result in operating difficulties and could harm our business or impact our financial results.

We have acquired a significant number of businesses of varying size and scope, technologies, services, and products, and we maintain investments in certain businesses. We have also disposed of significant businesses. We expect to continue to evaluate and consider a wide array of potential strategic transactions as part of our overall business strategy, including business combinations, acquisitions, and dispositions of businesses, technologies, services, products, and other assets, as well as strategic investments and joint ventures.

These transactions may involve significant challenges and risks, including:

- the potential loss of key customers, merchants, vendors and other key business partners of the companies we acquire, or dispose of, following and continuing after announcement of our transaction plans;
- declining employee morale and retention issues affecting employees of companies that we acquire or dispose of, which may result from changes in compensation, or changes in management, reporting relationships, future prospects or the direction of the acquired or disposed business;
- difficulty making new and strategic hires of new employees;
- diversion of management time and a shift of focus from operating the businesses to the transaction, and in the case of an acquisition, integration and administration;
- the need to provide transition services to a disposed of company, which may result in the diversion of resources and focus;
- the need to integrate the operations, systems (including accounting, management, information, human resource and other administrative systems), technologies, products and personnel of each acquired company, which is an inherently risky and potentially lengthy and costly process;
- the inefficiencies and lack of control that may result if such integration is delayed or not implemented, and unforeseen difficulties and expenditures that may arise as a result;
- the need to implement or improve controls, procedures and policies appropriate for a larger public company at companies that prior to acquisition may have lacked such controls, procedures and policies or whose controls, procedures and policies did not meet applicable legal and other standards;
- risks associated with our expansion into new international markets and new areas of business;
- derivative lawsuits resulting from the acquisition or disposition;
- liability for activities of the acquired or disposed of company before the transaction, including intellectual property and other litigation claims or disputes, violations of laws, rules and regulations, commercial disputes, tax liabilities and other known and unknown liabilities and, in the case of dispositions, liabilities to the acquirers of those businesses under contractual provisions such as representations, warranties and indemnities;
- the potential loss of key employees following the transaction;
- the acquisition of new customer and employee personal information by us or a third party acquiring assets or businesses from us, which in and of itself may require regulatory approval and or additional controls, policies and procedures and subject us to additional exposure;
- any fluctuations in share prices, financial results and fluctuations in exchange rates, and our ability to sell our shares in any company we have invested in; and
- our dependence on the acquired business' accounting, financial reporting, operating metrics and similar systems, controls and processes and the risk that errors or irregularities in those systems, controls and processes will lead to errors in our consolidated financial statements or make it more difficult to manage the acquired business.

We have made certain investments, including through joint ventures, in which we have a minority equity interest and/or lack management and operational control. The controlling joint venture partner in a joint venture may have business interests, strategies, or goals that are inconsistent with ours, and business decisions or other actions or omissions of the controlling joint venture partner or the joint venture company may result in harm to our reputation or adversely affect the value of our investment in the joint venture. Any circumstances, which may be out of our control, that adversely affect the value of our investments, or cost resulting from regulatory action or lawsuits in connection with our investments, could harm our business or negatively impact our financial results.

We entered into a warrant agreement in conjunction with a commercial agreement with Adyen that entitles us to acquire a fixed number of shares of Adyen's common stock subject to certain milestones being met. This warrant

is accounted for as a derivative instrument under ASC Topic 815, *Derivatives and Hedging*. Changes in Adyen's common stock price and equity volatility have had, and may continue to have in the future, a significant impact on the value of this warrant. We report this warrant on a quarterly basis at fair value in our consolidated balance sheets, and changes in the fair value of this warrant are recognized in our consolidated statement of income. Fluctuations in Adyen's common stock price and prevailing foreign exchange rate or other changes in assumptions could result in material changes in the fair value that we report in our consolidated balance sheets and our consolidated statement of income, which could have a material impact on our financial results.

As a result of a prior transaction, we own a significant number of Adevinta shares, and fluctuations in Adevinta's share price, financial results and fluctuations in exchange rates could result in material changes in our consolidated balance sheet and our consolidated statement of income. As described more fully under "Note 7 — Investments — Equity Investments," we recorded significant realized and unrealized losses in each of 2022 and 2021 relating to the change in fair value of these shares. In addition, our ability to sell our Adevinta shares in the future will be subject to market conditions and other factors which could impact the value we are able to realize from any such sales.

We could incur significant liability if the Distribution is determined to be a taxable transaction.

We have received an opinion from outside tax counsel to the effect that our distribution of 100% of the outstanding common stock of PayPal to our stockholders on July 17, 2015 (the "Distribution") qualifies as a transaction that is described in Sections 355 and 368(a)(1)(D) of the Internal Revenue Code. The opinion relies on certain facts, assumptions, representations and undertakings from PayPal and us regarding the past and future conduct of the companies' respective businesses and other matters. If any of these facts, assumptions, representations or undertakings are incorrect or not satisfied, our stockholders and we may not be able to rely on the opinion of tax counsel and could be subject to significant tax liabilities. Notwithstanding the opinion of tax counsel we have received, the IRS could determine on audit that the Distribution is taxable if it determines that any of these facts, assumptions, representations or undertakings are not correct or have been violated or if it disagrees with the conclusions in the opinion. If the Distribution is determined to be taxable for U.S. federal income tax purposes, our stockholders that are subject to U.S. federal income tax and we could incur significant U.S. federal income tax liabilities.

We may be exposed to claims and liabilities as a result of the Distribution.

We entered into a separation and distribution agreement and various other agreements with PayPal to govern the Distribution and the relationship of the two companies. These agreements provide for specific indemnity and liability obligations and could lead to disputes between us and PayPal. The indemnity rights we have against PayPal under the agreements may not be sufficient to protect us. In addition, our indemnity obligations to PayPal may be significant and these risks could negatively affect our results of operations and financial condition.

ITEM 1B: UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2: PROPERTIES

We own and lease various properties in the U.S. and 22 other countries around the world. We use the properties for executive and administrative offices, data centers, product development offices and customer service offices. Our headquarters are located in San Jose, California and occupies approximately 0.5 million square feet. Our owned data centers are solely located in Utah. The following table presents the aggregate square footage of our owned and leased properties for our continuing operations as of December 31, 2022 (in millions):

	United States	Other Countries	Total
Owned facilities	1.3	—	1.3
Leased facilities	1.0	0.9	1.9
Total facilities	2.3	0.9	3.2

From time to time we consider various alternatives related to our long-term facilities needs. While we believe that our existing facilities are adequate to meet our immediate needs, it may become necessary to develop and improve land that we own or lease or acquire additional or alternative space to accommodate any future growth.

ITEM 3: LEGAL PROCEEDINGS

This information is set forth under “Note 13 — Commitments and Contingencies — Litigation and Other Legal Matters” to the consolidated financial statements included in Part IV, Item 15 of this Annual Report on Form 10-K is incorporated herein by reference.

ITEM 4: MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5: MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Common Stock

Our common stock has been traded on The Nasdaq Global Select Market under the symbol "EBAY" since September 24, 1998. As of February 21, 2023, there were approximately 3,180 holders of record of our common stock, although we believe that there are a significantly larger number of beneficial owners of our common stock.

Dividend Policy

The company paid a total of \$489 million and \$466 million in cash dividends during the years ended December 31, 2022 and December 31, 2021, respectively. In February 2023, we declared a quarterly cash dividend of \$0.25 per share of common stock to be paid on March 24, 2023 to stockholders of record as of March 10, 2023. The timing, declaration, amount and payment of any future cash dividends are at the discretion of the Board of Directors and will depend on many factors, including our available cash, working capital, financial condition, results of operations, capital requirements, covenants in our credit agreement, applicable law and other business considerations that our Board of Directors considers relevant.

Performance Measurement Comparison

The graph below shows the cumulative total stockholder return of an investment of \$100 (and the reinvestment of any dividends thereafter) on December 31, 2017 (the last trading day for the year ended December 31, 2017) in (i) our common stock, (ii) the Nasdaq Composite Index, (iii) the S&P 500 Index and (iv) the S&P 500 Information Technology Index.

Our stock price performance shown in the graph below is not indicative of future stock price performance. The graph and related information shall not be deemed "soliciting material" or be deemed to be "filed" with the SEC, nor shall such information be incorporated by reference into any past or future filing with the SEC, except to the extent that such filing specifically states that such graph and related information are incorporated by reference into such filing.

Purchases of Equity Securities by the Issuer and Affiliated Purchasers

The following table presents stock repurchase activity during the three months ended December 31, 2022:

Period Ended	Total Number of Shares Purchased	Average Price Paid per Share ⁽²⁾	Total Number of Shares Purchased as Part of Publicly Announced Programs	Maximum Dollar Value that May Yet be Purchased Under the Programs ⁽¹⁾
October 31, 2022	2,626,397	\$ 38.35	2,626,397	\$ 3,047,695,793
November 30, 2022	2,153,284	\$ 45.27		
	488,573	\$ 39.47	488,573	\$ 2,930,931,584
December 31, 2022	1,884,265	\$ 43.98		\$ 2,848,055,977
	<u>7,152,519</u>		<u>3,114,970</u>	

(1) In February 2022 our Board authorized an additional \$4.0 billion stock repurchase program. These stock repurchase programs have no expiration from the date of authorization.

Our stock repurchase programs are intended to programmatically offset the impact of dilution from our equity compensation programs and, subject to market conditions and other factors, to make opportunistic and programmatic repurchases of our common stock to reduce our outstanding share count. Any share repurchases under our stock repurchase programs may be made through open market transactions, block trades, privately negotiated transactions (including accelerated share repurchase transactions) or other means at times and in such amounts as management deems appropriate and will be funded from our working capital or other financing alternatives.

During the three months ended December 31, 2022 we repurchased approximately \$0.3 billion of our common stock under our stock repurchase programs. As of December 31, 2022, a total of approximately \$2.8 billion remained available for future repurchases of our common stock under our stock repurchase program.

We expect, subject to market conditions and other uncertainties, to continue making opportunistic and programmatic repurchases of our common stock. However, our stock repurchase programs may be limited or terminated at any time without prior notice. The timing and actual number of shares repurchased will depend on a variety of factors, including corporate and regulatory requirements, price and other market conditions and management's determination as to the appropriate use of our

(2) Excludes broker commissions.

ITEM 6: [RESERVED]

ITEM 7: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, including statements that involve expectations, plans or intentions (such as those relating to future business, future results of operations or financial condition, including with respect to the ongoing effects of COVID-19, inflationary pressure, foreign exchange rate volatility and geopolitical events, such as the ongoing war in Ukraine, new or planned features or services, or management strategies). You can generally identify these forward-looking statements by words such as "may," "will," "would," "should," "could," "expect," "anticipate," "believe," "estimate," "intend," "plan" and other similar expressions. These forward-looking statements involve risks and uncertainties that could cause our actual results to differ materially from those expressed or implied in our forward-looking statements. Such risks and uncertainties include, among others, those discussed in "Item 1A: Risk Factors" of this Annual Report on Form 10-K, as well as in our consolidated financial statements, related notes, and the other information appearing elsewhere in this report and our other filings with the Securities and Exchange Commission. We do not intend, and undertake no obligation, to update any of our forward-looking statements after the date of this report to reflect actual results or future events or circumstances. Given these risks and uncertainties, readers are cautioned not to place undue reliance on such forward-looking statements. You should read the following Management's Discussion and Analysis of Financial Condition and Results of Operations in conjunction with the consolidated financial statements and the related notes included in this report. This section of this Form 10-K generally discusses 2022 and 2021 items and year-to-year comparisons between 2022 and 2021. Discussions of 2020 items and year-to-year comparisons between 2021 and 2020 are not included in this Form 10-K, and can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2021.

OVERVIEW

Business

eBay Inc., is a global commerce leader, which includes our Marketplace platforms. Founded in 1995 in San Jose, California, eBay is one of the world's largest and most vibrant marketplaces for discovering great value and unique selection. Collectively, we connect millions of buyers and sellers around the world, empowering people and creating opportunity. Our technologies and services are designed to provide buyers choice and a breadth of relevant inventory and to enable sellers worldwide to organize and offer their inventory for sale, virtually anytime and anywhere. In 2022, we focused on our strategic playbook — to understand the customer and their needs; build experiences they will love, at scale; and tell our story in new and different ways.

In 2020 and extending into 2021, there were changes in consumer behavior that resulted in more online shopping driven by the outbreak of a coronavirus and its variants ("COVID-19"). Our Marketplace platforms experienced elevated traffic as well as the acquisition of buyers and small sellers due to the impacts of measures taken globally to contain the spread of COVID-19, which were unprecedented and are not expected to recur. In 2022, we also experienced reduced traffic in most markets resulting from geopolitical events, inflationary pressure, foreign exchange rate volatility and lower consumer confidence. These factors negatively impacted discretionary consumer spending, are uncertain in duration and we expect them to continue into 2023.

In 2021, we completed the transfer of our Classifieds business to Adevinata ASA ("Adevinta"), and subsequently completed the sale of 80.01% of the outstanding equity interests of eBay Korea LLC, a limited liability company incorporated under the laws of Korea and a wholly owned subsidiary of eBay KTA ("eBay Korea") to E-mart Inc. and one of its wholly owned subsidiaries (together, "Emart"). The results of our eBay Korea and Classifieds businesses have been presented as discontinued operations in our consolidated statement of income for all periods presented through the respective transaction close dates as the transactions represented a strategic shift in our business that had a major effect on our operations and financial results.

See "Note 4 — Discontinued Operations" in our consolidated financial statements included elsewhere in this report for additional information.

Presentation

In addition to the corresponding measures under generally accepted accounting principles ("GAAP"), management uses non-GAAP measures in reviewing our financial results. The foreign exchange neutral ("FX-Neutral"), or constant currency, net revenue amounts discussed below are non-GAAP financial measures and are not in accordance with, or an alternative to, measures prepared in accordance with GAAP. Accordingly, the FX-Neutral information appearing in the following discussion of our results of operations should be read in conjunction with the information provided below in "*Non-GAAP Measures of Financial Performance*," which includes reconciliations of FX-Neutral financial measures to the most directly comparable GAAP measures. We calculate the year-over-year impact of foreign currency movements using prior period foreign currency rates applied to current year transactional currency amounts.

Fiscal Year Highlights

Net revenues decreased 6% to \$9.8 billion primarily due to a decline in traffic resulting from the normalization of consumer behavior during 2022 compared to the elevated traffic experienced on our Marketplace platforms from the impact of COVID-19 during 2021. Net revenues were also impacted by reduced traffic in most markets resulting from geopolitical and inflationary pressure during 2022 compared to 2021. In addition, net revenues were impacted by a stronger U.S. dollar in 2022 as FX-Neutral net revenues (as defined above) decreased only 4% compared to 2021. Operating margin decreased to 24.0% in 2022 compared to 28.1% in 2021.

We generated cash flow from continuing operating activities of \$2.6 billion in 2022 compared to \$3.1 billion in 2021, ending the year with cash, cash equivalents and non-equity investments of \$5.9 billion.

In 2022, we received cash proceeds of \$1.1 billion in the aggregate from the sales of shares in Adevinta, Adyen and KakaoBank. We recorded realized losses on the change in fair value of shares sold of \$216 million in the aggregate in gain (loss) on equity investments and warrant, net on our consolidated statement of income for 2022.

In 2022, we repurchased \$3.1 billion of common stock and paid \$489 million in cash dividends.

In 2022, we repaid debt of \$1.4 billion consisting of the 2.600% and 3.800% senior notes.

In October 2022, we completed the acquisition of TCGplayer for \$228 million. TCGplayer is a trusted marketplace offering more selection for collectible card game enthusiasts.

In November 2022, we issued senior notes of \$1.2 billion aggregate principal amount, which consisted of \$425 million of 5.900% fixed rate notes due 2025, \$300 million of 5.950% fixed rate notes due to 2027 and \$425 million of 6.300% fixed rate notes due 2032.

In January 2023, we repaid debt of \$1.2 billion consisting of the floating rate and 2.750% senior notes.

In February 2023, we declared a quarterly cash dividend of \$0.25 per share of common stock to be paid on March 24, 2023 to stockholders of record as of March 10, 2023.

RESULTS OF OPERATIONS

We have one reportable segment to reflect the way management and our chief operating decision maker (“CODM”) review and assess performance of the business. Our reportable segment is Marketplace, which includes our online marketplace located at www.ebay.com, its localized counterparts and the eBay suite of mobile apps. The accounting policies of our segment are the same as those described in “Note 1 — The Company and Summary of Significant Accounting Policies” in our consolidated financial statements included elsewhere in this report.

Net Revenues

Beginning in the fourth quarter of 2022, we present revenues generated from our Marketplace GMV and from non-GMV based businesses as “Net revenues” in order to more closely align our presentation of net revenues with how our business is operated. We formerly presented such amounts as “Net transaction revenues” and “Marketing services and other (MS&O) revenues,” and those line items for such prior periods have been conformed to current period presentation. Consolidated net revenues are unchanged.

Net revenues primarily include final value fees and feature fees, which include fees to promote listings and listing fees from sellers on our platforms. Our net revenues also include store subscription and other fees often from large enterprise sellers as well as revenues from the sale of advertisements and revenue sharing arrangements. Our net revenues are reduced by incentives, including discounts, coupons and rewards, provided to our customers.

The following table presents net revenues for the periods indicated (in millions, except percentages):

	Year Ended December 31,				
	2022	% Change	2021	% Change	2020
Net revenues	\$ 9,795	(6)%	\$ 10,420	17 %	\$ 8,894

Seasonality

We expect transaction activity patterns on our platforms to trend with general consumer buying patterns and expect that these trends will continue. As we introduce new products and platforms, such as managed payments which was completed by the end of 2021, we expect net revenues to fluctuate. In addition, macroeconomic conditions, including the impact of COVID-19, disrupted seasonal patterns in net revenues, particularly in the second quarter of 2020 and in the first quarter of 2021. The following table presents our total net revenues and the sequential quarterly movements of these net revenues for the periods indicated (in millions, except percentages):

	Quarter Ended			
	March 31	June 30	September 30	December 31
2020				
Net revenues	\$ 1,821	\$ 2,337	\$ 2,258	\$ 2,478
% change from prior quarter	(4)%	28 %	(3)%	10 %
2021				
Net revenues	\$ 2,638	\$ 2,668	\$ 2,501	\$ 2,613
% change from prior quarter	6 %	1 %	(6)%	4 %
2022				
Net revenues	\$ 2,483	\$ 2,422	\$ 2,380	\$ 2,510
% change from prior quarter	(5)%	(2)%	(2)%	5 %

Net Revenues by Geography

Revenues are attributed to U.S. and international geographies primarily based upon the country in which the seller, platform that displays advertising, other service provider or customer, as the case may be, is located. The following table presents net revenues by geography for the periods indicated (in millions, except percentages):

	Year Ended December 31,				
	2022	% Change	2021	% Change	2020
U.S.	\$ 4,842	(4)%	5,048	22 %	\$ 4,151
% of net revenues	49 %		48 %		47 %
International	4,953	(8)%	5,372	13 %	4,743
% of net revenues	51 %		52 %		53 %
Total net revenues	<u>\$ 9,795</u>	<u>(6)%</u>	<u>\$ 10,420</u>	<u>17 %</u>	<u>\$ 8,894</u>

Our commerce platforms operate globally, resulting in certain revenues that are denominated in foreign currencies, primarily the British pound and euro. The recent appreciation of the U.S. dollar may have a material impact to our financial results, and we have seen and could continue to see elevated foreign currency volatility in the future. Through our hedging programs, we actively monitor foreign currency volatility and attempt to mitigate the risk. As shown in the table above, we generate approximately half of our net revenues internationally. Because of these factors, we are subject to the risks related to doing business in foreign countries as discussed under “Item 1A: Risk Factors” in Part I of this report.

Net revenues included \$140 million of hedging gains during 2022, \$65 million of hedging losses during 2021 and \$15 million of hedging gains during 2020. Foreign currency movements relative to the U.S. dollar had an unfavorable impact of \$320 million on net revenues in 2022 and a favorable impact of \$188 million and \$26 million on net revenues in 2021 and 2020, respectively. The effect of foreign currency exchange rate movements in 2022 compared to 2021 was primarily attributable to the strengthening of the U.S. dollar against the British pound and euro.

Key Operating Metrics

Gross Merchandise Volume (“GMV”) and take rate are significant factors that we believe affect our net revenues.

GMV consists of the total value of all paid transactions between users on our platforms during the applicable period inclusive of shipping fees and taxes. Despite GMV’s divergence from revenue, we still believe that GMV provides a useful measure of the overall volume of paid transactions that flow through our platforms in a given period.

Take rate is defined as net revenues divided by GMV and represents net revenue as a percentage of overall volume on our platforms. We believe that take rate provides a useful measure of our ability to monetize volume through marketplace services on our platforms in a given period. We use take rate to identify key revenue drivers on our marketplace.

The following table presents net revenues, GMV and take rate for the periods indicated (in millions, except percentages):

	Year Ended December 31,		% Change		Year Ended December 31,		% Change	
	2022	2021	As Reported	FX-Neutral	2021	2020	As Reported	FX-Neutral
Net revenues ⁽¹⁾	\$ 9,795	\$ 10,420	(6)%	(4)%	\$ 10,420	\$ 8,894	17 %	15 %
Supplemental data:								
GMV ⁽²⁾	\$ 73,900	\$ 87,365	(15)%	(11)%	\$ 87,365	\$ 87,608	— %	(3)%
Take rate ⁽³⁾	13.25 %	11.93 %	1.32 %		11.93 %	10.15 %	1.78 %	

(1) Marketplace net revenues were net of \$140 million, \$65 million and \$15 million hedging activity during the years ended December 31, 2022, 2021 and 2020 respectively.

(2) GMV has been retrospectively recast to reflect the new definition of GMV announced in December 2021.

(3) Take rate is defined as net revenues divided by GMV, as discussed above.

Net revenues and GMV decreased across major categories primarily due to a decline in traffic resulting from the normalization of consumer behavior during 2022 compared to the elevated traffic experienced on our Marketplace platforms from the impact of COVID-19 during 2021. Net revenues were also impacted by reduced traffic in most markets resulting from geopolitical events, inflationary pressure, foreign exchange volatility and lower consumer confidence, which negatively impacted discretionary consumer spending during 2022 compared to 2021. The decrease in net revenues was partially offset by a higher take rate during 2022 compared to 2021 as a result of revenue initiatives such as global payments and promoted listings.

Net revenues decreased at a lower rate than GMV during 2022 compared to 2021 primarily due to the benefit of a higher take rate during the same periods, as discussed above. We expect the divergence between net revenues and GMV to continue to a lesser extent into 2023. Despite GMV's divergence from net revenues, we still believe the metric provides a useful measure of overall volume of paid transactions that flow through the platform in a given period.

Cost of Net Revenues

Cost of net revenues represents costs associated with customer support, site operations and payment processing. Significant components of these costs primarily consist of employee compensation including stock-based compensation, contractor costs, facilities costs, depreciation of equipment and amortization expense, bank transaction fees, credit card interchange and assessment fees, authentication costs and digital services tax. The following table presents cost of net revenues for the periods indicated (in millions, except percentages):

	Year Ended December 31,				
	2022	% Change	2021	% Change	2020
Cost of net revenues	\$ 2,680	1 %	\$ 2,650	47 %	\$ 1,797
% of net revenues	27 %		25 %		20 %

Cost of net revenues, net of immaterial hedging activities, was favorably impacted by \$113 million attributable to foreign currency movements relative to the U.S. dollar in 2022 compared to 2021. The increase in cost of net revenues in 2022 compared to 2021 was primarily due to higher payment processing costs incurred for managed payments, partially offset by the favorable impact of foreign currency movements described above.

Operating Expenses

The following table presents operating expenses for the periods indicated (in millions, except percentages):

	Year Ended December 31,				
	2022	% Change	2021	% Change	2020
Sales and marketing	\$ 2,136	(2)%	\$ 2,170	4 %	\$ 2,091
% of net revenues	22 %		21 %		24 %
Product development	1,330	0 %	1,325	29 %	1,028
% of net revenues	14 %		13 %		12 %
General and administrative	963	5 %	921	(6)%	985
% of net revenues	10 %		9 %		11 %
Provision for transaction losses	332	(21)%	422	28 %	330
% of net revenues	3 %		4 %		4 %
Amortization of acquired intangible assets	4	(56)%	9	(67)%	27
Total operating expenses	<u>\$ 4,765</u>	<u>(2)%</u>	<u>\$ 4,847</u>	<u>9 %</u>	<u>\$ 4,461</u>

Foreign currency movements relative to the U.S. dollar had a favorable impact of \$274 million on operating expenses in 2022 compared to 2021. There was no hedging activity within operating expenses.

Sales and Marketing

Sales and marketing expenses primarily consist of advertising and marketing program costs (both online and offline), employee compensation including stock-based compensation, certain user coupons and rewards, contractor costs, facilities costs and depreciation on equipment. Online marketing expenses represent traffic acquisition costs in various channels such as paid search, affiliates marketing and display advertising. Offline advertising primarily includes brand campaigns and buyer/seller communications.

The decrease in sales and marketing expenses in 2022 compared to 2021 was primarily due to the favorable impact of foreign currency movements of \$180 million and a decrease in certain user coupons and rewards of \$27 million, partially offset by an increase in online and offline advertising expense of \$178 million.

Product Development

Product development expenses primarily consist of employee compensation including stock-based compensation, contractor costs, facilities costs and depreciation on equipment. Product development expenses are net of required capitalization of major platform and other product development efforts, including the development and maintenance of our technology platform. Our top technology priorities include payment intermediation capabilities, products to grow the seller tools ecosystem and product experiences that delight our customers and enhance the buying experience for our enthusiasts.

Product development expenses were flat in 2022 compared to 2021 primarily due to an increase in employee related costs of \$36 million offset by the favorable impact of foreign currency movements of \$31 million.

Capitalized internal use and platform development costs were \$130 million and \$127 million in 2022 and 2021, respectively. These costs are primarily reflected as a cost of net revenues when amortized in future periods.

General and Administrative

General and administrative expenses primarily consist of employee compensation including stock-based compensation, contractor costs, facilities costs, depreciation of equipment, employer payroll taxes on stock-based compensation, legal expenses, restructuring, insurance premiums and professional fees. Our legal expenses, including those related to various ongoing legal proceedings, may fluctuate substantially from period to period.

The decrease in general and administrative expenses in 2022 compared to 2021 was primarily due to the favorable impact of foreign currency movements of \$42 million and restructuring costs of \$33 million that did not occur in 2022, partially offset by a charge relating to legal contingencies of \$50 million, charitable contributions of \$35 million, one-time transaction support costs of \$20 million and exit costs of \$13 million related to the announcement to close our marketplace in Turkey.

Provision for Transaction Losses

Provision for transaction losses primarily consists of transaction loss expense associated with our buyer protection programs, losses from our managed payments services, fraud and bad debt expense associated with our accounts receivable balance. We expect our provision for transaction losses to fluctuate depending on many factors, including changes to our protection programs and the impact of regulatory changes.

The decrease in provision for transaction losses in 2022 compared to the same period in 2021 was primarily due to lower bad debt expense and losses as a result of fees collected through the managed payments platform of \$52 million, the favorable impact of foreign currency movements of \$21 million and lower customer protection program costs of \$16 million.

Gain (Loss) on Equity Investments and Warrant, Net

Gain (loss) on equity investments and warrant, net primarily consists of gains and losses related to our various types of equity investments, including our equity investments in Adevinta, KakaoBank and Gmarket, and gains and losses due to changes in fair value of the warrant received from Adyen. The following table presents gain (loss) on equity investments and warrant, net for the periods indicated (in millions, except percentages):

	Year Ended December 31,					
	2022	% Change	2021	% Change	2020	
Unrealized change in fair value of equity investment in Adevinta	\$ (2,693)	(12)%	\$ (3,070)	**	\$ —	—
Unrealized change in fair value of equity investment in Adyen	(118)	**	(10)	**	—	—
Unrealized change in fair value of equity investment in Gmarket	(294)	**	(3)	**	—	—
Unrealized change in fair value of equity investment in KakaoBank	(218)	(154)%	403	69 %	239	239
Change in fair value of warrant	(230)	(165)%	354	(54)%	770	770
Realized change in fair value of shares sold in Adevinta ⁽¹⁾	2	(78)%	9	**	—	—
Realized change in fair value of shares sold in Adyen	(143)	**	—	**	—	—
Realized change in fair value of shares sold in KakaoBank	(75)	(190)%	83	**	—	—
Impairment of equity investment in Paytm Mall	—	**	(160)	**	—	—
Gain (loss) on other investments ⁽²⁾	(17)	(159)%	29	**	(2)	(2)
Total gain (loss) on equity investments and warrant, net	\$ (3,786)	**	\$ (2,365)	**	\$ 1,007	1,007

(1) Gain (loss) on sale of shares in Adevinta included: (i) in 2022, a \$2 million gain on the change in fair value of shares sold; (ii) in 2021, an \$88 million gain recognized on the sale of the shares offset by a \$79 million loss on the change in fair value of the shares sold.

(2) Gain (loss) on other investments primarily included: (i) in 2022, primarily downward adjustments of \$13 million recorded on equity investments under the fair value option and \$7 million recorded on equity investments without readily determinable fair values; (ii) in 2021, primarily a \$41 million upward adjustment and a \$10 million impairment recorded on equity investments without readily determinable fair values; (iii) in 2020, primarily a \$40 million impairment recorded on an investment and a \$37 million gain for the receipt of proceeds that were held in escrow related to a long-term investment that was sold in 2018.

** Not meaningful

The increase in total losses on equity method investments and warrant, net in 2022 compared to 2021 was primarily driven by a \$158 million and \$621 million increase in realized and unrealized losses, respectively, recorded related to the change in fair value of our equity investment in KakaoBank, a \$584 million increase in the loss recorded related to the change in fair value of the Adyen warrant, and a \$291 million increase in the loss recorded related to the change in fair value of our equity investment in Gmarket, partially offset by a \$377 million decrease in the unrealized loss recorded related to the change in fair value of our equity investment in Adevinta.

Interest and Other, Net

Interest and other, net primarily consists of interest earned on cash, cash equivalents and available-for-sale investments, as well as foreign exchange transaction gains and losses and interest expense, consisting of interest charges on any amounts borrowed and commitment fees on unborrowed amounts under our credit agreement and interest expense on our outstanding debt securities and commercial paper, if any. The following table presents interest and other, net for the periods indicated (in millions, except percentages):

	Year Ended December 31,				
	2022	% Change	2021	% Change	2020
Interest income	\$ 73	284 %	\$ 19	(50)%	\$ 38
Interest expense	(235)	(13)%	(269)	(12)%	(304)
Foreign exchange and other	(3)	(103)%	90	**	(32)
Total interest and other, net	<u>\$ (165)</u>	<u>3 %</u>	<u>\$ (160)</u>	<u>(46)%</u>	<u>\$ (298)</u>

** Not meaningful

Interest income increased in 2022 compared to 2021 due to higher yields on corporate debt and government agency securities in a higher interest rate environment. We expect this trend to continue into 2023.

Interest expense decreased in 2022 compared to 2021, primarily due to a higher average notional on outstanding debt during 2021 to fund early 2022 maturities. In 2022, we repaid two tranches of senior notes at substantially lower interest rates than the senior notes that were issued during the year. As a result, we expect continued upward pressure on interest expense to continue into 2023.

Foreign exchange and other decreased in 2022 compared to 2021, primarily due to a gain on a foreign exchange rate hedging program in 2021 that did not recur in 2022.

Income Tax Provision

The following table presents provision for income taxes for the periods indicated (in millions, except percentages):

	Year Ended December 31,		
	2022	2021	2020
Income tax provision (benefit)	\$ (327)	\$ 146	\$ 858
Effective tax rate	20.4 %	36.6 %	25.6 %

The decrease in our effective tax rate in 2022 compared to 2021 was primarily due to the decrease in proportion of non-deductible losses on investments to total income (loss) from continuing operations before taxes, partially offset by a benefit from the release of a valuation allowance in 2021. The effective tax rate in 2020 included the effects of a retroactive California law change including incremental taxes on the gain on the sale of StubHub, partially offset by an increased tax benefit from stock-based compensation.

We are regularly under examination by tax authorities both domestically and internationally. We believe that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations, although we cannot assure you that this will be the case given the inherent uncertainties in these examinations. Due to the ongoing tax examinations, it is generally impractical to determine the amount and timing of these adjustments. However, we expect several tax examinations to close within the next twelve months. See "Note 16 — Income Taxes" to the consolidated financial statements included in this report for more information on estimated settlements within the next twelve months.

Discontinued Operations

In 2021, we completed the transfer of our Classifieds business to Adevinta ASA ("Adevinta"), and subsequently completed the sale of 80.01% of the outstanding equity interests of eBay Korea LLC, a limited liability

company incorporated under the laws of Korea and a wholly owned subsidiary of eBay KTA (“eBay Korea”) to E-mart Inc. and one of its wholly owned subsidiaries (together, “E-mart”). The results of our eBay Korea and Classifieds businesses have been presented as discontinued operations in our consolidated statement of income for all periods presented through the respective transaction close dates as the transactions represented a strategic shift in our business that had a major effect on our operations and financial results.

See “Note 4 — Discontinued Operations” in our consolidated financial statements included elsewhere in this report for additional information.

Non-GAAP Measures of Financial Performance

To supplement our consolidated financial statements presented in accordance with generally accepted accounting principles, we use FX-Neutral net revenues, which are non-GAAP financial measures. Management uses the foregoing non-GAAP measures in reviewing our financial results. We define FX-Neutral net revenues as net revenues minus the exchange rate effect. We define exchange rate effect as the year-over-year impact of foreign currency movements using prior period foreign currency rates applied to current year transactional currency amounts, excluding hedging activity.

These non-GAAP measures are not in accordance with, or an alternative to, measures prepared in accordance with GAAP and may be different from non-GAAP measures used by other companies. In addition, these non-GAAP measures are not based on any comprehensive set of accounting rules or principles. Non-GAAP measures have limitations in that they do not reflect all of the amounts associated with our results of operations as determined in accordance with GAAP. These measures should only be used to evaluate our results of operations in conjunction with the corresponding GAAP measures.

These non-GAAP measures are provided to enhance investors’ overall understanding of our current financial performance and its prospects for the future. Specifically, we believe these non-GAAP measures provide useful information to both management and investors by excluding the foreign currency exchange rate impact that may not be indicative of our core operating results and business outlook. In addition, because we have historically reported certain non-GAAP results to investors, we believe that the inclusion of these non-GAAP measures provide consistency in our financial reporting.

The following tables present a reconciliation of FX-Neutral GMV and FX-Neutral net revenues (each as defined below) to our reported GMV and net revenues for the periods indicated (in millions, except percentages):

	Year Ended Year Ended December 31,					
	2022			2021		
	As Reported	Exchange Rate Effect ⁽¹⁾⁽³⁾	FX-Neutral ⁽²⁾	As Reported ⁽⁴⁾	As Reported	FX-Neutral
GMV	\$ 73,900	\$ (3,840)	\$ 77,740	\$ 87,365	(15)%	(11)%
Net Revenues	\$ 9,795	\$ (320)	\$ 10,115	\$ 10,420	(6)%	(4)%

	Year Ended Year Ended December 31,					
	2021			2020		
	As Reported	Exchange Rate Effect ⁽¹⁾⁽³⁾	FX-Neutral ⁽²⁾	As Reported ⁽⁴⁾	As Reported	FX-Neutral
GMV	\$ 87,365	\$ 2,362	\$ 85,003	\$ 87,608	— %	(3)%
Net Revenues	\$ 10,420	\$ 188	\$ 10,232	\$ 8,894	17 %	15 %

(1) We define exchange rate effect as the year-over-year impact of foreign currency movements using prior period foreign currency rates applied to current year transactional currency amounts, excluding hedging activity.

(2) We define FX-Neutral GMV as GMV minus the exchange rate effect. We define the non-GAAP financial measures of FX-Neutral net revenues as net revenues minus the exchange rate effect.

(3) Net revenues were net of \$140 million, \$65 million and \$15 million of hedging activity in 2022, 2021 and 2020, respectively.

(4) GMV for 2021 and 2020 has been retrospectively recast to reflect the new definition of GMV announced in December 2021.

Liquidity and Capital Resources

Cash Flows

	Year Ended December 31,		
	2022	2021	2020
	(In millions)		
Net cash provided by (used in):			
Continuing operating activities	\$ 2,627	\$ 3,093	\$ 3,004
Continuing investing activities	2,459	(1,417)	(179)
Continuing financing activities	(3,792)	(6,557)	(5,680)
Effect of exchange rates on cash, cash equivalents and restricted cash	(57)	24	77
Net increase in cash, cash equivalents and restricted cash - discontinued operations	(371)	4,669	3,376
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ 866	\$ (188)	\$ 598

Continuing Operating Activities

Our operating cash flows arise primarily from cash received from our customers on our platforms offset by cash payments for sales and marketing, employee compensation and payment processing expenses.

Cash provided by continuing operating activities of \$2.6 billion in 2022 compared to \$3.1 billion in 2021 was primarily attributable to a decrease in operating income from continuing operations of \$573 million. The decrease in operating income was driven by a decrease in net revenues during 2022 compared to the elevated traffic from the impact of COVID-19 during the same period in 2021, as noted in our comments on "Net Revenues." The remaining changes in continuing operating cash flows are attributable to working capital movements and changes in non-cash items.

Continuing Investing Activities

Cash provided by continuing investing activities of \$2.5 billion in 2022 was primarily attributable to proceeds of \$20.6 billion from the maturities and sales of investments and proceeds of \$1.1 billion in the aggregate from the sales of shares in Adevinta, Adyen and KakaoBank, partially offset by cash paid for investments of \$18.5 billion, property and equipment of \$449 million and cash paid for the acquisition of TCGplayer of \$208 million.

Cash used in investing activities of \$1.4 billion in 2021 was primarily attributable to purchases of investments of \$22.2 billion and property and equipment of \$444 million. These purchases were partially offset by proceeds of \$18.9 billion from the maturities and sales of investments and \$2.3 billion from the sale of approximately 135 million of our voting shares in Adevinta.

The largely offsetting effects of purchases of investments and maturities and sale of investments results from the management of our investments. As our immediate cash needs change, purchase and sale activity will fluctuate.

Continuing Financing Activities

Cash used in financing activities of \$3.8 billion in 2022 was primarily driven by common stock repurchases of \$3.1 billion, debt repayments of \$1.4 billion, which was comprised of \$750 million related to our 3.800% senior fixed rate notes due 2022 and \$605 million related to our 2.600% senior fixed rate notes due 2022, and \$489 million of cash dividends paid, partially offset by proceeds from debt issuances of \$1.2 billion.

Cash used in financing activities of \$6.6 billion in 2021 was primarily driven by common stock repurchases of \$7.1 billion, of which \$2.5 billion related to repurchases under an accelerated share repurchase program. Cash used in financing activities also included debt repayments of \$1.2 billion, which was comprised of \$750 million related to our 6.000% senior fixed rate notes due 2056 that were redeemed and \$405 million related to our 2.600% senior fixed rate notes due 2022 that were repurchased pursuant to a tender offer, and \$466 million of cash dividends paid, partially offset by proceeds from debt issuances of \$2.5 billion.

The negative and positive effect of exchange rate movements on cash, cash equivalents and restricted cash was due to the strengthening and weakening of the U.S. dollar against other currencies, primarily the British pound and euro, during 2022 and 2021, respectively.

Liquidity and Capital Resource Requirements

As of December 31, 2022 and December 31, 2021, we had assets classified as cash and cash equivalents, as well as short-term and long-term non-equity investments from continuing operations, in an aggregate amount of \$5.9 billion and \$7.3 billion, respectively. We believe that our cash, cash equivalents and short-term and long-term investments, together with cash expected to be generated from operations, borrowings available under our credit agreement and commercial paper program, and our access to capital markets, will be sufficient to satisfy our material cash requirements over the next 12 months and for the foreseeable future.

However, geopolitical and macroeconomic events including the impact of COVID-19, the war in Ukraine, foreign exchange volatility and global economic uncertainty have caused material disruptions in both U.S. and international financial markets and economies and are uncertain in duration. The future impact of these events cannot be predicted with certainty and have increased our borrowing costs and other costs of capital and otherwise adversely affect our business, results of operations, financial condition and liquidity, and we cannot assure that we will have access to external financing at times and on terms we consider acceptable, or at all, or that we will not experience other liquidity issues going forward.

Senior Notes

As of December 31, 2022, we had floating- and fixed-rate senior notes outstanding with varying maturities for an aggregate principal amount of \$8.9 billion, with \$1.2 billion payable within 12 months. Future interest payments associated with the senior notes totaled \$2.6 billion, with \$0.3 billion payable within 12 months. The net proceeds from the issuances of these senior notes are used for general corporate purposes, including, among other things, capital expenditures, share repurchases, repayment of indebtedness and possible acquisitions.

During 2022, we redeemed the \$1.4 billion aggregate principal amount of the 2.600% and 3.800% senior notes due 2022. Total cash consideration paid was \$1.4 billion, as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

In November 2022, we issued senior notes of \$1.2 billion aggregate principal amount, which consisted of \$425 million of 5.900% fixed rate notes due 2025, \$300 million of 5.950% fixed rate notes due to 2027 and \$425 million of 6.300% fixed rate notes due 2032.

In January 2023, we redeemed the \$1.2 billion aggregate principal amount of the floating rate and 2.750% senior notes due 2023. Total cash consideration paid was \$1.2 billion, as the redemption price was equal to 100% of the principal amount.

Commercial Paper

We have a commercial paper program pursuant to which we may issue commercial paper notes in an aggregate principal amount at maturity of up to \$1.5 billion outstanding at any time with maturities of up to 397 days from the date of issue. As of December 31, 2022, there were no commercial paper notes outstanding.

Credit Agreement

In March 2020, we entered into a credit agreement that provides for an unsecured \$2 billion five-year credit facility. We may also, subject to the agreement of the applicable lenders, increase commitments under the revolving credit facility by up to \$1 billion. Funds borrowed under the credit agreement may be used for working capital, capital expenditures, acquisitions and other general corporate purposes. As of December 31, 2022, no borrowings were outstanding under our \$2 billion credit agreement.

Credit Ratings

As of December 31, 2022, we were rated investment grade by Standard and Poor's Financial Services, LLC (long-term rated BBB+, short-term rated A-2, with a stable outlook) and Moody's Investor Service (long-term rated Baa1, short-term rated P-2, with a stable outlook). We disclose these ratings to enhance the understanding of our sources of liquidity and the effects of our ratings on our costs of funds. Our borrowing costs depend, in part, on our credit ratings and any actions taken by these credit rating agencies to lower our credit ratings will likely increase our borrowing costs.

We were in compliance with all financial covenants in our outstanding debt instruments for the period ended December 31, 2022. For additional details related to our debt, please see "Note 11 — Debt" to the consolidated financial statements included in this report.

Leases

We have operating leases for office space, data centers, as well as other corporate assets that we utilize under lease arrangements. As of December 31, 2022, we had fixed lease payment obligations of \$695 million, with \$149 million payable within 12 months. For additional details related to our leases, please see "Note 12 — Leases" to the consolidated financial statements included in this report.

Purchase Obligations

Purchase obligation amounts include minimum purchase commitments for advertising, capital expenditures (computer equipment, software applications, engineering development services, construction contracts) and other goods and services entered into in the ordinary course of business. As of December 31, 2022, we had purchase obligations of \$164 million, with \$117 million payable within 12 months.

Income Taxes

We are unable to reasonably predict the timing of settlement of liabilities related to unrecognized tax benefits of \$331 million included in other liabilities on our consolidated balance sheet as of December 31, 2022. The timing of the resolution and/or closure of audits is highly uncertain, and it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining subject to examination and the number of matters being examined, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

As of December 31, 2022, our assets classified as cash and cash equivalents, and short-term and long-term non-equity investments from continuing operations included assets held in certain of our foreign operations totaling approximately \$2.1 billion. As we repatriate these funds to the U.S., we will be required to pay income taxes in certain U.S. states and applicable foreign withholding taxes on those amounts during the period when such repatriation occurs. We have accrued deferred taxes for the tax effect of repatriating the funds to the U.S.

See "Note 16 — Income Taxes" to the consolidated financial statements included in this report for more information on unrecognized tax benefits and deferred taxes.

Stock Repurchases

Our stock repurchase programs are intended to programmatically offset the impact of dilution from our equity compensation programs and, subject to market conditions and other factors, to make opportunistic and programmatic repurchases of our common stock to reduce our outstanding share count. Any share repurchases under our stock repurchase programs will be funded from our working capital or other financing alternatives.

We expect, subject to market conditions and other uncertainties, to continue making opportunistic and programmatic repurchases of our common stock. However, our stock repurchase programs may be limited or terminated at any time without prior notice. The timing and actual number of shares repurchased will depend on a variety of factors, including corporate and regulatory requirements, price and other market conditions and management's determination as to the appropriate use of our cash.

During 2022, we repurchased approximately \$3.1 billion of our common stock under our stock repurchase programs. In February 2022 our Board authorized an additional \$4.0 billion stock repurchase program, with no expiration from the date of authorization. As of December 31, 2022, a total of approximately \$2.8 billion remained available for future repurchases of our common stock under our stock repurchase programs. See “Note 14 — Stockholders’ Equity” to the consolidated financial statements included in this report for more information about our stock repurchase programs.

Dividends

The company paid a total of \$489 million and \$466 million in cash dividends in 2022 and 2021, respectively. In February 2023, we declared a quarterly cash dividend of \$0.25 per share of common stock to be paid on March 24, 2023 to stockholders of record as of March 10, 2023.

Other Capital Resource Requirements

We actively monitor all counterparties that hold our cash and cash equivalents and non-equity investments, focusing primarily on the safety of principal and secondarily on improving yield on these assets. We diversify our cash and cash equivalents and investments among various counterparties in order to reduce our exposure should any one of these counterparties fail or encounter difficulties. To date, we have not experienced any material loss or lack of access to our invested cash, cash equivalents or short-term investments; however, we can provide no assurances that access to our invested cash, cash equivalents or short-term investments will not be impacted by adverse conditions in the financial markets, including, without limitation, as a result of the impact of geopolitical events, inflationary pressure, lower consumer spending and foreign exchange rate volatility. At any point in time we have funds in our operating accounts and customer accounts that are deposited and invested with third party financial institutions.

We have a cash pooling arrangement with a financial institution for cash management purposes. As of December 31, 2022, we had a total of \$246 million in aggregate cash deposits, partially offset by \$32 million in cash withdrawals, held within the financial institution under the cash pooling arrangement. See “Note 13 — Commitments and Contingencies” to the consolidated financial statements included in this report for more information about our cash pooling arrangement.

We have entered into various indemnification agreements and, in the ordinary course of business, we have included limited indemnification provisions in certain of our agreements with parties with which we have commercial relations. It is not possible to determine the maximum potential loss under these various indemnification provisions due to our limited history of prior indemnification claims and the unique facts and circumstances involved in each particular provision. To date, losses recorded in our consolidated statement of income in connection with our indemnification provisions have not been significant, either individually or collectively. See “Note 13 — Commitments and Contingencies” to the consolidated financial statements included in this report for more information about our indemnification provisions.

Critical Accounting Policies, Judgments and Estimates

General

The preparation of our consolidated financial statements and related notes requires us to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. We have based our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Our senior management has discussed the development, selection and disclosure of these estimates with the Audit Committee of our Board of Directors. Actual results may differ from these estimates under different assumptions or conditions.

An accounting policy is considered to be critical if it requires an accounting estimate to be made based on assumptions about matters that are highly uncertain at the time the estimate is made, and if different estimates that reasonably could have been used, or changes in the accounting estimates that are reasonably likely to occur periodically, could materially impact the consolidated financial statements. We believe the following critical accounting policies reflect the more significant estimates and assumptions used in the preparation of our consolidated financial statements. The following descriptions of critical accounting policies, judgments and estimates should be read in conjunction with our consolidated financial statements and related notes and other disclosures included in this report.

Revenue Recognition

We may enter into certain revenue contracts that include promises to transfer multiple goods or services including discounts on future services. We also may enter into arrangements to purchase services from certain customers. As a result, significant interpretation and judgment is sometimes required to determine the appropriate accounting for these transactions including: (1) whether services are considered distinct performance obligations that should be accounted for separately or combined; (2) developing an estimate of the stand-alone selling price of each distinct performance obligation; (3) whether revenue should be reported gross (as eBay is acting as a principal), or net (as eBay is acting as an agent); (4) evaluating whether a promotion or incentive is a payment to a customer; and (5) whether the arrangement would be characterized as revenue or reimbursement of costs incurred. Changes in judgments with respect to these assumptions and estimates could impact the timing or amount of revenue recognition.

Income Taxes

Our annual tax rate is based on our income, statutory tax rates and tax planning opportunities available to us in the various jurisdictions in which we operate. Tax laws are complex and subject to different interpretations by the taxpayer and respective government taxing authorities. Significant judgment is required in determining our tax expense and in evaluating our tax positions, including evaluating uncertainties and the complexity of taxes on foreign earnings. We review our tax positions quarterly and adjust the balances as new information becomes available. Tax positions are evaluated for potential reserves for uncertainty based on the estimated probability of sustaining the position under examination. Our income tax rate is affected by the tax rates that apply to our foreign earnings including U.S. minimum taxes on foreign earnings. The deferred tax benefit derived from the amortization of our intellectual property is based on the fair value, which has been agreed with foreign tax authorities. The deferred tax benefit may from time to time change based on changes in tax rates. Management has no specific plans to indefinitely reinvest the undistributed earnings of our foreign subsidiaries at the balance sheet date.

Deferred tax assets represent amounts available to reduce income taxes payable on taxable income in future years. Such assets arise because of temporary differences between the financial reporting and tax bases of assets and liabilities, as well as from net operating loss and tax credit carryforwards. We evaluate the recoverability of these future tax deductions and credits by assessing the adequacy of future expected taxable income from all sources, including reversal of taxable temporary differences, forecasted operating earnings and available tax planning strategies. These sources of income rely heavily on estimates that are based on a number of factors, including our historical experience and short-range and long-range business forecasts. As of December 31, 2022, we had a valuation allowance on certain net operating loss and tax credit carryforwards based on our assessment that it is more likely than not that the deferred tax asset will not be realized.

We recognize and measure uncertain tax positions in accordance with generally accepted accounting principles in the U.S., or GAAP, pursuant to which we only recognize the tax benefit from an uncertain tax position if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement. We report a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return. GAAP further requires that a change in judgment related to the expected ultimate resolution of uncertain tax positions be recognized in earnings in the quarter in which such change occurs. We recognize interest and penalties, if any, related to unrecognized tax benefits in income tax expense.

We file annual income tax returns in multiple taxing jurisdictions around the world. A number of years may elapse before an uncertain tax position is audited by the relevant tax authorities and finally resolved. While it is often difficult to predict the final outcome or the timing of resolution of any particular uncertain tax position, we believe that our reserves for income taxes reflect the most likely outcome. We adjust these reserves, as well as the related interest, where appropriate in light of changing facts and circumstances. Settlement of any particular position could require the use of cash.

The following table presents our effective tax rates for the periods indicated (in millions, except percentages):

	Year Ended December 31,		
	2022	2021	2020
Income tax provision (benefit)	\$ (327)	\$ 146	\$ 858
Effective tax rate	20.4 %	36.6 %	25.6 %

Our future effective tax rates could be adversely affected by earnings being lower than anticipated in countries where we have lower statutory rates and higher than anticipated in countries where we have higher statutory rates, by changes in the valuation of our deferred tax assets or liabilities, or by changes or interpretations in tax laws, regulations or accounting principles. In addition, we are subject to the continuous examination of our income tax returns by the Internal Revenue Service, as well as various state and foreign tax authorities. We regularly assess the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of our provision for income taxes.

Based on our results for the year ended December 31, 2022, a one-percentage point change in our provision for income taxes as a percentage of income before taxes would have resulted in an increase or decrease in the provision of approximately \$16 million, resulting in an approximate \$0.03 change in diluted earnings per share.

Goodwill

The purchase price of an acquired company is allocated between intangible assets and the net tangible assets of the acquired business with the residual of the purchase price recorded as goodwill.

As of December 31, 2022, our goodwill totaled \$4.3 billion. We assess the impairment of goodwill of our reporting unit annually, or more often if events or changes in circumstances indicate that the carrying value may not be recoverable. Goodwill is tested for impairment at the reporting unit level by first performing a qualitative assessment to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. If the reporting unit does not pass the qualitative assessment, then the reporting unit's carrying value is compared to its fair value. The fair values of the reporting units are estimated using market and discounted cash flow approaches. Goodwill is considered impaired if the carrying value of the reporting unit exceeds its fair value. The discounted cash flow approach uses expected future operating results. The market approach uses comparable company information to determine revenue and earnings multiples to value our reporting unit. Failure to achieve these expected results or market multiples may cause a future impairment of goodwill at the reporting unit. We conducted our annual impairment test of goodwill as of August 31, 2022 and 2021. As of December 31, 2022, we determined that no impairment of the carrying value of goodwill was required. See "Note 5 — Goodwill and Intangible Assets" to the consolidated financial statements included in this report.

Legal Contingencies

In connection with certain pending litigation and other claims, we have estimated the range of probable loss, net of expected recoveries, and provided for such losses through charges to our consolidated statement of income. These estimates have been based on our assessment of the facts and circumstances at each balance sheet date and are subject to change based upon new information and future events.

From time to time, we are involved in disputes and regulatory inquiries that arise in the ordinary course of business. We are currently involved in legal proceedings, some of which are discussed in "Item 1A: Risk Factors," "Item 3: Legal Proceedings" and "Note 13 — Commitments and Contingencies" to the consolidated financial statements included in this report. We believe that we have meritorious defenses to the claims against us, and we intend to defend ourselves vigorously. However, even if successful, our defense against certain actions will be costly and could require significant amounts of management's time and result in the diversion of significant operational resources. If the plaintiffs were to prevail on certain claims, we might be forced to pay significant damages and licensing fees, modify our business practices or even be prohibited from conducting a significant part of our business. Any such results could materially harm our business and could result in a material adverse impact on the financial position, results of operations or cash flows.

Recent Accounting Pronouncements

See "Note 1 — The Company and Summary of Significant Accounting Policies" to the consolidated financial statements included in this report, regarding the impact of certain recent accounting pronouncements on our consolidated financial statements.

ITEM 7A: QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK***Interest Rate Risk***

We are exposed to interest rate risk relating to our investments and outstanding debt. In addition, adverse economic conditions and events (including volatility or distress in the equity and/or debt or credit markets) may impact regional and global financial markets. These events and conditions could cause us to write down our assets or investments. We seek to reduce earnings volatility that may result from adverse economic conditions and events or changes in interest rates.

The primary objective of our investment activities is to preserve principal while at the same time improving yields without significantly increasing risk. To achieve this objective, we maintain our cash equivalents and short-term and long-term investments in a variety of asset types, including bank deposits, government bonds and corporate debt securities. As of December 31, 2022, approximately 23% of our total cash and investments was held in cash and cash equivalents. As such, changes in interest rates will impact interest income. As discussed below, the fair market values of our fixed rate securities may be adversely affected due to a rise in interest rates, and we may suffer losses in principal if we are forced to sell securities that have declined in market value due to changes in interest rates.

As of December 31, 2022, the balance of our corporate debt and government bond securities was \$3.7 billion, which represented approximately 40% of our total cash and investments. Investments in both fixed-rate and floating-rate interest-earning instruments carry varying degrees of interest rate risk. The fair market value of our fixed-rate investment securities may be adversely impacted due to a rise in interest rates. In general, fixed-rate securities with longer maturities are subject to greater interest rate risk than those with shorter maturities. While floating rate securities generally are subject to less interest rate risk than fixed-rate securities, floating-rate securities may produce less income than expected if interest rates decrease and may also suffer a decline in market value if interest rates increase. Due in part to these factors, our investment income may fall short of expectations or we may suffer losses in principal if we sell securities that have declined in market value due to changes in interest rates. A hypothetical 1% (100 basis point) increase in interest rates would have resulted in a decrease in the fair value of our investments of \$22 million and \$4 million as of December 31, 2022 and 2021, respectively.

As of December 31, 2022, we had an aggregate principal amount of \$8.9 billion of outstanding senior notes, of which 96% bore interest at fixed rates. During 2020, we began to hedge the variability of the cash flows in interest payments associated with our floating-rate debt using interest rate swaps. These interest rate swap agreements effectively convert our LIBOR-based floating-rate debt to a fixed-rate basis, reducing the impact of interest-rate changes on future interest expense. The total notional amount of these interest swaps was \$400 million as of December 31, 2022 with terms calling for us to receive interest at a variable rate and to pay interest at a fixed rate. Our interest rate swap contracts have maturity dates in 2023. At December 31, 2022, we did not have an unhedged balance on our floating-rate debt. We considered the historical volatility of short-term interest rates and determined that it was reasonably possible that an adverse change of 100 basis points could be experienced in the near term. A hypothetical 1% (100 basis points) decrease in interest rates would have resulted in an immaterial decrease in the fair values of our floating to fixed rate interest swaps at December 31, 2022.

Further changes in interest rates will impact interest expense on any borrowings under our revolving credit facility, which bear interest at floating rates, and the interest rate on any commercial paper borrowings we make and any debt securities we may issue in the future and, accordingly, will impact interest expense. For additional details related to our debt, see "Note 11 — Debt" to the consolidated financial statements included in this report.

Equity Price Risk***Equity Investments***

In 2021, we completed the transfer of our Classifieds business to Adevinta. Upon completion of the transfer we received an equity interest in Adevinta. The equity investment is accounted for under the fair value option and changes in Adevinta's stock price and equity volatility may have a significant impact on the value of our equity investment in Adevinta. As of December 31, 2022, a one dollar change in Adevinta's common stock, holding other factors constant, would increase or decrease the fair value of the investment by approximately \$404 million.

In 2021, KakaoBank completed its initial public offering, which resulted in this investment having a readily determinable fair value. Previously this investment was accounted for as an equity investment without a readily determinable fair value. Valuation of equity investments with readily determinable fair values can be obtained from real time quotes in active markets. Changes in KakaoBank's stock price and equity volatility may have a significant impact on the value of our equity investment in KakaoBank. As of December 31, 2022, a one dollar change in KakaoBank's common stock, holding other factors constant, would increase or decrease the fair value of the investment by approximately \$5 million.

Our remaining equity investments are primarily investments in privately-held companies. Our consolidated results of operations include, as a component of gain (loss) on equity investments and warrant, net, our share of the net income or loss of the equity investments accounted for under the equity method of accounting, or the change in fair value of the equity method investments accounted for under the fair value option. Equity investments without readily determinable fair values are accounted for at cost, less impairment and adjusted for subsequent observable price changes obtained from orderly transactions for identical or similar investments issued by the same investee. Such changes in the basis of the equity investment are recognized in gain (loss) on equity investments and warrant, net. Equity investments under the fair value option are measured at fair value based on a quarterly valuation analysis and are classified within Level 3 in the fair value hierarchy as the valuation reflects management's estimate of assumptions that market participants would use in pricing the equity investment. Subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net.

As of December 31, 2022, our equity investments totaled \$3.4 billion, which represented approximately 36% of our total cash and investments, and primarily related to our equity investment in Adevinia.

For additional details related to our investments, please see "Note 7 — Investments" to our consolidated financial statements included in this report.

Warrant

We entered into a warrant agreement in conjunction with a commercial agreement with Adyen that, subject to meeting certain conditions, entitles us to acquire a fixed number of shares up to 5% of Adyen's fully diluted issued and outstanding share capital at a specific date. As discussed above, in 2021 we met the processing volume milestone target to vest the first tranche of the warrant, and we exercised the option to purchase shares of Adyen. The remaining tranches of the warrant are accounted for as a derivative instrument under ASC Topic 815, *Derivatives and Hedging*. Changes in Adyen's common stock price and equity volatility may have a significant impact on the value of the warrant. As of December 31, 2022, a one dollar change in Adyen's common stock, holding other factors constant, would increase or decrease the fair value of the warrant by \$0.2 million. For additional details related to the warrant, please see "Note 8 — Derivative Instruments" to our consolidated financial statements included in this report.

Foreign Currency Risk

Our commerce platforms operate globally, resulting in certain revenues and costs that are denominated in foreign currencies, primarily the British pound and euro, subjecting us to foreign currency risk, which may adversely impact our financial results. We transact business in various foreign currencies and have significant international revenues as well as costs. In addition, we charge our international subsidiaries for their use of intellectual property and technology and for certain corporate services we provide. Our cash flow and results of operations that are exposed to foreign exchange rate fluctuations may differ materially from expectations and we may record significant gains or losses due to foreign currency fluctuations and related hedging activities.

We have a foreign exchange exposure management program designed to identify material foreign currency exposures, manage these exposures and reduce the potential effects of currency fluctuations on our reported consolidated cash flows and results of operations through the purchase of foreign currency exchange contracts. The effectiveness of the program and resulting usage of foreign exchange derivative contracts is at times limited by our ability to achieve cash flow hedge accounting. For additional details related to our derivative instruments, please see "Note 8 — Derivative Instruments" to our consolidated financial statements included in this report.

We use foreign exchange derivative contracts to help protect our forecasted U.S. dollar-equivalent earnings from adverse changes in foreign currency exchange rates. These hedging contracts reduce, but do not entirely eliminate, the impact of adverse currency exchange rate movements. Most of these contracts are designated as cash flow hedges for accounting purposes. For qualifying cash flow hedges, the derivative's gain or loss is initially reported as a component of accumulated other comprehensive income ("AOCI") and subsequently reclassified into earnings in the same period the forecasted transaction affects earnings. For contracts not designated as cash flow hedges for accounting purposes, the derivative's gain or loss is recognized immediately in earnings in our consolidated statement of income. However, only certain revenue and costs are eligible for cash flow hedge accounting.

The following table illustrates the fair values of outstanding foreign exchange contracts designated as cash flow hedges and the before-tax effect on fair values of a hypothetical adverse change in the foreign exchange rates that existed as of December 31, 2022. The sensitivity for foreign currency contracts is based on a 20% adverse change in foreign exchange rates, against relevant functional currencies.

	Fair Value Asset/(Liability)	Fair Value Sensitivity
	(In millions)	
Foreign exchange contracts - Cash flow hedges	\$ 89	\$ (133)
Foreign exchange contracts - Not designated for hedge accounting	\$ (16)	\$ (111)

Since our risk management programs are highly effective, the potential loss in value described above would be largely offset by changes in the value of the underlying exposure.

We also use foreign exchange contracts to offset the foreign exchange risk on our assets and liabilities denominated in currencies other than the functional currency of our subsidiaries. These contracts reduce, but do not entirely eliminate, the impact of currency exchange rate movements on our assets and liabilities. The foreign currency gains and losses on the assets and liabilities are recorded in interest and other, net, which are offset by the gains and losses on the foreign exchange contracts.

We considered the historical trends in currency exchange rates and determined that it was reasonably possible that adverse changes in exchange rates of 20% for all currencies could be experienced in the near term. These changes would have resulted in an adverse impact on income before income taxes of approximately \$12 million as of December 31, 2022 taking into consideration the offsetting effect of foreign exchange forwards in place as of December 31, 2022.

ITEM 8: FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The consolidated financial statements and accompanying notes listed in Part IV, Item 15(a)(1) of this Annual Report on Form 10-K are included elsewhere in this Annual Report on Form 10-K.

ITEM 9: CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A: CONTROLS AND PROCEDURES

Evaluation of disclosure controls and procedures: Based on the evaluation of our disclosure controls and procedures (as defined in the Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended, or the Exchange Act) required by Exchange Act Rules 13a-15(b) or 15d-15(b), our principal executive officer and our principal financial officer have concluded that our disclosure controls and procedures were effective as of December 31, 2022.

Changes in internal controls: There were no changes in our internal control over financial reporting as defined in Exchange Act Rule 13a-15(f) that occurred during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's annual report on internal control over financial reporting: Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our management, including our principal executive officer and principal financial officer, conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its evaluation under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2022.

The effectiveness of our internal control over financial reporting as of December 31, 2022 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears in Item 15(a)1 of this Annual Report on Form 10-K.

ITEM 9B: OTHER INFORMATION

Not applicable.

ITEM 9C: DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10: *DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE*

Incorporated by reference from our Proxy Statement for our 2023 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the year ended December 31, 2022.

Code of Ethics, Governance Guidelines and Committee Charters

We have adopted a *Code of Business Conduct and Ethics* that applies to all eBay employees and directors. The *Code of Business Conduct and Ethics* is posted on our website at <https://investors.ebayinc.com/corporate-governance/governance-documents/>. We will post any amendments to or waivers from the *Code of Business Conduct and Ethics* at that location.

We have also adopted *Governance Guidelines for the Board of Directors* and a written committee charter for each of our Audit Committee, Compensation and Human Capital Committee and Corporate Governance and Nominating Committee. Each of these documents is available on our website at <https://investors.ebayinc.com/corporate-governance/governance-documents/>.

ITEM 11: *EXECUTIVE COMPENSATION*

Incorporated by reference from our Proxy Statement for our 2023 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the year ended December 31, 2022.

ITEM 12: *SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS*

Incorporated by reference from our Proxy Statement for our 2023 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the year ended December 31, 2022.

ITEM 13: *CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE*

Incorporated by reference from our Proxy Statement for our 2023 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the year ended December 31, 2022.

ITEM 14: *PRINCIPAL ACCOUNTANT FEES AND SERVICES*

Incorporated by reference from our Proxy Statement for our 2023 Annual Meeting of Stockholders to be filed with the SEC within 120 days after the end of the year ended December 31, 2022.

- c. Financial Statement Schedule and Separate Financial Statements of Subsidiaries Not Consolidated and Fifty Percent or Less Owned Persons

Adevinta was deemed a significant equity investee under Rule 3-09 of Regulation S-X for the fiscal year ended December 31, 2021 (though not for the fiscal year ended December 31, 2022). As such, financial statements of Adevinta for the fiscal years ended December 31, 2022, 2021 and 2020, respectively, are required to be filed by amendment to this Annual Report on Form 10-K within six months of Adevinta's fiscal year end. Accordingly, Adevinta's financial statements for its fiscal year ended December 31, 2022 will be filed via an amendment to this Annual Report on Form 10-K on or before June 30, 2023.

ITEM 16: FORM 10-K SUMMARY

None.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of eBay Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheet of eBay Inc. and its subsidiaries (the "Company") as of December 31, 2022 and 2021, and the related consolidated statements of income, of comprehensive income, of stockholders' equity and of cash flows for each of the three years in the period ended December 31, 2022, including the related notes and schedule of valuation and qualifying accounts for each of the three years in the period ended December 31, 2022 appearing under Item 15a.2. (collectively referred to as the "consolidated financial statements"). We also have audited the Company's internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2022 and 2021, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2022 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2022, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's annual report on internal control over financial reporting appearing under Item 9A. Our responsibility is to express opinions on the Company's consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Income Taxes – Unrecognized Tax Benefits and Taxes on Foreign Earnings

As described in Notes 1 and 16 to the consolidated financial statements, significant judgment is required in determining the Company's tax expense and in evaluating management's tax positions, including evaluating uncertainties and the complexity of taxes on foreign earnings. As disclosed by management, the Company's income tax rate is affected by the tax rates that apply to their foreign earnings including U.S. minimum taxes on foreign earnings. The deferred tax benefit derived from the amortization of the Company's intellectual property is based on the fair value, which has been agreed with foreign tax authorities. The deferred tax benefit may from time to time change based on changes in tax rates. Management recognizes and measures uncertain tax positions in accordance with generally accepted accounting principles in the U.S., or GAAP, pursuant to which management only recognizes the tax benefit from an uncertain tax position if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. Tax positions are evaluated for potential reserves for uncertainty based on the estimated probability of sustaining the position under examination. The total income tax benefit for the year ended December 31, 2022 was \$327 million and gross amounts of unrecognized tax benefits were \$493 million as of December 31, 2022.

The principal considerations for our determination that performing procedures relating to income taxes - unrecognized tax benefits and taxes on foreign earnings is a critical audit matter are the significant judgment by management when evaluating tax positions relating to unrecognized tax benefits and taxes on foreign earnings, which in turn led to a high degree of auditor judgment, effort, and subjectivity in performing audit procedures and evaluating audit evidence relating to unrecognized tax benefits and taxes on foreign earnings. The audit effort also involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to income taxes, including controls over unrecognized tax benefits and taxes on foreign earnings. These procedures also included, among others, evaluating tax positions taken by management, including evaluating the reasonableness of management's determination of the probability of sustaining the position under tax examination and identification of changes to tax positions, evaluating communications with the relevant tax authorities, testing applicable tax rates applied by management, and evaluating the impact of taxes on foreign earnings, including the calculation of U.S. minimum taxes on foreign earnings and the deferred tax benefit derived from the amortization of the Company's intellectual property. Professionals with specialized skill and knowledge were used to assist in testing the calculation of taxes on foreign earnings.

/s/ PricewaterhouseCoopers LLP
San Jose, California
February 23, 2023

We have served as the Company's auditor since 1997.

eBay Inc.**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 1 — The Company and Summary of Significant Accounting Policies*****The Company***

eBay Inc. is a global commerce leader, which includes our Marketplace platforms. Founded in 1995 in San Jose, California, eBay is one of the world's largest and most vibrant marketplaces for discovering great value and unique selection. Collectively, we connect millions of buyers and sellers around the world, empowering people and creating opportunity for all. Our technologies and services are designed to give buyers choice and a breadth of relevant inventory and to enable sellers worldwide to organize and offer their inventory for sale, virtually anytime and anywhere.

When we refer to “we,” “our,” “us,” the “Company” or “eBay” in this Annual Report on Form 10-K, we mean the current Delaware corporation (eBay Inc.) and its consolidated subsidiaries, unless otherwise expressly stated or the context otherwise requires.

In 2021, we completed sale of 80.01% of the outstanding equity interests of eBay Korea LLC, a limited liability company incorporated under the laws of Korea and a wholly owned subsidiary of eBay KTA (“eBay Korea”) to E-mart Inc. and one of its wholly owned subsidiaries (together, “E-mart”), pursuant to the terms and conditions of the securities purchase agreement, in exchange for approximately \$3.0 billion of gross cash proceeds as of the transaction close date, subject to certain adjustments. Upon completion of the sale, we retained 19.99% of the outstanding equity interests of the new entity, Gmarket Global LLC (“Gmarket”), which is accounted for under the fair value option. Our equity investment in Gmarket was valued at \$728 million as of the transaction close date.

In 2021, we completed the previously announced transfer of our Classifieds business to Adevinta ASA (“Adevinta”) for \$2.5 billion in cash, subject to certain adjustments, and approximately 540 million shares in Adevinta which represented an equity interest of 44%. Together, the total consideration received under the definitive agreement was valued at approximately \$13.3 billion, based on the closing trading price of Adevinta's outstanding shares on the Oslo Stock Exchange on June 24, 2021. The equity interest received is accounted for under the fair value option. Our equity investment in Adevinta was valued at \$10.8 billion as of the transaction close date. In November 2021, we completed the previously announced sale of approximately 135 million of our voting shares in Adevinta to Astinlux Finco S.à r.l. (“Permira”), inclusive of the option exercised by Permira to purchase additional voting shares, for total cash consideration of approximately \$2.3 billion. At the close of the sale inclusive of the option exercised, our ownership in Adevinta was reduced to 33%. Following the sale in November 2021, our equity investment in Adevinta was reported in the long-term assets section on the consolidated balance sheet to reflect our contractual requirement to retain at least 25% of the total number of issued and outstanding equity securities of Adevinta until October 14, 2023, subject to certain exceptions specified in the agreement. As of December 31, 2022, our equity investment in Adevinta is reported in the short-term assets section on the consolidated balance sheet since our contractual requirement ends within twelve months of the balance sheet date.

The results of our eBay Korea and Classifieds businesses have been presented as discontinued operations in our consolidated statement of income for all periods presented through the respective transaction close dates as the transactions represented a strategic shift in our business that had a major effect on our operations and financial results. See “Note 4 — Discontinued Operations” for additional information.

In 2019, we entered into a stock purchase agreement with an affiliate of viagogo to sell our StubHub business. The sale of our StubHub business was completed on February 13, 2020. Beginning in the first quarter of 2020, StubHub's financial results for periods prior to the sale have been reflected in our consolidated statement of income as discontinued operations. See “Note 4 — Discontinued Operations” for additional information.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Use of Estimates***

The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. On an ongoing basis, we evaluate our estimates, including those related to provisions for transaction losses, legal contingencies, income taxes, revenue recognition, stock-based compensation, investments, goodwill and the recoverability of intangible assets. We base our estimates on historical experience and on various other assumptions that we believe to be reasonable under the circumstances. Actual results could differ from those estimates.

Principles of Consolidation and Basis of Presentation

The accompanying financial statements are consolidated and include the financial statements of eBay Inc., our wholly and majority-owned subsidiaries and variable interest entities ("VIE") where we are the primary beneficiary. All intercompany balances and transactions have been eliminated in consolidation. Minority interests are recorded as a noncontrolling interest. A qualitative approach is applied to assess the consolidation requirement for VIEs. Generally, investments in entities where we hold at least a 20% ownership interest and have the ability to exercise significant influence, but not control, over the investee are accounted for using the equity method of accounting, including those in which the fair value option has been elected.

For equity method investments, our share of the investees' results of operations is included in gain (loss) on equity investments and warrant, net and this investment balance is included in long-term investments. For equity investments under the fair value option, the change in fair value of the investment is included in gain (loss) on equity investments and warrant, net and this investment balance is included in long-term investments, other than our equity interest in Adevinta which is included in short-term investments. Investments in entities where we hold less than a 20% ownership interest are generally accounted for as equity investments to be measured at fair value or, under an election, at cost if it does not have readily determinable fair value, in which case the carrying value would be adjusted upon the occurrence of an observable price change in an orderly transaction for identical or similar instruments or impairment.

Upon the transfer of our Classifieds business to Adevinta in 2021, shares in Adevinta were included as part of total consideration received under the definitive agreement. The equity interest in Adevinta is accounted for under the fair value option. Additionally, upon completion of the sale of 80.01% of the outstanding equity interests of eBay Korea to Emart in 2021, we retained 19.99% of the outstanding equity interests of the new entity, Gmarket, which is accounted for under the fair value option. Subsequent changes in fair value for these equity investments are included in gain (loss) on equity investments and warrant, net on our consolidated statement of income.

Significant Accounting Policies***Revenue recognition***

We recognize revenue when we transfer control of promised goods or services to customers in an amount that reflects the consideration to which we expect to be entitled in exchange for those goods or services. Revenue is recognized net of any taxes collected, which are subsequently remitted to governmental authorities.

Our net revenues primarily include final value fees, feature fees, including fees to promote listings and listing fees from sellers on our platforms. Our net revenues also include store subscription and other fees often from large enterprise sellers as well revenues from the sale of advertisements and revenue sharing arrangements. Our net revenues are reduced by incentives, including discounts, coupons and rewards, provided to our customers.

We identified one performance obligation to sellers on our Marketplace platform, which is to connect buyers and sellers on our secure and trusted Marketplace platforms, including payment processing activities. Final value fees are recognized when an item is sold on a Marketplace platform, satisfying this performance obligation. There may be additional services available to Marketplace sellers, mainly to promote or feature listings, that are not distinct within the context of the contract. Accordingly, fees for these additional services are recognized when the single performance obligation is satisfied. Promoted listing fees, feature fees and listing fees are recognized when an item is sold, or when the contract expires.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Store subscription and other nonstandard listing contracts may contain multiple performance obligations, including discounts on future services. Determining whether performance obligations should be accounted for separately or combined may require significant judgment. The transaction price is allocated to each performance obligation based on its stand-alone selling price (“SSP”). In instances where SSP is not directly observable, we generally estimate selling prices based on when they are sold to customers of a similar nature and geography. These estimates are generally based on pricing strategies, market factors, strategic objectives and observable inputs. Store subscription revenues are recognized over the subscription period, and discounts offered through store subscription or nonstandard listing contracts are recognized when the options are exercised or when the options expire.

Further, to drive traffic to our platforms, we provide incentives to buyers and sellers in various forms including discounts on fees, discounts on items sold, coupons and rewards. Evaluating whether a promotion or incentive is a payment to a customer may require significant judgment. Promotions and incentives which are consideration payable to a customer are recognized as a reduction of revenue at the later of when revenue is recognized or when we pay or promise to pay the incentive. Promotions and incentives to most buyers on our Marketplace platforms, to whom we have no performance obligation, are recognized as sales and marketing expense. In addition, we may provide credits to customers when we refund certain fees. Credits are accounted for as variable consideration at contract inception when estimating the amount of revenue to be recognized when a performance obligation is satisfied to the extent that it is probable that a significant reversal of revenue will not occur and updated as additional information becomes available.

Advertising revenue is derived principally from the sale of online advertisements which are based on “impressions” (i.e., the number of times that an advertisement appears in pages viewed by users of our platforms) or “clicks” (which are generated each time users on our platforms click through our advertisements to an advertiser’s designated website) delivered to advertisers. We use the output method and apply the practical expedient to recognize advertising revenue in the amount to which we have a right to invoice. For contracts with target advertising commitments with rebates, estimated payout is accounted for as a variable consideration to the extent it is probable that a significant reversal of revenue will not occur.

Revenues related to revenue sharing arrangements are recognized based on whether we are the principal and are responsible for fulfilling the promise to provide the specified services or whether we are an agent arranging for those services to be provided by our partners. Determining whether we are a principal or agent in these contracts may require significant judgment. If we are the principal, we recognize revenue in the gross amount of consideration received from the customer, whereas if we are an agent, we recognize revenue net of the consideration due to our partners at a point in time when the services are provided. Our most significant revenue share arrangements are with shipping service providers. We are primarily acting as an agent in these contracts and revenues are recognized at a point in time when we have satisfied our promise of connecting the shipping service provider to our customer.

Internal use software and platform development costs

Direct costs incurred to develop software for internal use and platform development costs are capitalized and amortized over an estimated useful life of one to five years. During the years ended December 31, 2022 and 2021, we capitalized costs, primarily related to labor and stock-based compensation, of \$130 million and \$127 million, respectively. Amortization of previously capitalized amounts was \$129 million, \$133 million and \$139 million for 2022, 2021 and 2020, respectively. Costs related to the design or maintenance of internal use software and platform development are expensed as incurred.

Advertising expense

We expense the costs of producing advertisements at the time production occurs and expense the cost of communicating advertisements in the period during which the advertising space or airtime is used, in each case as sales and marketing expense. Internet advertising expenses are recognized based on the terms of the individual agreements, which are generally over the greater of the ratio of the number of impressions delivered over the total number of contracted impressions, on a pay-per-click basis, or on a straight-line basis over the term of the contract. Advertising expense totaled \$1.2 billion, \$1.1 billion and \$1.1 billion for the years ended December 31, 2022, 2021 and 2020, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Stock-based compensation***

We have equity incentive plans under which we grant equity awards, including stock options, restricted stock units ("RSUs"), total shareholder return performance stock units ("TSR PSUs"), performance-based restricted stock units, and performance share units, to our directors, officers and employees. We primarily issue RSUs. We determine compensation expense associated with RSUs based on the fair value of our common stock on the date of grant. We determine compensation expense associated with stock options based on the estimated grant date fair value method using the Black-Scholes valuation model. We generally recognize compensation expense using a straight-line amortization method over the respective vesting period for awards that are ultimately expected to vest. Accordingly, stock-based compensation expense for 2022, 2021 and 2020 has been reduced for estimated forfeitures. When estimating forfeitures, we consider voluntary termination behaviors as well as trends of actual option forfeitures. We recognize a benefit or provision from stock-based compensation in earnings as a component of income tax expense to the extent that an incremental tax benefit or deficiency is realized by following the ordering provisions of the tax law.

Provision for transaction losses

Provision for transaction losses consists primarily of losses resulting from our buyer protection programs, payment misuse including chargebacks for unauthorized credit card use and merchant related chargebacks due to non-delivery of goods or services and account takeovers.

Provision for transaction losses represent our estimate of actual losses based on our historical experience and many other factors including changes to our protection programs, the impact of regulatory changes as well as macroeconomic conditions.

Provision for credit losses

Provision for credit losses consist of bad debt expense associated with our accounts receivable balance. These losses are recorded in provision for transaction losses in our consolidated statement of income.

We are exposed to credit losses primarily through our receivables from sellers or advertisers. We develop estimates to reflect the risk of credit loss which are based on historical loss trends adjusted for asset specific attributes, current conditions and reasonable and supportable forecasts of the economic conditions that will exist through the contractual life of the financial asset. Our receivables are recovered over a period of 0-180 days, therefore, forecasted changes to economic conditions are not expected to have a significant effect on the estimate of the allowance for doubtful accounts, except in extraordinary circumstances. We write off the asset when it is no longer deemed collectible or when it goes past due 180 days whichever is earlier, with certain limited exceptions. We monitor our ongoing credit exposure through an active review of collection trends. Our activities include monitoring the timeliness of payment collection, managing dispute resolution and performing timely account reconciliations. We may employ collection agencies to pursue recovery of defaulted receivables.

Customer accounts and funds receivable

These balances represent payments in transit and cash received and held by financial institutions and payment processors associated with marketplace activity and awaiting settlement or are installment collections from financial institutions.

We are exposed to credit losses from customer accounts and funds receivable balances held by third party financial institutions. We assess these balances for credit loss based on a review of the average period for which the funds are held, credit ratings of the financial institutions and by assessing the probability of default and loss given default models. At December 31, 2022 and 2021, we did not record any credit-related loss.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Payment processor advances***

Payment processor advances represent amounts prefunded to and held by payment processors in order to fund outflows in the normal course of the transaction lifecycle, including but not limited to payment processor fees, seller account payouts, and incentives such as coupons or gift cards. Payment processor advances are recorded within other current assets in our consolidated balance sheet. Other accounts are used to collect and remit indirect taxes from the buyer to the local tax authorities and to transfer shipping label proceeds from the seller to the relevant shipping service providers. Generally, changes in balances that impact the determination of net income, such as payment processor fees and incentives are presented within operating activities in our consolidated statement of cash flows. Changes in balances that pertain solely to payment intermediation activities (e.g. seller pay-out services) are presented within financing activities in our consolidated statement of cash flows.

Customer accounts and funds payable

These balances primarily represent the Company's liability towards its customers to settle the funds from the completed transactions on the platform associated with marketplace activity.

Income taxes

Significant judgment is required in determining our tax expense and in evaluating our tax positions, including evaluating uncertainties and the complexity of taxes on foreign earnings. We review our tax positions quarterly and adjust the balances as new information becomes available. Tax positions are evaluated for potential reserves for uncertainty based on the estimated probability of sustaining the position under examination. Our income tax rate is affected by the tax rates that apply to our foreign earnings including U.S. minimum taxes on foreign earnings. The deferred tax benefit derived from the amortization of our intellectual property is based on the fair value, which has been agreed with foreign tax authorities. The deferred tax benefit may from time to time change based on changes in tax rates.

We account for income taxes using an asset and liability approach, which requires the recognition of taxes payable or refundable for the current year and deferred tax liabilities and assets for the future tax consequences of events that have been recognized in our financial statements or tax returns. The measurement of current and deferred tax assets and liabilities is based on provisions of enacted tax laws; the effects of future changes in tax laws or rates are not anticipated. If necessary, the measurement of deferred tax assets is reduced by the amount of any tax benefits that are not expected to be realized based on available evidence.

We report a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return. We recognize interest and penalties, if any, related to unrecognized tax benefits in income tax expense.

Cash, cash equivalents and restricted cash

Cash and cash equivalents are short-term, highly liquid investments with original maturities of three months or less when purchased, which may include bank deposits, U.S. Treasury securities, time deposits, and certificates of deposit.

We consider cash to be restricted when withdrawal or general use is legally restricted. Our restricted cash balance is held in interest bearing accounts for letters of credit related to our global sabbatical program and for certain amounts related to other compensation arrangements held in escrow.

Investments

Short-term investments are primarily comprised of corporate debt securities, commercial paper and government and agency securities. Short-term investments are investments with original maturities of less than one year when purchased, are classified as available-for-sale and are reported at fair value using the specific identification method. Short-term investments also include equity securities with readily determinable fair values that can be sold in active markets.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Long-term investments are primarily comprised of corporate debt securities, government and agency securities, equity investments under the fair value option (other than our equity interest in Adevinia which is included in short-term investments), equity investments under the equity method of accounting and equity investments without readily determinable fair values. Debt securities are classified as available-for-sale and are reported at fair value using the specific identification method.

Unrealized gains and losses on our available-for-sale debt securities are excluded from earnings and reported as a component of other comprehensive income (loss), net of related estimated income tax provisions or benefits. We periodically assess our portfolio of debt investments for impairment. For debt securities in an unrealized loss position, this assessment first takes into account our intent to sell, or whether it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis. If either of these criteria are met, the debt security's amortized cost basis is written down to fair value through interest and other, net. For debt securities in an unrealized loss position that do not meet the aforementioned criteria, we assess whether the decline in fair value has resulted from credit losses or other factors. In making this assessment, we consider the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, and any adverse conditions specifically related to the security, among other factors. If this assessment indicates that a credit loss may exist, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses will be recorded through interest and other, net, limited by the amount that the fair value is less than the amortized cost basis. Any additional impairment not recorded through an allowance for credit losses is recognized in other comprehensive income. Changes in the allowance for credit losses are recorded as provision for (or reversal of) credit loss expense. Losses are charged against the allowance when management believes the uncollectability of an available-for-sale security is confirmed or when either of the criteria regarding intent or requirement to sell is met. These changes are recorded in gain (loss) on equity investments and warrant, net.

Our equity investments include equity investments with readily determinable fair values, equity investments without readily determinable fair values and equity investments under the equity method of accounting, including those in which the fair value option has been elected. Our equity investment in Adevinia is described in a separate section under "Equity investment in Adevinia" in this Note.

Equity investments with readily determinable fair values are investments in publicly-traded companies for which we do not exercise significant influence and are measured at fair value based on the respective closing stock price and prevailing foreign exchange rate, as applicable, at the period end date. Equity investments with readily determinable fair values are classified within Level 1 in the fair value hierarchy as the valuation can be obtained from real time quotes in active markets. Subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net.

Equity investments without readily determinable fair values are non-marketable equity securities, which are investments in privately-held companies for which we do not exercise significant influence and are accounted for under the measurement alternative. Under the measurement alternative, the carrying value is measured at cost minus impairment, if any, plus or minus changes resulting from observable price changes in orderly transactions for the identical or a similar investment of the same issuer. We perform a qualitative fair value assessment on a quarterly basis over our equity investments without readily determinable fair values to identify any changes in basis or impairments. Equity investments without readily determinable fair values are considered impaired when there is an indication that the fair value of our interest is less than the carrying amount. Changes in value and impairments of equity investments without readily determinable fair values are recognized in gain (loss) on equity investments and warrant, net.

We account for equity investments through which we exercise significant influence but do not have control over the investee under the equity method or under the fair value option. For equity method investments, our consolidated results of operations include, as a component of gain (loss) on equity investments and warrant, net, our share of the net income or loss of the equity investments accounted for under the equity method of accounting. Our share of equity method investees' results of operations was not material for any period presented. We perform a qualitative impairment assessment on a quarterly basis over our equity method investments. Equity method investments are considered impaired when there is an indication of an other-than-temporary decline in value below

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

the carrying amount. Impairments and any other adjustments to equity method investments are recorded in gain (loss) on equity investments and warrant, net.

Equity investments under the fair value option are measured at fair value based on a quarterly valuation analysis or using the net asset value per share (or its equivalent) practical expedient. Equity investments measured at fair value based on a quarterly valuation analysis are classified within Level 3 in the fair value hierarchy, as the valuation reflects management's estimate of assumptions that market participants would use in pricing the equity investment. Equity investments measured at fair value using the net asset value per share (or its equivalent) practical expedient are not classified in the fair value hierarchy. Subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net.

We describe our accounting policy for our equity investment in Adevinta in a separate section under "Equity investment in Adevinta."

Refer to "Note 7 — Investments" and "Note 9 — Fair Value Measurement of Assets and Liabilities" for additional details.

Equity investment in Adevinta

At the initial recognition of our equity investment in Adevinta on June 24, 2021, we elected the fair value option where subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net in the consolidated statement of income. We report the investment at fair value within equity investment in Adevinta in our consolidated balance sheet. The investment is classified within Level 1 in the fair value hierarchy as the valuation can be obtained from real time quotes in active markets. The fair value of the equity investment is measured based on Adevinta's closing stock price and prevailing foreign exchange rate. We believe the fair value option election creates more transparency of the current value of our shares in the equity investment for Adevinta.

Refer to "Note 7 — Investments" and "Note 9 — Fair Value Measurement of Assets and Liabilities" for additional details.

Leases

We determine if an arrangement is a lease or contains a lease at inception. Operating lease liabilities are recognized based on the present value of the remaining lease payments, discounted using the discount rate for the lease at the commencement date. As the rate implicit in the lease is not readily determinable for our operating leases, we generally use an incremental borrowing rate based on information available at the commencement date to determine the present value of future lease payments. Operating right-of-use ("ROU") assets are generally recognized based on the amount of the initial measurement of the lease liability. Our leases have remaining lease terms of up to nine years, some of which include options to extend the leases for up to five years, and some of which include options to terminate the leases within one year. Lease expense is recognized on a straight-line basis over the lease term. We account for lease and non-lease components as a single lease component for our data center leases. Lease and non-lease components for all other leases are accounted for separately.

Operating leases are included in operating lease right-of-use assets, other current liabilities and operating lease liabilities on our consolidated balance sheets.

Property and equipment

Property and equipment are stated at historical cost less accumulated depreciation. Depreciation for equipment, buildings and leasehold improvements commences once they are ready for our intended use. Depreciation is computed using the straight-line method over the estimated useful lives of the assets, generally, one to three years for computer equipment and software, up to thirty years for buildings and building improvements, the shorter of five years or the term of the lease for leasehold improvements and three years for furniture, fixtures and vehicles. Land is not depreciated.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Goodwill and intangible assets***

Goodwill is tested for impairment at a minimum on an annual basis at the reporting unit level. A qualitative assessment can be performed to determine whether it is more likely than not that the fair value of the reporting unit is less than its carrying value. If the reporting unit does not pass the qualitative assessment, then the reporting unit's carrying value is compared to its fair value. The fair value of the reporting unit is estimated using income and market approaches. Goodwill is considered impaired if the carrying value of the reporting unit exceeds its fair value. The discounted cash flow method, a form of the income approach, uses expected future operating results and a market participant discount rate. The market approach uses comparable company prices and other relevant information generated by market transactions (either publicly traded entities or mergers and acquisitions) to develop pricing metrics to be applied to historical and expected future operating results of our reporting unit. Failure to achieve these expected results, changes in the discount rate or market pricing metrics may cause a future impairment of goodwill at the reporting unit. We conducted our annual impairment test of goodwill as of August 31, 2022 and 2021 and determined that no adjustment to the carrying value of goodwill for any reporting unit was required.

Intangible assets consist of purchased customer lists and user base, marketing related, developed technologies and other intangible assets, including patents and contractual agreements. Intangible assets are amortized over the period of estimated benefit using the straight-line method and estimated useful lives ranging from three to seven years. No significant residual value is estimated for intangible assets.

Impairment of long-lived assets

We evaluate long-lived assets (including leases and intangible assets) for impairment whenever events or changes in circumstances indicate that the carrying amount of a long-lived asset may not be recoverable. An asset is considered impaired if its carrying amount exceeds the undiscounted future net cash flow the asset is expected to generate. In 2022, no impairment was recorded. In 2021 and 2020, we recorded immaterial impairment charges.

Foreign currency

Most of our foreign subsidiaries use the local currency of their respective countries as their functional currency. Assets and liabilities are translated into U.S. dollars using exchange rates prevailing at the balance sheet date, while revenues and expenses are translated at average exchange rates during the year. Gains and losses resulting from the translation of our consolidated balance sheet are recorded as a component of accumulated other comprehensive income.

Gains and losses from foreign currency transactions are recognized as interest and other, net.

Derivative instruments

We use derivative financial instruments, primarily forwards, options and swaps, to hedge certain foreign currency and interest rate exposures. We may also use other derivative instruments not designated as hedges, such as forwards to hedge foreign currency balance sheet exposures. We do not use derivative financial instruments for trading purposes.

We also entered into a warrant agreement in addition to a commercial agreement with Adyen that, subject to meeting certain conditions, entitles us to acquire a fixed number of shares up to 5% of Adyen's fully diluted issued and outstanding share capital at a specific date. The warrant is accounted for as a derivative instrument under ASC Topic 815, *Derivatives and Hedging*.

See "Note 8 — Derivative Instruments" for a full description of our derivative instrument activities and related accounting policies.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Concentration of credit risk***

Our cash, cash equivalents, accounts receivable, customer accounts and funds receivable, available-for-sale debt securities and derivative instruments are potentially subject to concentration of credit risk. Cash and cash equivalents are placed with financial institutions that management believes are of high credit quality. Our accounts receivable are derived from revenue earned from customers. In each of the years ended December 31, 2022, 2021 and 2020, no customer accounted for more than 10% of net revenues. Our derivative instruments expose us to credit risk to the extent that our counterparties may be unable to meet the terms of the agreements.

Recently Adopted Accounting Pronouncements

In 2019, the Financial Accounting Standards Board (“FASB”) issued new guidance to simplify the accounting for income taxes by removing certain exceptions to the general principles and also simplification of areas such as franchise taxes, step-up in tax basis goodwill, separate entity financial statements and interim recognition of enactment of tax laws or rate changes. The standard is effective for annual reporting periods beginning after December 15, 2020, including interim reporting periods within those fiscal years. We adopted this guidance in the first quarter of 2021 with no material impact on our consolidated financial statements.

In 2020, the FASB issued new guidance to decrease diversity in practice and increase comparability for the accounting of certain equity securities and investments under the equity method of accounting. The standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2020. We adopted this guidance in the first quarter of 2021 with no material impact on our consolidated financial statements.

In 2021, the FASB issued new guidance to require the recognition and measurement of contract assets and contract liabilities from revenue contracts by an acquirer in a business combination. The new guidance clarifies that an acquirer should account for the related revenue contracts at the acquisition date as if it had originated the contracts in accordance with existing revenue guidance. The standard is effective for annual reporting periods beginning after December 15, 2022, including interim reporting periods within those fiscal years. We adopted this guidance in the fourth quarter of 2022 with no material impact on our consolidated financial statements.

In 2022, the FASB issued new guidance to expand the scope of financial assets that can be included in a closed portfolio hedged using the portfolio layer method to allow consistent accounting for similar hedges. The expanded scope permits the application of the same portfolio hedging method to both prepayable and nonprepayable financial assets. The standard is effective for annual reporting periods beginning after December 15, 2022, including interim reporting periods within those fiscal years. We adopted this guidance in the fourth quarter of 2022 with no material impact on our consolidated financial statements.

Recent Accounting Pronouncements Not Yet Adopted

In June 2022, the FASB issued new guidance to clarify the fair value measurement guidance for equity securities subject to contractual restrictions that prohibit the sale of an equity security. Further, the guidance introduces new disclosure requirements for equity securities subject to contractual sale restrictions that are measured at fair value. The standard will be effective for annual reporting periods beginning after December 15, 2023, including interim reporting periods within those fiscal years. We do not expect the adoption of this standard to have a material impact on our consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 2 — Net Income (Loss) Per Share

Basic net income (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of common shares outstanding during the period. Diluted net income (loss) per share is computed by dividing net income (loss) for the period by the weighted average number of shares of common stock and potentially dilutive common stock outstanding during the period. The dilutive effect of outstanding options and equity incentive awards is reflected in diluted net income (loss) per share by application of the treasury stock method. The calculation of diluted net income (loss) per share excludes all anti-dilutive common shares.

The following table presents the computation of basic and diluted net income (loss) per share (in millions, except per share amounts):

	Year Ended December 31,		
	2022	2021	2020
Numerator:			
Income (loss) from continuing operations	\$ (1,274)	\$ 252	\$ 2,487
Income from discontinued operations, net of income taxes	5	13,356	3,180
Net income (loss)	<u>\$ (1,269)</u>	<u>\$ 13,608</u>	<u>\$ 5,667</u>
Denominator:			
Weighted average shares of common stock - basic	558	652	710
Dilutive effect of equity incentive awards	—	11	8
Weighted average shares of common stock - diluted	<u>558</u>	<u>663</u>	<u>718</u>
Income (loss) per share - basic:			
Continuing operations	\$ (2.28)	\$ 0.39	\$ 3.50
Discontinued operations	0.01	20.48	4.48
Net income (loss) per share - basic	<u>\$ (2.27)</u>	<u>\$ 20.87</u>	<u>\$ 7.98</u>
Income (loss) per share - diluted:			
Continuing operations	\$ (2.28)	\$ 0.38	\$ 3.46
Discontinued operations	0.01	20.16	4.43
Net income (loss) per share - diluted	<u>\$ (2.27)</u>	<u>\$ 20.54</u>	<u>\$ 7.89</u>
Common stock equivalents excluded from income (loss) per diluted share because their effect would have been anti-dilutive	<u>13</u>	<u>1</u>	<u>5</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 3 — Business Combinations

Acquisition of TCGplayer

On October 31, 2022, we completed the acquisition of TCGplayer, a trusted marketplace for collectible card game enthusiasts, for \$228 million. We believe the acquisition complements eBay's focus category strategy, builds on its offerings to bring even more selection to enthusiasts and enhances the overall collecting experience for customers.

The following table presents the preliminary allocation of the aggregate purchase consideration (in millions):

	TCGplayer	
Goodwill	\$	152
Purchased intangible assets		88
Deferred taxes		(12)
Total	\$	228

These allocations were prepared on a preliminary basis and changes to these allocations may occur as additional information becomes available. The fair values of the acquired intangible assets of \$88 million are provisional pending receipt of the final valuations for those assets. We assigned the goodwill to our Marketplace segment. The goodwill recognized is primarily attributable to expected synergies and the assembled workforce of TCGplayer. We generally do not expect goodwill to be deductible for income tax purposes.

Our consolidated financial statements include the operating results of the acquired business from the date of acquisition. Separate operating results and pro forma results of operations for the acquisition above have not been presented as the effect of this acquisition is not material to our financial results.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Note 4 — Discontinued Operations
eBay Korea

In 2021, we completed the previously announced sale of 80.01% of the outstanding equity interests of eBay Korea to E-mart for approximately \$3.0 billion of gross cash proceeds as of the transaction close date, subject to certain adjustments specified for indebtedness, cash, working capital, transaction expenses and certain taxes. The sale resulted in a pre-tax gain of \$3.2 billion inclusive of a \$81 million currency translation adjustment and a \$44 million gain net of tax on the net investment hedge settled in the fourth quarter of 2021, as well as income tax expense of \$369 million.

In addition, upon closing we entered into a transition service agreement with eBay Korea to support the operations of eBay Korea after the divestiture for immaterial fees. This agreement terminated during the third quarter of 2022.

Classifieds

In 2021, we completed the previously announced transfer of our Classifieds business to Adevinta for total consideration of \$13.3 billion which included \$2.5 billion in cash proceeds and approximately 540 million shares of Adevinta valued at \$10.8 billion on the date of close and represented a 44% equity interest. The transfer resulted in a pre-tax gain of \$12.5 billion and related income tax expense of \$2.1 billion, both within income from discontinued operations.

In addition, upon closing we entered into a transition service agreement with Adevinta to support the operations of Classifieds after the divestiture for fees of \$29 million. This agreement terminated during the second quarter of 2022 with the exception of Gumtree UK which terminated during the fourth quarter of 2022.

StubHub

In 2020, we completed the previously announced sale of our StubHub business to an affiliate of viagogo for \$4.1 billion in proceeds (\$3.2 billion, net of income taxes of approximately \$0.9 billion) and a pre-tax gain of \$3.9 billion within income from discontinued operations.

In addition, upon closing we entered into a transition service agreement with viagogo pursuant to which we provided services, including, but not limited to, business support services for StubHub after the divestiture. These agreements terminated in the fourth quarter of 2021. The related fees in 2021 were \$34 million for support services prior to termination.

Discontinued operations

The following table presents financial results from discontinued operations, net of income taxes in our consolidated statement of income for the periods indicated (in millions):

	Year ended December 31,		
	2022	2021 ⁽¹⁾⁽²⁾	2020 ⁽³⁾
eBay Korea income (loss) from discontinued operations, net of income taxes	\$ —	\$ 2,870	\$ 55
Classifieds income (loss) from discontinued operations, net of income taxes	5	10,485	197

Income tax benefit (provision)	—	(335)	(20)
Income (loss) from discontinued operations, net of income taxes	\$ —	\$ 2,870	\$ 55

(1) Includes eBay Korea financial results through the transaction close on November 14, 2021 and the related gain on sale.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Classifieds

The financial results of Classifieds are presented as income from discontinued operations, net of income taxes on our consolidated statement of income through June 24, 2021, when the transfer of Classifieds was completed. Each period presented below includes the impact of intercompany revenue agreements through June 24, 2021. The impact of these intercompany revenue agreements to net revenues and cost of net revenues was \$5 million for the period from January 1, 2021 through June 24, 2021, and \$14 million the year ended December 31, 2020. The continuing revenue and cash flows are not considered to be material.

The following table presents the financial results of Classifieds (in millions):

	Year ended December 31,		
	2022	2021 ⁽¹⁾	2020
Net revenues	\$ —	\$ 565	\$ 980
Cost of net revenues	—	63	103

General and administrative	—	1	30
Provision for transaction losses	—	—	3
Amortization of acquired intangible assets	—	—	1
Total operating expenses	—	1	111
Income (loss) from operations of discontinued operations	—	(1)	(42)
Pre-tax gain on sale	—	12	3,868
Income from discontinued operations before income taxes	—	11	3,826
Income tax provision	—	(10)	(896)
Income from discontinued operations, net of income taxes	\$ —	\$ 1	\$ 2,930

(1) Includes StubHub financial results from January 1, 2020 to February 13, 2020 and the related gain on sale.

PayPal and Enterprise

For the years ended December 31, 2022, 2021 and 2020, the discontinued operations activity related to our former PayPal and Enterprise businesses was immaterial.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 5 — Goodwill and Intangible Assets
Goodwill

The following table presents goodwill activity for the periods indicated (in millions):

	December 31, 2020	Goodwill Acquired	Adjustments	December 31, 2021	Goodwill Acquired	Adjustments	December 31, 2022
Goodwill	\$ 4,285	\$ 22	\$ (129)	\$ 4,178	\$ 202	\$ (118)	\$ 4,262

Goodwill acquired during the year ended December 31, 2022 primarily related to the acquisition of TCGPlayer, see “Note 3 — Business Combinations” for additional information. The adjustments to goodwill during the years ended December 31, 2022 and 2021 were primarily due to foreign currency translation. There were no impairments to goodwill in 2022 and 2021.

Intangible Assets

Intangible assets are reported within other assets in our consolidated balance sheet. The following table presents components of identifiable intangible assets as of the dates indicated (in millions, except years):

	December 31, 2022				December 31, 2021			
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Useful Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Useful Life (Years)
Intangible assets:								
Customer lists and user base	\$ 190	\$ (190)	\$ —	0	\$ 203	\$ (203)	\$ —	0
Marketing related	68	(53)	15	7	57	(52)	5	3
Developed technologies	275	(177)	98	5	174	(174)	—	0
All other	159	(157)	2	3	159	(156)	3	3
Total	\$ 692	\$ (577)	\$ 115		\$ 593	\$ (585)	\$ 8	

Amortization expense for intangible assets was \$9 million, \$9 million and \$28 million for the years ended December 31, 2022, 2021 and 2020, respectively.

The following table presents expected future intangible asset amortization as of the date indicated (in millions):

	December 31, 2022
2023	\$ 26
2024	25
2025	22
2026	19
Thereafter	23
Total	\$ 115

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Note 6 — Segments

We have one operating and reportable segment. Our reportable segment is Marketplace, which includes our online marketplace located at www.ebay.com, its localized counterparts and the eBay suite of mobile apps. Our management and our CODM review financial information presented on a consolidated basis for purposes of allocating resources and evaluating performance and do not evaluate using asset information.

During the first quarter of 2020, we classified the results of our previous StubHub segment as discontinued operations in our consolidated statement of income for all periods presented. In addition, during the third quarter of 2020, we classified the results of our Classifieds segment as discontinued operations in our consolidated statement of income for the periods presented. During the second quarter of 2021, we classified the results of our eBay Korea business which was part of our Marketplace segment as discontinued operations in our consolidated statement of income for the periods presented. See “Note 4 — Discontinued Operations” for additional information.

The accounting policies of our segment are the same as those described in “Note 1 — The Company and Summary of Significant Accounting Policies.”

The following table summarizes the allocation of net revenues based on geography for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Net revenues by geography:			
U.S.	\$ 4,842	\$ 5,048	\$ 4,151
United Kingdom	1,579	1,913	1,678
Germany	1,023	1,249	1,106
Rest of world	2,351	2,210	1,959
Total net revenues	<u>\$ 9,795</u>	<u>\$ 10,420</u>	<u>\$ 8,894</u>

Net revenues, inclusive of the effects of foreign exchange during each period, are attributed to U.S. and international geographies primarily based upon the country in which the seller, platform that displays advertising, other service provider, or customer, as the case may be, is located. Long-lived assets attributed to the U.S. and international geographies are based upon the country in which the asset is located or owned.

The following table summarizes the allocation of long-lived tangible assets based on geography as of the dates indicated (in millions):

	December 31,	
	2022	2021
Long-lived tangible assets by geography:		
U.S.	\$ 1,656	\$ 1,400
International	96	125
Total long-lived tangible assets	<u>\$ 1,752</u>	<u>\$ 1,525</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 7 — Investments

The following tables summarize the unrealized gains and losses and estimated fair value of our investments classified as available-for-sale debt securities and restricted cash as of the dates indicated (in millions):

	December 31, 2022			
	Gross Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Short-term investments:				
Restricted cash	\$ 36	\$ —	\$ —	\$ 36
Corporate debt securities	2,355	—	(5)	2,350
Government and agency securities	141	—	(6)	135
	<u>\$ 2,532</u>	<u>\$ —</u>	<u>\$ (11)</u>	<u>\$ 2,521</u>
Long-term investments:				
Restricted cash	\$ 13	\$ —	\$ —	\$ 13
Corporate debt securities	686	—	(40)	646
Government and agency securities	604	—	(47)	557
	<u>\$ 1,303</u>	<u>\$ —</u>	<u>\$ (87)</u>	<u>\$ 1,216</u>

	December 31, 2021			
	Gross Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Short-term investments:				
Restricted cash	\$ 22	\$ —	\$ —	\$ 22
Corporate debt securities	4,151	1	—	4,152
Government and agency securities	25	—	—	25
	<u>\$ 4,198</u>	<u>\$ 1</u>	<u>\$ —</u>	<u>\$ 4,199</u>
Long-term investments:				
Corporate debt securities	\$ 954	\$ 1	\$ (5)	\$ 950
Government and agency securities	779	—	(2)	777
	<u>\$ 1,733</u>	<u>\$ 1</u>	<u>\$ (7)</u>	<u>\$ 1,727</u>

We consider cash to be restricted when withdrawal or general use is legally restricted. Restricted cash is held in interest bearing accounts for letters of credit related to our global sabbatical program and for certain amounts related to other compensation arrangements held in escrow. Our fixed-income investments consist of predominantly investment grade corporate debt securities and government and agency securities. The corporate debt and government and agency securities that we invest in are generally deemed to be low risk based on their credit ratings from the major rating agencies.

The longer the duration of these securities, the more susceptible they are to changes in market interest rates and bond yields. As interest rates increase, those securities purchased at a lower yield show a mark-to-market unrealized loss. The unrealized losses are due primarily to changes in credit spreads and interest rates. We regularly review investment securities for other-than-temporary impairment using both qualitative and quantitative criteria. Investments classified as available-for-sale debt securities are carried at fair value with changes reflected in other comprehensive income. Where there is an intention or a requirement to sell an impaired available-for-sale debt security, the entire impairment is recognized in earnings with a corresponding adjustment to the amortized cost basis of the security. From time to time, we sell available-for-sale debt securities in an unrealized loss position and recognize an immaterial loss.

We regularly review investment securities for credit impairment using both qualitative and quantitative criteria. In making this assessment, we consider the extent to which fair value is less than amortized cost, any changes to the rating of the security by a rating agency, any adverse conditions specifically related to the security, among other

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

factors. If this assessment indicates that a credit loss exists, the present value of cash flows expected to be collected from the security are compared to the amortized cost basis of the security. If the present value of cash flows expected to be collected is less than the amortized cost basis, a credit loss exists and an allowance for credit losses will be recorded through interest and other, net for the credit loss, limited by the amount that the fair value is less than the amortized cost basis. Any impairment that has not been recorded through an allowance for credit losses is recognized in other comprehensive income. We did not recognize any credit-related impairment through an allowance for credit losses as of December 31, 2022.

Investment securities in a continuous loss position for less than 12 months had an estimated fair value of \$2.8 billion and unrealized losses of \$32 million as of December 31, 2022, and an estimated fair value of \$3.1 billion and an immaterial amount of unrealized losses as of December 31, 2021. Investment securities in a continuous loss position for greater than 12 months had an estimated fair value of \$952 million and unrealized losses of \$66 million as of December 31, 2022, and there were no investment securities in a continuous loss position for greater than 12 months as of December 31, 2021. Refer to “Note 18 — Accumulated Other Comprehensive Income” for amounts reclassified to earnings from unrealized gains and losses.

The following table presents estimated fair values of our short-term and long-term investments classified as available-for-sale debt securities and restricted cash by date of contractual maturity as of the date indicated (in millions):

	December 31, 2022
One year or less (including restricted cash of \$36)	\$ 2,521
One year through two years (including restricted cash of \$13)	730
Two years through three years	357
Three years through four years	113
Four years through five years	16
Thereafter	—
Total	\$ 3,737

Equity Investments

The following table summarizes our equity investments as of the dates indicated (in millions):

	Balance Sheet Location	December 31,	
		2022	2021
Equity investments with readily determinable fair values	Short-term investments	\$ 104	\$ 1,745
Equity investment in Adevinta	Equity investment in Adevinta	2,692	5,391
Equity investments under the fair value option	Long-term investments	461	725
Equity investments under the equity method of accounting	Long-term investments	34	38
Equity investments without readily determinable fair values	Long-term investments	86	85
Total equity investments		\$ 3,377	\$ 7,984

Equity investment in Adevinta

We account for equity investments through which we exercise significant influence but do not have control over the investee under the fair value option or under the equity method. Our equity investment in Adevinta is accounted for under the fair value option.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Upon completion of the transfer of our Classifieds business to Adevinata on June 24, 2021, we received an equity investment of 44% in Adevinata valued at \$10.8 billion at the close of the transfer. On November 18, 2021, we completed the sale of approximately 135 million of our voting shares in Adevinata to Permira, inclusive of the option exercised by Permira to purchase additional voting shares, for total cash consideration of approximately \$2.3 billion. Additionally, we recognized a gain on the settlement of a related non-designated foreign exchange instrument of \$84 million in interest and other, net in the consolidated statement of income. At the close of the sale inclusive of the option exercised, our ownership in Adevinata was reduced to 33%. Following the sale in November 2021, our equity investment in Adevinata was reported in the long-term assets section on the consolidated balance sheet to reflect our contractual requirement to retain at least 25% of the total number of issued and outstanding equity securities of Adevinata until October 14, 2023, subject to certain exceptions specified in the agreement. As of December 31, 2022, our equity investment in Adevinata is reported in the short-term assets section on the consolidated balance sheet since our contractual requirement ends within twelve months of the balance sheet date.

At the initial recognition of our equity investment in Adevinata, we elected the fair value option where subsequent changes in fair value are recognized in earnings. The investment is classified within Level 1 in the fair value hierarchy as the valuation can be obtained from real time quotes in active markets. The fair value of the equity investment is measured based on Adevinata's closing stock price and prevailing foreign exchange rate at each balance sheet date and the changes in fair value are reflected in gain (loss) on equity investments and warrant, net in the consolidated statement of income. We believe the fair value option election creates more transparency of the current value in the equity investment in Adevinata.

For the years ended December 31, 2022 and 2021, unrealized losses of \$2,693 million and \$3,070 million, respectively, were recorded related to the change in fair value of the investment. During 2022, we sold a portion of our shares in Adevinata and recorded a realized gain on the change in fair value of shares sold of \$2 million. During 2021, we sold a portion of our shares in Adevinata and recorded a realized gain on sale of \$9 million which included an \$88 million gain recognized for cash proceeds from the sale of shares offset by a \$79 million loss on the change in fair value of shares sold. The fair value of the investment was \$2,692 million and \$5,391 million as of December 31, 2022 and December 31, 2021, respectively.

Equity investments with readily determinable fair values

Equity investments with readily determinable fair values are classified within Level 1 in the fair value hierarchy as the valuation can be obtained from real time quotes in active markets. These investments are reported within short-term investments in our consolidated balance sheet. Subsequent changes in fair value are reflected in gain (loss) on equity investments and warrant, net in the consolidated statement of income.

Equity investment in KakaoBank

In 2021, one of our equity investments, KakaoBank Corp. ("KakaoBank"), which previously did not have a readily determinable fair value, completed its initial public offering which resulted in this investment having a readily determinable fair value. The fair value of the equity investment is measured based on KakaoBank's closing stock price and prevailing foreign exchange rate at each balance sheet date. For the years ended December 31, 2022 and 2021, unrealized losses of \$218 million and unrealized gains of \$403 million, respectively, were recorded related to the change in fair value of the investment. During 2022, we sold a portion of our shares in KakaoBank for \$287 million and recorded realized losses on the change in fair value of shares sold of \$75 million. During 2021, we sold a portion of our shares in KakaoBank for \$114 million and recorded realized gains on the change in fair value of shares sold of \$83 million. The fair value of the investment was \$104 million and \$684 million as of December 31, 2022 and December 31, 2021, respectively.

Equity investment in Adyen

We entered into a warrant agreement in conjunction with a commercial agreement with Adyen that vests in a series of four tranches, at a specified price per share upon meeting processing volume milestone targets on a calendar year basis. When a relevant milestone is reached, the warrant becomes exercisable with respect to the corresponding tranche of warrant shares up until the warrant expiration date of January 31, 2025. In the fourth quarter of 2021, we met the processing volume milestone target to vest the first tranche of the warrant. Upon vesting of the first tranche, we exercised the option to purchase shares of Adyen valued at \$1.1 billion in exchange

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

for approximately \$110 million in cash. The fair value of the equity investment is measured based on Adyen's closing stock price and prevailing foreign exchange rate at each balance sheet date.

During 2022, we sold the remainder of our shares in Adyen for \$800 million and recorded realized losses of \$143 million on the change in fair value of shares sold and unrealized losses of \$118 million. As of December 31, 2021, the fair value of the investment was \$1,061 million. Refer to "Note 8 — Derivative Instruments" for more information about the warrant.

Equity investments under the fair value option

We account for equity investments through which we exercise significant influence but do not have control over the investee under the fair value option or under the equity method. Certain of our equity investments under the fair value option are measured using the net asset value per share (or its equivalent) practical expedient, and have not been classified in the fair value hierarchy. These investments are reported within long-term investments in our consolidated balance sheet, other than our equity interest in Adevinta which is included in short-term investments. Subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net in the consolidated statement of income.

Equity investment in Gmarket

During 2021, we completed the previously announced sale of 80.01% of the outstanding equity interests of eBay Korea to Emart. Upon completion of the sale, we retained 19.99% of the outstanding equity interest of the new entity, Gmarket, over whom we are able to exercise significant influence based on the terms of the securities purchase agreement, including through our board representation.

At the initial recognition of our equity investment in Gmarket, we elected the fair value option where subsequent changes in fair value are recognized in gain (loss) on equity investments and warrant, net in the consolidated statement of income. We believe the fair value option election creates more transparency of the current value in the equity investment in Gmarket. Our retained investment in Gmarket is subject to a two year right held by Emart to purchase the remaining interest at the close price of the sale.

During 2022, unrealized losses of \$294 million were recorded related to the change in fair value of our equity investment in Gmarket. As of December 31, 2022 and December 31, 2021, the fair value of the investment was \$431 million and \$725 million, respectively. Our equity investment in Gmarket is classified as Level 3 in the fair value hierarchy as the valuation reflects management's estimate of assumptions that market participants would use in pricing the equity investment. Refer to "Note 9 — Fair Value Measurement of Assets and Liabilities" for more information.

Other equity investments under the fair value option

During 2022, we purchased other immaterial equity investments which are accounted for under the fair value option and measured using the net asset value per share (or its equivalent) practical expedient. During 2022, unrealized losses of \$13 million were recorded related to the change in fair value of equity investments under the fair value option. As of December 31, 2022, the aggregate fair value of these investments was \$30 million.

Other equity method investments

We account for equity investments through which we exercise significant influence but do not have control over the investee under the fair value option or under equity method. For equity investments accounted for under the equity method, our consolidated results of operations include, as a component of gain (loss) on equity investments and warrant, net, our share of the net income or loss of the equity investments accounted for under the equity method of accounting. These investments are reported within long-term investments in our consolidated balance sheet. Our share of the net income or loss of equity method investments in 2022, 2021 and 2020 was immaterial.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Equity investments without readily determinable fair values

The following table summarizes the total carrying value related to equity investments without readily determinable fair values still held for the periods indicated (in millions):

	Year Ended December 31,	
	2022	2021
Carrying value, beginning of period	\$ 85	\$ 539
Additions	11	5
Upward adjustments for observable price changes	—	41
Downward adjustments for observable price changes and impairment	(7)	(170)
Transfers out from investments without readily determinable fair values	—	(312)
Foreign currency translation and other	(3)	(18)
Carrying value, end of period	<u>\$ 86</u>	<u>\$ 85</u>

In 2022, we recorded a downward adjustment for observable price change of \$7 million to the carrying values of strategic investments accounted for as equity investments without readily determinable fair values. The downward adjustments were recorded in gain (loss) on equity investments and warrant, net on our consolidated statement of income.

In 2021, we recorded an upward adjustment for observable price change of \$41 million and downward adjustments for impairment of \$170 million to the carrying values of strategic investments accounted for as equity investments without readily determinable fair values. The downward adjustments for impairment included a \$160 million impairment charge related to our equity investment in Paytm Mall, which resulted in no remaining carrying value for this equity investment. The upward and downward adjustments were recorded in gain (loss) on equity investments and warrant, net on our consolidated statement of income.

For such equity investments without readily determinable fair values still held at December 31, 2022, the cumulative upward adjustment for observable price changes was \$41 million and cumulative downward adjustment for observable price changes and impairments was \$298 million.

The following table summarizes unrealized gains and losses related to equity investments still held at December 31, 2022, 2021 and 2020 presented within gain (loss) on equity investments and warrant, net for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Net gains/(losses) recognized during the period on equity investments	\$ (4,152)	\$ (2,716)	\$ 200
Less: Net gains/(losses) recognized during the period on equity investments sold during the period ⁽¹⁾	(812)	92	—
Total unrealized gains/(losses) on equity investments still held at December 31, 2022, 2021 and 2020, respectively	<u>\$ (3,340)</u>	<u>\$ (2,808)</u>	<u>\$ 200</u>

(1) Includes gains/(losses) realized on the change in fair value of the shares sold on the respective dates of sale.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Summarized financial information of equity investments under the equity method and fair value option
Equity investment in Adevinta

Adevinta's financial information is prepared on the basis of International Financial Reporting Standards ("IFRS"). We have made certain adjustments to Adevinta's summarized financial information to address differences between IFRS and GAAP that materially impact the summarized financial information presented below. Any other differences between IFRS and GAAP did not have a material impact on Adevinta's summarized financial information. The following tables present Adevinta's summarized financial information on a one-quarter lag (in millions):

	Twelve months ended September 30, 2022	July 1, 2021 ⁽¹⁾ through September 30, 2021
Revenue	\$ 1,742	\$ 450
Gross profit	\$ 571	\$ 147
Income (loss) from continuing operations	\$ 65	\$ 3
Net income (loss)	\$ 56	\$ 4
Net income (loss) attributable to Adevinta	\$ 49	\$ 3

(1) The prior period presented commenced on June 24, 2021 when we retained an equity investment in Adevinta upon completion of the transfer of our Classifieds business. However, Adevinta's income statement activity for the stub period of June 24, 2021 to June 30, 2021 was excluded from the summarized income statement information as the impact was considered to be immaterial.

	September 30, 2022	September 30, 2021
Current assets	\$ 427	\$ 613
Noncurrent assets	\$ 13,281	\$ 16,424
Current liabilities	\$ 466	\$ 679
Noncurrent liabilities	\$ 3,124	\$ 4,044
Noncontrolling interests	\$ 13	\$ 20

Other equity investments accounted for under the equity method and fair value option

The following tables present summarized financial information of our equity investments accounted for under the equity method and the fair value option in the aggregate on a one-quarter lag. The tables below exclude the summarized financial information of our equity investment in Adevinta which is separately disclosed above.

Financial information of certain of these equity investments is prepared on the basis of local generally accepted accounting principles or IFRS. We have made certain adjustments as applicable to address differences between local generally accepted accounting principles or IFRS and US GAAP that materially impact the summarized financial information. Any other differences between US GAAP and local generally accepted accounting principles or IFRS did not have any material impact on the summarized financial information of the equity investments presented below in the aggregate. During the period in which we recognize an equity investment, the summarized financial information reflects activity from the date of recognition.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**Note 8 — Derivative Instruments**

Our primary objective in holding derivatives is to reduce the volatility of earnings and cash flows associated with changes in foreign currency exchange rates and interest rates. These hedging contracts reduce, but do not entirely eliminate, the impact of adverse foreign exchange rate and interest rate movements. We do not use any of our derivative instruments for trading purposes.

We use foreign currency exchange contracts to reduce the volatility of cash flows related to forecasted revenues, expenses, assets and liabilities, including intercompany balances denominated in foreign currencies. These contracts are generally one month to one year in duration, but with maturities up to 24 months. The objective of the foreign exchange contracts is to ensure that ultimately the U.S. dollar-equivalent cash flows are not adversely affected by changes in the applicable U.S. dollar/foreign currency exchange rate. We evaluate the effectiveness of our foreign exchange contracts designated as cash flow or net investment hedges on a quarterly basis.

In 2022, we entered into derivative instruments to hedge the variability of forecasted interest payments on anticipated debt issuance using forward-starting interest rate swaps. These interest rate swaps effectively fixed the benchmark interest rate and had the economic effect of hedging the variability of forecasted interest payments for up to 10 years on an anticipated debt issuance. Similar to other cash flow hedges, we recorded changes in the fair value of these interest rate swaps in accumulated other comprehensive income (loss) ("AOCI") until the anticipated debt issuance. In November 2022, we issued \$1.2 billion of senior unsecured notes, which consisted of notes maturing in 2025, 2027 and 2032. As a result, we terminated the interest rate swaps and the gain associated with the termination of approximately \$25 million will be amortized to interest expense over the term of our notes due in November 2032.

Additionally in 2020, we entered into derivative instruments to hedge the variability of forecasted interest payments on anticipated debt issuance using forward-starting interest rate swaps. These interest rate swaps effectively fix the benchmark interest rate and have the economic effect of hedging the variability of forecasted interest payments for up to 10 years on an anticipated debt issuance. Similar to other cash flow hedges, we recorded changes in the fair value of these interest rate swaps in AOCI until the anticipated debt issuance. In May 2021, we issued \$2.5 billion of senior unsecured notes, which consisted of notes maturing in 2026, 2031 and 2051. As a result, we terminated the interest rate swaps and the gain associated with the termination of approximately \$45 million is amortized to interest expense over the terms of our notes due in May 2026 and May 2031.

During 2020, we began to hedge the variability of the cash flows in interest payments associated with our floating-rate debt using interest rate swaps. These interest rate swap agreements effectively convert our floating-rate debt that is based on London Interbank Offered Rate ("LIBOR") to a fixed-rate basis, reducing the impact of interest-rate changes on future interest expense. The total notional amount of these interest swaps was \$400 million as of December 31, 2022 with terms calling for us to receive interest at a variable rate and to pay interest at a fixed rate. Our interest rate swap contracts have maturity dates in 2023. Similar to other cash flow hedges, we record changes in the fair value of these interest rate swaps in AOCI and their fair value will be amortized over the term of the debt to interest expense.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Cash Flow Hedges

For derivative instruments that are designated as cash flow hedges, the derivative's gain or loss is initially reported as a component of AOCI and subsequently reclassified into earnings in the same period the forecasted hedged transaction affects earnings. Derivative instruments designated as cash flow hedges must be de-designated as hedges when it is probable the forecasted hedged transaction will not occur in the initially identified time period or within a subsequent two-month time period. Unrealized gains and losses in AOCI associated with such derivative instruments are immediately reclassified into earnings. As of December 31, 2022, we have estimated that approximately \$61 million of net derivative gains related to our foreign exchange cash flow hedges and \$10 million net derivative gains related to our interest rate cash flow hedges included in accumulated other comprehensive income will be reclassified into earnings within the next 12 months. We classify cash flows related to our cash flow hedges as operating activities in our consolidated statement of cash flows.

Non-Designated Hedges

Our derivatives not designated as hedging instruments consist of foreign currency forward contracts that we primarily use to hedge monetary assets or liabilities, including intercompany balances and equity investments denominated in non-functional currencies. The gains and losses on our derivatives not designated as hedging instruments are recorded in interest and other, net, which are offset by the foreign currency gains and losses on the related assets and liabilities that are also recorded in interest and other, net. We classify cash flows related to our non-designated hedging instruments in the same line item as the cash flows of the related assets or liabilities, which is generally within operating activities in our consolidated statement of cash flows. Cash flows related to the settlement of non-designated hedging instruments related to equity investments are classified within investing activities in our consolidated statement of cash flows.

Warrant

We entered into a warrant agreement in conjunction with a commercial agreement with Adyen that, subject to meeting certain conditions, entitles us to acquire a fixed number of shares up to 5% of Adyen's fully diluted issued and outstanding share capital at a specific date. The warrant has a term of seven years and vests in a series of four tranches, at a specified price per share (fixed for the first two tranches) upon meeting processing volume milestone targets on a calendar year basis. When or if a relevant milestone is reached, the warrant becomes exercisable with respect to the corresponding tranche of warrant shares up until the warrant expiration date of January 31, 2025. The maximum number of tranches that can vest in one calendar year is two.

In 2021, we met the processing volume milestone target to vest the first tranche of the warrant. Upon vesting of the first tranche, we exercised the option to purchase shares of Adyen valued at approximately \$1.1 billion in exchange for approximately \$110 million in cash. During 2022, we sold the remainder of our shares in Adyen for \$800 million and recorded realized losses of \$143 million on the change in fair value of shares sold in gain (loss) on equity investments and warrant, net on our consolidated statement of income. Refer to "Note 7 — Investments" for more information about our equity investments.

The warrant is accounted for as a derivative under ASC Topic 815, *Derivatives and Hedging*. We report the warrant at fair value within warrant asset in our consolidated balance sheets and changes in the fair value of the warrant are recognized in gain (loss) on equity investments and warrant, net in our consolidated statement of income. The day-one value attributable to the other side of the warrant, which was recorded as a deferred credit, is reported within other liabilities in our consolidated balance sheets and is amortized over the life of the commercial arrangement. See "Note 9 — Fair Value Measurements" for information about the fair value measurement of the warrant.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Fair Value of Derivative Contracts

The following table presents the fair values of our outstanding derivative instruments as of the dates indicated (in millions):

		December 31,	
	Balance Sheet Location	2022	2021
Derivative Assets:			
Foreign exchange contracts designated as cash flow hedges	Other current assets	\$ 89	\$ 63
Foreign exchange contracts not designated as hedging instruments	Other current assets	18	22
Interest rate contracts designated as cash flow hedges	Other current assets	2	—
Warrant	Other assets	214	444
Foreign exchange contracts designated as cash flow hedges	Other assets	13	24
Total derivative assets		\$ 336	\$ 553
Derivative Liabilities:			
Foreign exchange contracts designated as cash flow hedges	Other current liabilities	\$ 12	\$ —
Foreign exchange contracts not designated as hedging instruments	Other current liabilities	34	17
Foreign exchange contracts designated as cash flow hedges	Other liabilities	1	—
Total derivative liabilities		\$ 47	\$ 17
Total fair value of derivative instruments		\$ 289	\$ 536

Under the master netting agreements with the respective counterparties to our derivative contracts, subject to applicable requirements, we are allowed to net settle transactions of the same type with a single net amount payable by one party to the other. However, we have elected to present the derivative assets and derivative liabilities on a gross basis on our consolidated balance sheet. As of December 31, 2022, the potential effect of rights of set-off associated with the foreign exchange contracts would be an offset to both assets and liabilities by \$41 million, resulting in net derivative assets of \$79 million and \$6 million net derivative liabilities. As of December 31, 2022, there is no effect of rights of set-off associated with the interest rate contracts, as there were only asset positions of \$2 million.

Effect of Derivative Contracts on Accumulated Other Comprehensive Income

The following tables present the activity of derivative instruments designated as cash flow hedges as of December 31, 2022 and 2021, and the impact of these derivative contracts on AOCI for the periods indicated (in millions):

	December 31, 2021	Amount of Gain (Loss) Recognized in Other Comprehensive Income	Less: Amount of Gain (Loss) Reclassified From AOCI to Earnings	December 31, 2022
Foreign exchange contracts designated as cash flow hedges	\$ 25	\$ 165	\$ 138	\$ 52
Interest rate contracts designated as cash flow hedges	40	31	9	62
Total	\$ 65	\$ 196	\$ 147	\$ 114

	December 31, 2020	Amount of Gain (Loss) Recognized in Other Comprehensive Income	Less: Amount of Gain (Loss) Reclassified From AOCI to Earnings	December 31, 2021
Foreign exchange contracts designated as cash flow hedges	\$ (95)	\$ 59	\$ (61)	\$ 25
Interest rate contracts designated as cash flow hedges	10	32	2	40
Total	\$ (85)	\$ 91	\$ (59)	\$ 65

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Effect of Derivative Contracts on Consolidated Statement of Income

The following table summarizes the total gain (loss) recognized in the consolidated statement of income from our foreign exchange derivative contracts by location for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Foreign exchange contracts designated as cash flow hedges recognized in net revenues	\$ 140	\$ (65)	\$ 15
Foreign exchange contracts designated as cash flow hedges recognized in cost of net revenues	(2)	4	—
Foreign exchange contracts not designated as hedging instruments recognized in interest and other, net	20	11	(18)
Total gain (loss) recognized from foreign exchange derivative contracts in the consolidated statement of income	<u>\$ 158</u>	<u>\$ (50)</u>	<u>\$ (3)</u>

The following table summarizes the total gain (loss) recognized in the consolidated statement of income from our interest rate derivative contracts by location for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Gain (loss) from interest rate contracts designated as cash flow hedges recognized in interest and other, net	9	2	—
Total gain (loss) recognized from interest rate derivative contracts in the consolidated statement of income	<u>\$ 9</u>	<u>\$ 2</u>	<u>\$ —</u>

The following table summarizes the total gain recognized in the consolidated statement of income due to changes in the fair value of the warrant for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Gain (loss) attributable to changes in the fair value of warrant recognized in gain (loss) on equity investments and warrant, net	\$ (230)	\$ 354	\$ 770

Notional Amounts of Derivative Contracts

Derivative transactions are measured in terms of the notional amount, but this amount is not recorded on the balance sheet and is not, when viewed in isolation, a meaningful measure of the risk profile of the instruments. The notional amount is generally not exchanged, but is used only as the basis on which the value of foreign exchange payments under these contracts are determined. The following table presents the notional amounts of our outstanding derivatives as of the dates indicated (in millions):

	December 31,	
	2022	2021
Foreign exchange contracts designated as cash flow hedges	\$ 1,741	\$ 2,066
Foreign exchange contracts not designated as hedging instruments	2,181	3,159
Interest rate contracts designated as cash flow hedges	400	400
Total	<u>\$ 4,322</u>	<u>\$ 5,625</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Credit Risk***

Our derivatives expose us to credit risk to the extent that the counterparties may be unable to meet the terms of the arrangement. We seek to mitigate such risk by limiting our counterparties to, and by spreading the risk across, major financial institutions. In addition, the potential risk of loss with any one counterparty resulting from this type of credit risk is monitored on an ongoing basis. To further limit credit risk, we also enter into collateral security arrangements related to certain interest rate derivative instruments whereby collateral is posted between counterparties if the fair value of the derivative instrument exceeds certain thresholds. Additional collateral would be required in the event of a significant credit downgrade by either party. We are not required to pledge, nor are we entitled to receive, collateral related to our foreign exchange derivative transactions.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 9 — Fair Value Measurement of Assets and Liabilities

The following tables present our financial assets and liabilities measured at fair value on a recurring basis as of the dates indicated (in millions):

	December 31, 2022	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Liabilities:				
Derivatives	\$ 17	\$ —	\$ 17	\$ —

Our financial assets and liabilities are valued using market prices on both active markets (Level 1), less active markets (Level 2) and little or no market activity (Level 3). Level 1 instrument valuations are obtained from real-time quotes for transactions in active exchange markets involving identical assets. Level 2 instrument valuations are obtained from readily available pricing sources for comparable instruments, identical instruments in less active markets, or models using market observable inputs. Level 3 instrument valuations typically reflect management's estimate of assumptions that market participants would use in pricing the asset or liability. We did not have any transfers of financial instruments between valuation levels during 2022 or 2021.

Other financial instruments, including accounts receivable and accounts payable, are carried at cost, which approximates their fair value because of the short-term nature of these instruments.

Fair value measurement of derivative instruments

The majority of our derivative instruments are valued using pricing models that take into account the contract terms as well as multiple inputs where applicable, such as equity prices, interest rate yield curves, option volatility and currency rates. Our warrant, which is accounted for as a derivative instrument, is valued using a Black-Scholes model. Key assumptions used in the valuation include risk-free interest rates; Adyen's common stock price, equity volatility and common stock outstanding; exercise price; and details specific to the warrant. The value is also probability adjusted for management's assumptions with respect to vesting of the remaining three tranches which are each subject to meeting processing volume milestone targets. These assumptions and the probability of meeting processing volume milestone targets may have a significant impact on the value of the warrant. Refer to "Note 8 — Derivative Instruments" for further details on our derivative instruments.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table presents a reconciliation of the opening to closing balance of the warrant measured using significant unobservable inputs (Level 3) as of the dates indicated (in millions):

	December 31,	
	2022	2021
Opening balance at beginning of period	\$ 444	\$ 1,051
Exercise of options under warrant	—	(961)
Change in fair value	(230)	354
Closing balance at end of period	<u>\$ 214</u>	<u>\$ 444</u>

The following table presents quantitative information about Level 3 significant unobservable inputs used in the fair value measurement of the warrant as of December 31, 2022 (in millions, except percentages):

	Fair value	Valuation technique	Unobservable Input	Range (weighted average) ⁽¹⁾
Warrant	\$ 214	Black-Scholes and Monte Carlo	Probability of vesting Equity volatility	0.0% - 55.0% (48.3%) (49%)

(1) Probability of vesting were weighted by the unadjusted value of the tranches. For volatility, the average represents the arithmetic average of the points within the range and is not weighted by the relative fair value or notional amount.

Fair value measurement of equity investments

Certain of our equity investments are measured at fair value on a recurring basis, including our equity investment in Adevinta, equity investments with readily determinable fair values and equity investment under the fair value option.

Our equity investment in Adevinta is accounted for under the fair value option and classified within Level 1 in the fair value hierarchy as the fair value is measured based on Adevinta's closing stock price and prevailing foreign exchange rate at each balance sheet date. Our equity investments with readily determinable fair values are also classified within Level 1 in the fair value hierarchy as the valuation can be obtained from real time quotes in active markets.

Our equity investment in Gmarket was initially recognized on November 14, 2021 in connection with the sale of 80.01% of the outstanding equity interests of eBay Korea to Emart. This equity investment is accounted for under the fair value option and its initial valuation of \$725 million was based on the sale price of eBay Korea. Our investment in Gmarket is subject to a two year right held by Emart from the date of disposal to purchase the remaining interest at or near the closing price of the sale.

The following table presents a reconciliation of the opening to closing balance of the equity investment in Gmarket measured using significant unobservable inputs (Level 3) as of the dates indicated (in millions):

	December 31,	
	2022	2021 ⁽¹⁾
Opening balance at beginning of period	\$ 725	\$ —
Recognition of equity investment	—	728
Change in fair value	(294)	(3)
Closing balance at end of period	<u>\$ 431</u>	<u>\$ 725</u>

(1) There were no indicators of a potential material change in fair value of the investment between the date of recognition and December 31, 2021. The fair value of the investment was \$725 million as of December 31, 2021 due to foreign currency adjustments.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

This investment is classified within Level 3 in the fair value hierarchy as valuation of the investment reflects management's estimate of assumptions that market participants would use in pricing the asset. The following table presents quantitative information about Level 3 significant unobservable inputs used in the fair value measurement of the equity investment in Gmarket as of December 31, 2022 that may have a significant impact on the overall valuation (in millions):

	Fair value	Valuation technique	Unobservable Input ⁽¹⁾	Range
Equity investment in Gmarket	\$ 431	Market multiples	Revenue multiple — GPC method	1.1x — 2.0x
			Revenue multiple — GMAC method	1.3x — 4.1x

(1) The primary unobservable inputs used in the fair value measurement of our equity investment in Gmarket under the fair value option, when using the Guideline Public Company (GPC) method and the Guideline Merged and Acquired Company (GMAC) method under the market multiple approach, are the respective revenue multiples. Significant increases (decreases) in the revenue multiples in isolation would result in significantly higher (lower) fair value measurement. The market multiples are derived from respective groups of guideline public companies and guideline merged and acquired companies.

Certain other immaterial equity investments under the fair value option aggregating to \$30 million as of December 31, 2022 are measured at fair value using the net asset value per share (or its equivalent) practical expedient, and have not been classified in the fair value hierarchy.

Refer to "Note 7 — Investments" for further details about our equity investments.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Note 10 — Supplemental Consolidated Financial Information
Contract Balances

Timing of revenue recognition may differ from the timing of invoicing to customers. Accounts receivable represents amounts invoiced and revenue recognized prior to invoicing when we have satisfied our performance obligation and have the unconditional right to payment. The allowance for doubtful accounts and authorized credits is estimated based upon our assessment of various factors including historical experience, the age of the accounts receivable balances, current economic conditions reasonable and supportable forecasts and other factors that may affect our customers' ability to pay. The allowance for doubtful accounts and authorized credits was \$42 million and \$74 million as of December 31, 2022 and December 31, 2021, respectively. As of December 31, 2022, we reported allowances for doubtful accounts of \$16 million reflecting a decrease of \$26 million, net of write-offs of \$42 million for the year ended December 31, 2022.

Deferred revenue consists of fees received related to unsatisfied performance obligations at the end of the period. Due to the generally short-term duration of contracts, the majority of the performance obligations are satisfied in the following reporting period. The amount of revenue recognized during the year ended December 31, 2022 that was included in the deferred revenue balance at the beginning of the period was \$38 million. The amount of revenue recognized during the year ended December 31, 2021 that was included in the deferred revenue balance at the beginning of the period was \$47 million.

Total short-term debt		1,150		1,355	
Total Debt		\$ 8,871		\$ 9,082	

(1) Includes the fair value adjustments to debt associated with terminated interest rate swaps which are being recorded as a reduction to interest expense over the remaining term of the related notes.

Senior Notes

During the first quarter of 2022, we redeemed the \$750 million aggregate principal amount of the 3.800% senior notes due 2022. Total cash consideration paid was \$750 million as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

During the second quarter of 2022, we redeemed the \$605 million aggregate principal amount of the 2.600% senior notes due 2022. Total cash consideration paid was \$605 million, as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

In November 2022, we issued senior notes of \$1.2 billion aggregate principal amount, which consisted of \$425 million of 5.900% fixed rate notes due 2025, \$300 million of 5.950% fixed rate notes due to 2027 and \$425 million of 6.300% fixed rate notes due 2032.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

In 2021, we redeemed the \$750 million aggregate principal amount of the 6.000% senior notes due 2056. Total cash consideration paid was \$750 million, as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

In 2021, we settled cash tender offers with holders of approximately 39% of the total outstanding \$1 billion aggregate principal amount of the 2.600% senior fixed rate notes due 2022. Total cash consideration paid for these purchases was \$405 million and the carrying amount of the notes was \$395 million, resulting in a loss on extinguishment of \$10 million (including immaterial fees and other costs associated with the tender), which was recorded in interest and other, net in our consolidated statement of income. In addition, we paid any accrued interest on the tendered notes up to, but not including the date of settlement.

In 2021, we issued senior notes, in an aggregate principal amount of \$2.5 billion, which consisted of \$750 million of 1.400% fixed rate notes due 2026, \$750 million of 2.600% fixed rate notes due to 2031 and \$1.0 billion of 3.650% fixed rate notes due 2051.

None of the floating rate notes are redeemable prior to maturity. We may redeem some or all of the other fixed rate notes of each series at any time and from time to time prior to their maturity, generally at a make-whole redemption price, plus accrued and unpaid interest.

If a change of control triggering event (as defined in the applicable senior notes) occurs with respect to the floating rate notes due 2023, the 2.750% fixed rate notes due 2023, the 1.900% fixed rate notes due 2025, the 5.900% fixed rate notes due 2025, the 1.400% fixed rate notes due 2026, the 3.600% fixed rate notes due 2027, the 5.950% fixed rate notes due 2027, the 2.700% fixed rate notes due 2030, the 2.600% fixed rate notes due 2031, the 6.300% fixed rate notes due 2032, or the 3.650% fixed rate notes due 2051, we must, subject to certain exceptions, offer to repurchase all of the notes of the applicable series at a price equal to 101% of the principal amount, plus accrued and unpaid interest.

The indenture pursuant to which the senior notes were issued includes customary covenants that, among other things and subject to exceptions, limit our ability to incur, assume or guarantee debt secured by liens on specified assets or enter into sale and lease-back transactions with respect to specified properties, and also includes customary events of default with customary grace periods in certain circumstances, including payment defaults and bankruptcy-related defaults.

To help achieve our interest rate risk management objectives, during the second quarter of 2020, we entered into interest rate swap agreements that effectively converted \$400 million of our LIBOR-based floating-rate debt to a fixed-rate basis. During the second quarter of 2022, we entered into derivative instruments to hedge the variability of forecasted interest payments on anticipated debt issuance using forward-starting interest rate swaps. In November 2022, we issued \$1.2 billion of senior unsecured notes, which consisted of notes maturing in 2025, 2027 and 2032. As a result, we terminated the interest rate swaps and the gain associated with the termination of approximately \$25 million will be amortized to interest expense over the term of our notes due in November 2032.

The effective interest rates for our senior notes include the interest payable, the amortization of debt issuance costs and the amortization of any original issue discount and premium on these senior notes. Interest on these senior notes is payable either quarterly or semiannually. Interest expense associated with these senior notes, including amortization of debt issuance costs, during the years ended December 31, 2022, 2021 and 2020 was approximately \$231 million, \$257 million and \$284 million, respectively. As of December 31, 2022 and 2021, the estimated fair value of these senior notes, using Level 2 inputs, was approximately \$8.0 billion and \$9.5 billion, respectively.

Commercial Paper

We have a commercial paper program pursuant to which we may issue commercial paper notes in an aggregate principal amount at maturity of up to \$1.5 billion outstanding at any time with maturities of up to 397 days from the date of issue. As of December 31, 2022, there were no commercial paper notes outstanding.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)***Credit Agreement***

In March 2020, we entered into a credit agreement that provides for an unsecured \$2 billion five-year credit facility. We may also, subject to the agreement of the applicable lenders, increase commitments under the revolving credit facility by up to \$1 billion. Funds borrowed under the credit agreement may be used for working capital, capital expenditures, acquisitions and other general corporate purposes.

As of December 31, 2022, no borrowings were outstanding under our \$2 billion credit agreement. However, as described above, we have an up to \$1.5 billion commercial paper program and are required to maintain available borrowing capacity under our credit agreement in order to repay commercial paper borrowings in the event we are unable to repay those borrowings from other sources when they become due, in an aggregate amount of \$1.5 billion. As of December 31, 2022, no borrowings were outstanding under our commercial paper program; therefore, \$2 billion of borrowing capacity was available for other purposes permitted by the credit agreement, subject to customary conditions to borrowing. The credit agreement includes a covenant limiting our consolidated leverage ratio to no more than 4.0:1.0, subject to, upon the occurrence of a qualified material acquisition, if so elected by us, a step-up to 4.5:1.0 for the four fiscal quarters completed following such qualified material acquisition. The credit agreement includes customary events of default, with corresponding grace periods in certain circumstances, including payment defaults, cross-defaults and bankruptcy-related defaults. In addition, the credit agreement contains customary affirmative and negative covenants, including restrictions regarding the incurrence of liens and subsidiary indebtedness, in each case, subject to customary exceptions. The credit agreement also contains customary representations and warranties.

We were in compliance with all financial covenants in our outstanding debt instruments for the period ended December 31, 2022.

Future Maturities

The following table presents expected future principal maturities as of the date indicated (in millions):

	December 31, 2022
Fiscal Years:	
2023	\$ 1,150
2024	750
2025	1,225
2026	750
2027	1,150
Thereafter	3,875
Total future maturities	<u>\$ 8,900</u>

In January 2023, the company redeemed the \$750 million aggregate principal amount of the 2.750% senior notes due 2023. Total cash consideration paid was \$750 million, as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

Additionally in January 2023, the company redeemed the \$400 million aggregate principal amount of the floating rate senior notes due 2023. Total cash consideration paid was \$400 million, as the redemption price was equal to 100% of the principal amount. In addition, we paid accrued and unpaid interest on the principal amount.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)
Note 12 — Leases

We have operating leases for office space, data centers and other corporate assets that we utilize under lease arrangements.

The following table presents a summary of leases by balance sheet location as of the dates indicated (in millions):

	Balance Sheet Location	December 31,	
		2022	2021
Assets			
Operating	Operating lease right-of-use ("ROU") assets	\$ 513	\$ 289
Liabilities			
Operating - current	Accrued expenses and other current liabilities	\$ 131	\$ 150
Operating - noncurrent	Operating lease liabilities	418	200
Total lease liabilities		\$ 549	\$ 350

The following table presents components of lease expense for the periods indicated (in millions):

	Statement of Income Location	Year Ended December 31,		
		2022	2021	2020
Operating lease costs ⁽¹⁾	Cost of net revenues, Sales and marketing, Product development and General and administrative expenses	\$ 132	\$ 178	\$ 160

(1) Includes variable lease payments and sublease income that were immaterial for the years ended December 31, 2022, 2021 and 2020.

The following table presents the maturity of lease liabilities under our non-cancelable operating leases as of the date indicated (in millions):

	December 31, 2022
2023	\$ 148
2024	115
2025	102
2026	87
2027	83
Thereafter	67
Total lease payments	<u>602</u>
Less interest	(53)
Present value of lease liabilities	<u>\$ 549</u>

As of December 31, 2022, we have non-cancellable operating leases for office space and data centers that have not commenced with fixed lease payment obligations of \$93 million, with \$1 million payable within 12 months. We are not involved in the construction or design of underlying assets.

Rent expense for the years ended December 31, 2022, 2021 and 2020 totaled \$144 million, \$192 million and \$176 million, respectively. Rent expense includes operating lease costs as well as expense for non-lease components such as common area maintenance.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table presents supplemental information related to our leases included in the consolidated balance sheet as of the dates indicated:

	December 31,	
	2022	2021
Weighted average remaining lease term		
Operating leases	5.15 years	3.11 years
Weighted average discount rate		
Operating leases	3.60 %	2.06 %

The following table presents supplemental information related to our leases for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Cash paid for amounts included in the measurement of lease liabilities:			
Operating cash flows from operating leases	\$ 159	\$ 165	\$ 145
ROU assets obtained in exchange for new lease obligations:			
Operating leases	\$ 354	\$ 38	\$ 84

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 13 — Commitments and Contingencies***Off-Balance Sheet Arrangements***

As of December 31, 2022, we had no off-balance sheet arrangements that have, or are reasonably likely to have, a current or future material effect on our consolidated financial condition, results of operations, liquidity, capital expenditures or capital resources.

We have a cash pooling arrangement with a financial institution for cash management purposes. This arrangement allows for cash withdrawals from the financial institution based upon our aggregate operating cash balances held within the same financial institution ("Aggregate Cash Deposits"). This arrangement also allows us to withdraw amounts exceeding the Aggregate Cash Deposits up to an agreed-upon limit. The net balance of the withdrawals and the Aggregate Cash Deposits are used by the financial institution as a basis for calculating our net interest expense or income under the arrangement. As of December 31, 2022, we had a total of \$246 million in aggregate cash deposits, partially offset by \$32 million in cash withdrawals, held within the financial institution under the cash pooling arrangement.

Litigation and Other Legal Matters***Overview***

We are involved in legal and regulatory proceedings on an ongoing basis. Many of these proceedings are in early stages and may seek an indeterminate amount of damages. If we believe that a loss arising from such matters is probable and can be reasonably estimated, we accrue the estimated liability in our financial statements. If only a range of estimated losses can be determined, we accrue an amount within the range that, in our judgment, reflects the most likely outcome; if none of the estimates within that range is a better estimate than any other amount, we accrue the low end of the range. For those proceedings in which an unfavorable outcome is reasonably possible but not probable, we have disclosed an estimate of the reasonably possible loss or range of losses or we have concluded that an estimate of the reasonably possible loss or range of losses arising directly from the proceeding (i.e., monetary damages or amounts paid in judgment or settlement) is not material. If we cannot estimate the probable or reasonably possible loss or range of losses arising from a proceeding, we have disclosed that fact. In assessing the materiality of a proceeding, we evaluate, among other factors, the amount of monetary damages claimed, as well as the potential impact of non-monetary remedies sought by plaintiffs (e.g., injunctive relief) that may require us to change our business practices in a manner that could have a material adverse impact on our business. With respect to the matters disclosed in this Overview, we are unable to estimate the possible loss or range of losses that could potentially result from the application of such non-monetary remedies.

Amounts accrued for legal and regulatory proceedings for which we believe a loss is probable were not material for the year ended December 31, 2022. We have concluded, based on currently available information, that reasonably possible losses arising directly from the proceedings (i.e., monetary damages or amounts paid in judgment or settlement) in excess of our recorded accruals are also not material. However, legal and regulatory proceedings are inherently unpredictable and subject to significant uncertainties. If one or more matters were resolved against us in a reporting period for amounts in excess of management's expectations, the impact on our operating results or financial condition for that reporting period could be material. Legal fees are expensed as incurred.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)*General Matters*

Third parties have from time to time claimed, and others may claim in the future, that we have infringed their intellectual property rights. We are subject to patent disputes, and expect that we could be subject to additional patent infringement claims involving various aspects of our business as our products and services continue to expand in scope and complexity. Such claims may be brought directly or indirectly against us and/or against our customers (who may be entitled to contractual indemnification under their contracts with us), and we are subject to increased exposure to such claims as a result of our acquisitions and divestitures and in cases where we are entering new lines of business. We have in the past been forced to litigate such claims. We may also become more vulnerable to third-party claims as laws such as the Digital Millennium Copyright Act, the Lanham Act and the Communications Decency Act are interpreted by the courts, and as we expand the scope of our business (both in terms of the range of products and services that we offer and our geographical operations) and become subject to laws in jurisdictions where the underlying laws with respect to the potential liability of online intermediaries like ourselves are either unclear or less favorable. We believe that additional lawsuits alleging that we have violated patent, copyright or trademark laws will be filed against us. Intellectual property claims, whether meritorious or not, are time consuming and costly to defend and resolve, could require expensive changes in our methods of doing business or could require us to enter into costly royalty or licensing agreements on unfavorable terms.

From time to time, we are involved in other disputes or regulatory inquiries that arise in the ordinary course of business, including suits by our users (individually or as class actions) alleging, among other things, improper disclosure of our prices, rules or policies, that our practices, prices, rules, policies or customer/user agreements violate applicable law or that we have acted unfairly and/or not acted in conformity with such practices, prices, rules, policies or agreements. Further, the number and significance of these disputes and inquiries are increasing as the political and regulatory landscape changes and, as we have grown larger, our businesses have expanded in scope (both in terms of the range of products and services that we offer and our geographical operations) and our products and services have increased in complexity. Any claims or regulatory actions against us, whether meritorious or not, could be time consuming, result in costly litigation, damage awards (including statutory damages for certain causes of action in certain jurisdictions), injunctive relief or increased costs of doing business through adverse judgment or settlement, require us to change our business practices in expensive ways, require significant amounts of management time, result in the diversion of significant operational resources or otherwise harm our business.

From time to time, the Company receives subpoenas or requests for information from various government agencies, typically for potential misconduct by sellers on the Company's Marketplace platforms. More recently, the Company has received subpoenas or requests for information from government agencies related to potential liability of the Company for products sold by sellers on the Marketplace platforms. The Company generally responds to government subpoenas and requests in the ordinary course of business and in a cooperative, thorough and timely manner. These responses sometimes require time and effort and can result in considerable costs being incurred by the Company.

In this regard, the Company has responded to inquiries from the U.S. Department of Justice ("DOJ") regarding products sold on the Marketplace platforms alleged to violate certain laws and regulations, including regulations of the Environmental Protection Agency ("EPA") and, separately, regulations of the Drug Enforcement Agency. The inquiries relate to whether and to what extent the Company should be liable for the sale of regulated or illicit products manufactured and sold by others who listed such products on Marketplace platforms in a manner that evaded and/or was designed to evade detection by the Company. With respect to the inquiries regarding EPA regulations, the EPA, DOJ and the Company have begun discussions relating to allegations of noncompliance arising under the Clean Air Act, among other alleged violations, which discussions include a potential settlement. If the Company is found to be liable for such activities on the Marketplace, it likely will be subject to monetary damages, changes in our business practices, or other remedies that could have a material adverse impact on our business.

The Company is also responding to inquiries from the U.S. Attorney for the District of Massachusetts regarding potential criminal liability of the Company arising from the stalking and harassment in 2019 of the editor and publisher of Ecommercebytes, a website that publishes ecommerce news and information. Six former Company employees and one former contractor have pleaded guilty to crimes arising from the conduct. The Company has begun discussions with the U.S. Attorney's Office, which discussions include a potential settlement. We expect any

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

such settlement may include fines, other payments, and non-monetary remedies, such as additional remediation, compliance and reporting requirements. Although the Company has concluded that losses in the U.S. Attorney matter are probable, we are unable at this time to estimate the losses that may be incurred because the matter is still under investigation and involves open questions relevant to the Company's potential liability for conduct of its former employees. The editor and publisher also have a pending civil action against the Company, which seeks unspecified damages arising from the above-described conduct.

In connection with the government matters and civil action described above, the Company to date has accrued for probable losses of approximately \$64 million in the aggregate. Given the uncertainties involved, the ultimate resolution of these matters could result in additional losses that may be material to our financial results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of our net income or loss for that period.

Indemnification Provisions

We entered into a separation and distribution agreement and various other agreements with PayPal to govern the separation and relationship of the two companies. These agreements provide for specific indemnity and liability obligations and could lead to disputes between us and PayPal, which may be significant. In addition, the indemnity rights we have against PayPal under the agreements may not be sufficient to protect us and our indemnity obligations to PayPal may be significant.

In addition, we have entered into indemnification agreements with each of our directors, executive officers and certain other officers. These agreements require us to indemnify such individuals, to the fullest extent permitted by Delaware law, for certain liabilities to which they may become subject as a result of their affiliation with us.

In the ordinary course of business, we have included limited indemnification provisions in certain of our agreements with parties with which we have commercial relations, including our standard marketing, promotions and application programming interface license agreements. Under these contracts, we generally indemnify, hold harmless and agree to reimburse the indemnified party for losses suffered or incurred by the indemnified party in connection with claims by a third party with respect to our domain names, trademarks, logos and other branding elements to the extent that such marks are applicable to our performance under the subject agreement. In certain cases, we have agreed to provide indemnification for intellectual property infringement. It is not possible to determine the maximum potential loss under these indemnification provisions due to our limited history of prior indemnification claims and the unique facts and circumstances involved in each particular provision. To date, losses recorded in our consolidated statement of income in connection with our indemnification provisions have not been significant, either individually or collectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 14 — Stockholders' Equity***Preferred Stock***

We are authorized, subject to limitations prescribed by Delaware law, to issue preferred stock in one or more series; to establish the number of shares included within each series; to fix the rights, preferences and privileges of the shares of each wholly unissued series and any related qualifications, limitations or restrictions; and to increase or decrease the number of shares of any series (but not below the number of shares of a series then outstanding) without any further vote or action by our stockholders. As of December 31, 2022 and 2021, there were 10 million shares of \$0.001 par value preferred stock authorized for issuance, and no shares issued or outstanding.

Common Stock

Our Amended and Restated Certificate of Incorporation authorizes us to issue 3.6 billion shares of common stock.

Stock Repurchase Programs

Our stock repurchase programs are intended to programmatically offset the impact of dilution from our equity compensation programs and, subject to market conditions and other factors, to make opportunistic and programmatic repurchases of our common stock to reduce our outstanding share count. Any share repurchases under our stock repurchase programs may be made through open market transactions, block trades, privately negotiated transactions (including accelerated share repurchase transactions) or other means at times and in such amounts as management deems appropriate and will be funded from our working capital or other financing alternatives. Our stock repurchase programs may be limited or terminated at any time without prior notice. The timing and actual number of shares repurchased will depend on a variety of factors, including corporate and regulatory requirements, price and other market conditions and management's determination as to the appropriate use of our cash.

In February 2022, our Board authorized an additional \$4.0 billion stock repurchase program with no expiration from the date of authorization.

On October 29, 2021, we entered into accelerated share repurchase agreements (the "2021 ASR Agreements") with two financial institutions (each a "2021 ASR Counterparty"), as part of our share repurchase program. Under the 2021 ASR Agreements, we paid an aggregate amount of \$2.5 billion to the 2021 ASR Counterparties and received an initial delivery of approximately 29.3 million shares of our common stock, which were recorded as a \$2.1 billion increase to treasury stock. In December 2021, the 2021 ASR Agreement with one of the 2021 ASR Counterparties settled and resulted in a delivery of approximately 3.4 million additional shares of our common stock, which were recorded as a \$188 million increase to treasury stock. The remaining \$188 million was evaluated as an unsettled forward contract indexed to our own stock, classified within stockholders' equity as of December 31, 2021.

In January 2022, the 2021 ASR Agreement with the remaining 2021 ASR Counterparty settled and resulted in a delivery of approximately 3.3 million additional shares of our common stock. The related forward contract was settled and recorded as a \$188 million increase to treasury stock during 2022. In total under the 2021 ASR Agreements, approximately 36.0 million shares were repurchased at an average price per share of \$69.43.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table summarizes repurchase activity under our stock repurchase programs during 2022 (in millions, except per share amounts):

	Shares Repurchased ⁽¹⁾	Average Price per Share ⁽²⁾	Value of Shares Repurchased ⁽²⁾	Remaining Amount Authorized
Balance as of January 1, 2022				\$ 1,991
Authorization of additional plan in February 2022				4,000
Repurchase of shares of common stock	62	\$ 51.45	\$ 3,143	(3,143)
Accelerated share repurchases ⁽³⁾	3		\$ —	—
Balance as of December 31, 2022				<u>\$ 2,848</u>

- (1) These repurchased shares of common stock were recorded as treasury stock and were accounted for under the cost method. None of the repurchased shares of common stock have been retired.
- (2) Excludes broker commissions.
- (3) As indicated above, in January 2022, the 2021 ASR Agreement with the remaining ASR Counterparty settled and resulted in delivery of approximately 3.3 million additional shares.

Dividends

The company paid a total of \$489 million, \$466 million and \$447 million in cash dividends during the years ended December 31, 2022, 2021 and 2020, respectively. In February 2023, we declared a quarterly cash dividend of \$0.25 per share of common stock to be paid on March 24, 2023 to stockholders of record as of March 10, 2023.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**Note 15 — Employee Benefit Plans*****Equity Incentive Plans***

We have equity incentive plans under which we grant equity awards, including stock options, restricted stock units (“RSUs”), performance-based restricted stock units (“PBRsUs”), stock payment awards, performance share units and total shareholder return performance share units (“TSR PSUs”), to our directors, officers and employees. As of December 31, 2022, 755 million shares were authorized under our equity incentive plans and 27 million shares were available for future grant.

RSU awards granted to eligible employees under our equity incentive plans generally vest in annual or quarterly installments over a period of three to five years, are subject to the employees’ continuing service to us and do not have an expiration date.

In 2022, 2021 and 2020, certain executives were eligible to receive PBRsUs. PBRsU awards are subject to performance and time-based vesting requirements. The target number of shares subject to the PBRsU award are adjusted based on our business performance measured against the performance goals approved by the Compensation and Human Capital Committee at the beginning of the performance period. Generally, if the performance criteria are satisfied, one-half of the award vests in March following the end of the performance period and the other half of the award vests in March of the following year.

During 2020, our Chief Executive Officer was granted TSR PSUs with performance and time-based vesting requirements. The number of stock units ultimately received will depend on our total shareholder return relative to that of the S&P 500 index over two and three year measurement periods. The target number of shares will be divided into two tranches, with each tranche corresponding to 50% of the target shares. The first tranche vested in full on the second anniversary of the grant date and second tranche will vest on the third anniversary of the grant date.

Deferred Stock Units

Prior to December 31, 2016, we granted deferred stock units to each non-employee director (other than Mr. Omidyar) at the time of our annual meeting of stockholders and to new non-employee directors upon their election to the Board. Each deferred stock unit award granted to a new non-employee director upon election to the Board vests 25% one year from the date of grant, and at a rate of 2.08% per month thereafter. In addition, directors were permitted to elect to receive, in lieu of annual retainer and committee chair fees and at the time these fees would otherwise be payable, fully vested deferred stock units with an initial value equal to the amount based on the fair market value of common stock at the date of grant. Following termination of a non-employee director’s service on the Board, deferred stock units granted prior to August 1, 2013 are payable in stock or cash (at our election), while deferred stock units granted on or after August 1, 2013 are payable solely in stock. As of December 31, 2022, there were approximately 75,260 deferred stock units outstanding, which are included in our restricted stock unit activity below. As of December 31, 2016, we no longer grant deferred stock units.

Employee Stock Purchase Plan

We have an Employee Stock Purchase Plan (“ESPP”) for all eligible employees. Under the plan, shares of our common stock may be purchased over an offering period with a maximum duration of two years at 85% of the lower of the fair market value on the first day of the applicable offering period or on the last day of the six-month purchase period. Employees may purchase shares having a value not exceeding 10% of their eligible compensation during an offering period. During 2022, 2021 and 2020, employees purchased approximately 2 million, 2 million and 3 million shares under this plan at average prices of \$38.04, \$38.93 and \$25.93 per share, respectively. As of December 31, 2022, approximately 31 million shares of common stock were reserved for future issuance.

Stock Option Activity

Stock options granted in 2022 were not material. No stock options were granted in 2021 and 2020.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

During 2022, 2021 and 2020, the aggregate intrinsic value of options exercised under our equity incentive plans was \$2 million, \$2 million and \$15 million, respectively, determined as of the date of option exercise.

Restricted Stock Unit Activity

The following table presents RSU activity (including PBRsUs that have been earned) under our equity incentive plans as of and for the year ended December 31, 2022 (in millions, except per share amounts):

	Units	Weighted Average Grant-Date Fair Value (per share)
Outstanding as of January 1, 2022	20	\$ 48.73
Awarded and assumed	15	\$ 52.22
Vested	(10)	\$ 46.38
Forfeited	(4)	\$ 50.45
Outstanding as of December 31, 2022	21	\$ 52.29
Expected to vest as of December 31, 2022	17	

During 2022, 2021 and 2020, the aggregate intrinsic value of RSUs vested under our equity incentive plans was \$448 million, \$697 million and \$552 million, respectively.

Stock-Based Compensation Expense

The following table presents stock-based compensation expense from continuing operations for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Cost of net revenues	\$ 51	\$ 47	\$ 40
Sales and marketing	73	83	85
Product development	222	196	154
General and administrative	148	151	138
Total stock-based compensation expense	\$ 494	\$ 477	\$ 417
Capitalized in product development	\$ 14	\$ 12	\$ 14

As of December 31, 2022, there was approximately \$813 million of unearned stock-based compensation that will be expensed from 2023 through 2027. If there are any modifications or cancellations of the underlying unvested awards, we may be required to accelerate, increase or cancel all or a portion of the remaining unearned stock-based compensation expense. Future unearned stock-based compensation will increase to the extent we grant additional equity awards, change the mix of grants between stock options and restricted stock units or assume unvested equity awards in connection with acquisitions.

Employee Savings Plans

We have a defined contribution plan, which is qualified under Section 401(k) of the Internal Revenue Code. Participating employees may contribute up to 50% of their eligible compensation, but not more than statutory limits. During the years ended December 31, 2022, 2021 and 2020, we contributed one dollar for each dollar a participant contributed, with a maximum contribution of 4% of each employee's eligible compensation, subject to a maximum employer contribution of \$12,200, \$11,600 and \$11,400 per employee for each period, respectively. Our non-U.S. employees are covered by various other savings plans. Total expense for these plans was \$58 million, \$54 million and \$46 million for the years ended December 31, 2022, 2021 and 2020, respectively.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 16 — Income Taxes

The following table presents the components of income (loss) from continuing operations before taxes for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
United States	\$ 123	\$ 1,608	\$ 1,167
International	(1,724)	(1,210)	2,178
	<u>\$ (1,601)</u>	<u>\$ 398</u>	<u>\$ 3,345</u>

The following table summarizes the income tax provision (benefit) for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Current:			
Federal	\$ 350	\$ 472	\$ 266
State and local	36	128	87
Foreign	67	228	91
	<u>\$ 453</u>	<u>\$ 828</u>	<u>\$ 444</u>
Deferred:			
Federal	\$ (847)	\$ (755)	\$ (73)
State and local	(50)	(125)	(8)
Foreign	117	198	495
	<u>(780)</u>	<u>(682)</u>	<u>414</u>
	<u>\$ (327)</u>	<u>\$ 146</u>	<u>\$ 858</u>

The following table presents a reconciliation of the difference between the actual provision for income taxes and the provision computed by applying the federal statutory rate of 21% to income (loss) before income taxes for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Provision (benefit) at statutory rate	\$ (337)	\$ 84	\$ 703
Foreign income taxed at different rates	7	19	19
Other taxes on foreign operations	13	89	19
Stock-based compensation	17	(26)	(4)
State taxes, net of federal benefit	(14)	3	80
Research and other tax credits	(45)	(39)	(28)
Penalties	11	—	—
Impact of tax rate change	—	(3)	43
Non-deductible executive compensation	4	10	9
Other	17	9	17
	<u>\$ (327)</u>	<u>\$ 146</u>	<u>\$ 858</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Deferred tax assets and liabilities are recognized for the future tax consequences of differences between the carrying amounts of assets and liabilities and their respective tax bases using enacted tax rates in effect for the year in which the differences are expected to be reversed. The following table summarizes significant deferred tax assets and liabilities as of the dates indicated (in millions):

	As of December 31,	
	2022	2021
Deferred tax assets:		
Net operating loss, capital loss and credits	\$ 275	\$ 191
Accruals and allowances	384	356
Capitalized research expense	181	—
Stock-based compensation	10	12
Amortizable tax basis in intangibles	3,064	3,174
Net deferred tax assets	3,914	3,733
Valuation allowance	(231)	(136)
	<u>3,683</u>	<u>3,597</u>
Deferred tax liabilities:		
Outside basis differences	(2,446)	(3,136)
Acquisition-related intangibles	(64)	(37)
Depreciation and amortization	(243)	(202)
Net unrealized gain on investments	(6)	(84)
	<u>(2,759)</u>	<u>(3,459)</u>
	<u>\$ 924</u>	<u>\$ 138</u>

As of December 31, 2022, our federal, state and foreign net operating loss carryforwards for income tax purposes were approximately \$51 million, \$31 million and \$512 million, respectively. The federal and state net operating loss carryforwards are subject to various limitations under Section 382 of the Internal Revenue Code and applicable state tax laws. If not utilized, the federal and state net operating loss carryforwards will begin to expire in 2024 and 2023, respectively. The carryforward periods on our foreign net operating loss carryforwards are as follows: \$7 million do not expire and \$505 million are subject to valuation allowance and begin to expire in 2023. As of December 31, 2022, state tax credit carryforwards for income tax purposes were approximately \$179 million. Most of the state tax credits carry forward indefinitely.

As of December 31, 2022 and 2021, we maintained a valuation allowance with respect to certain of our deferred tax assets relating primarily to operating losses in certain non-U.S. jurisdictions and certain state tax credits and capital losses that we believe are not likely to be realized.

We have recognized the tax consequences of all foreign unremitted earnings and management has no specific plans to indefinitely reinvest the unremitted earnings of our foreign subsidiaries as of the balance sheet date. Accordingly, as of December 31, 2022 and 2021, \$526 million and \$697 million, respectively, of our liability for deemed repatriation of foreign earnings was included in other liabilities on our consolidated balance sheet. We have not provided for deferred taxes on outside basis differences in our investments in our foreign subsidiaries that are unrelated to unremitted earnings. These basis differences will be indefinitely reinvested. A determination of the unrecognized deferred taxes related to these other components of our outside basis difference is not practicable.

In connection with the transfer of our Classifieds business on June 24, 2021 we recorded \$2.1 billion of income tax expense as part of income from discontinued operations, of which \$1.7 billion was a deferred tax liability for the outside basis difference related to our receipt of Adevinta shares. Through the remainder of 2021 and 2022, the deferred tax liability decreased with the change in fair value of the Adevinta investment, which has been recorded in income (loss) from continuing operations following the transaction close date through December 31, 2022.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

The following table presents changes in unrecognized tax benefits for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Gross amounts of unrecognized tax benefits as of the beginning of the period	\$ 461	\$ 420	\$ 387
Increases related to prior period tax positions	4	6	30
Decreases related to prior period tax positions	(7)	(5)	(15)
Increases related to current period tax positions	40	42	39
Settlements	(5)	(2)	(21)
Gross amounts of unrecognized tax benefits as of the end of the period	<u>\$ 493</u>	<u>\$ 461</u>	<u>\$ 420</u>

As of December 31, 2022, gross amounts of unrecognized tax benefits of \$493 million included \$50 million of unrecognized tax benefits indemnified by PayPal. As of December 31, 2021, gross amounts of unrecognized tax benefits of \$461 million included \$50 million of unrecognized tax benefits indemnified by PayPal. If total unrecognized tax benefits were realized in a future period, it would result in a tax benefit of \$331 million. Of this amount, approximately \$46 million of unrecognized tax benefit is indemnified by PayPal and a corresponding receivable would be reduced upon a future realization. As of December 31, 2022, our liabilities for unrecognized tax benefits were included in other liabilities on our consolidated balance sheet.

We recognize interest and/or penalties related to uncertain tax positions in income tax expense. In 2022 and 2021, tax benefits of \$9 million and \$6 million, respectively, were included in tax expense for interest and penalties. The amount of interest and penalties accrued as of December 31, 2022 and 2021 was approximately \$57 million and \$46 million, respectively.

We are subject to both direct and indirect taxation in the U.S. and various states and foreign jurisdictions. We are under examination by certain tax authorities for the 2010 to 2021 tax years. We believe that adequate amounts have been reserved for any adjustments that may ultimately result from these or other examinations. The material jurisdictions where we are subject to potential examination by tax authorities for tax years after 2009 include, among others, the U.S. (Federal and California), Germany, India, Israel, Switzerland and the United Kingdom.

Although the timing of the resolution and/or closure of audits is highly uncertain, it is reasonably possible that the balance of gross unrecognized tax benefits could significantly change in the next 12 months. However, given the number of years remaining subject to examination and the number of matters being examined, we are unable to estimate the full range of possible adjustments to the balance of gross unrecognized tax benefits.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)

Note 17 — Gain (Loss) on Equity Investments and Warrant, Net and Interest and Other, Net

The following table presents components of gain (loss) on equity investments and warrant, net for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Unrealized change in fair value of equity investment in Adevinta	\$ (2,693)	\$ (3,070)	\$ —
Unrealized change in fair value of equity investment in Adyen	(118)	(10)	—
Unrealized change in fair value of equity investment in Gmarket	(294)	(3)	—
Unrealized change in fair value of equity investment in KakaoBank	(218)	403	239
Change in fair value of warrant	(230)	354	770
Realized change in fair value of shares sold in Adevinta ⁽¹⁾	2	9	—
Realized change in fair value of shares sold in Adyen	(143)	—	—
Realized change in fair value of shares sold in KakaoBank	(75)	83	—
Impairment of equity investment in Paytm Mall	—	(160)	—
Gain (loss) on other investments ⁽²⁾	(17)	29	(2)
Total gain (loss) on equity investments and warrant, net	<u>\$ (3,786)</u>	<u>\$ (2,365)</u>	<u>\$ 1,007</u>

- (1) Gain (loss) on sale of shares in Adevinta included: (i) in 2022, a \$2 million gain on the change in fair value of shares sold; (ii) in 2021, an \$88 million gain recognized on the sale of the shares offset by a \$79 million loss on the change in fair value of shares sold.
- (2) Gain (loss) on other investments primarily included: (i) in 2022, primarily downward adjustments of \$13 million recorded on equity investments under the fair value option and \$7 million recorded on equity investments without readily determinable fair values; (i) in 2021, primarily a \$41 million upward adjustment and a \$10 million impairment recorded on equity investments without readily determinable fair values; (ii) in 2020, primarily a \$40 million impairment recorded on an investment and a \$37 million gain for the receipt of proceeds that were held in escrow related to a long-term investment that was sold in 2018.

The following table presents components of interest and other, net for the periods indicated (in millions):

	Year Ended December 31,		
	2022	2021	2020
Interest income	\$ 73	\$ 19	\$ 38
Interest expense	(235)	(269)	(304)
Foreign exchange and other	(3)	90	(32)
Total interest and other, net	<u>\$ (165)</u>	<u>\$ (160)</u>	<u>\$ (298)</u>

	Income taxes	—	—
	Total, net of income taxes	(2)	1
Foreign currency translation	Discontinued operations net of income taxes	—	125
Total reclassifications for the period	Total, net of income taxes	\$ 167	\$ 80

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS—(Continued)**Note 19 — Restructuring**

Restructuring reserve activity during 2022 was immaterial.

During the first quarter of 2021, management approved plans that included the reduction in workforce and other exit costs. The reduction was substantially completed in the first quarter of 2021 and resulted in a pre-tax charge of \$35 million.

During the first quarter of 2020, we substantially completed the reduction in workforce that was approved by management during the fourth quarter of 2019. We incurred pre-tax restructuring charges of approximately \$7 million primarily during the first quarter of 2020 in connection with the action taken in the fourth quarter of 2019 and made payments of approximately \$34 million during 2020.

The restructuring charges incurred in 2022, 2021 and 2020 were included in general and administrative expenses in the consolidated statement of income.

FINANCIAL STATEMENT SCHEDULE

The Financial Statement Schedule II — VALUATION AND QUALIFYING ACCOUNTS for continuing operations as of and for the years ended December 31, 2022, 2021 and 2020.

**DESCRIPTION OF THE REGISTRANT'S SECURITIES REGISTERED PURSUANT
TO SECTION 12 OF THE SECURITIES EXCHANGE ACT OF 1934**

As of December 31, 2022, eBay Inc. had one class of securities registered under Section 12 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), its common stock, \$0.001 par value per share ("common stock").

References in the following discussion to "eBay," "eBay Inc.," "we," "our" and "us" and similar references mean eBay Inc. excluding, unless the context otherwise requires or otherwise expressly stated, its subsidiaries.

DESCRIPTION OF COMMON STOCK

The following is a description of some of the terms of our common stock, our amended and restated certificate of incorporation (the "charter"), our amended and restated bylaws (the "bylaws") and certain provisions of the Delaware General Corporation Law (the "DGCL"). The following description is not complete and is subject to, and qualified in its entirety by reference to, our charter and bylaws, each of which is filed or incorporated by reference as an exhibit to our Annual Report on Form 10-K of which this Exhibit is a part, and the DGCL. You should read our charter and bylaws and the applicable provisions of the DGCL for a complete statement of the provisions described under this caption "Description of Common Stock" and for other provisions that may be important to you.

Common Stock

Under our charter, the total number of shares of all classes of capital stock which we are authorized to issue is 3,590,000,000 shares, consisting of two classes: 3,580,000,000 shares of common stock and 10,000,000 shares of preferred stock, \$0.001 par value per share ("preferred stock").

Each share of our common stock is entitled to one vote per share on all matters submitted to a vote of our common stockholders. Our charter does not entitle the holders of our common stock to cumulative voting rights with respect to the election of our directors. This means that the holders of a majority of the outstanding shares of our common stock can elect all of the directors then standing for election by our common stockholders (assuming there are no outstanding shares of our preferred stock entitled to vote as a single class with our common stock in such election).

Nominees for election as directors at an annual meeting of stockholders shall stand for election to a one-year term expiring at the next annual meeting of stockholders and until their respective successors are duly elected and qualified, subject to earlier death, resignation, retirement or removal. Pursuant to our bylaws and subject to the rights of any series of our preferred stock that may be outstanding, each member of our board of directors shall be elected by the affirmative vote of a majority of the votes cast with respect to such director (excluding abstentions) by the shares represented and entitled to vote at a meeting of stockholders at which a quorum is present; provided, however, that if our board of directors determines that the number of nominees for director exceeds the number of directors to be elected at such meeting (a "Contested Election") and has not rescinded that determination as provided in our bylaws, each of the directors to be elected at such meeting shall be elected by the affirmative vote of a plurality of the votes cast by the shares represented and entitled to vote at such meeting with respect to the election of such director. If an incumbent director fails to receive the affirmative vote of a majority of the votes cast at a meeting for the election of directors (other than a Contested Election), either our Corporate Governance and Nominating Committee or a committee of independent directors shall determine whether to accept or reject any resignation that may have been previously tendered by such incumbent director or whether other action should be taken (including whether to request the incumbent director to resign from the board of directors if no resignation has previously been tendered).

Unless otherwise provided by applicable law, the rules or regulations of any applicable stock exchange, or our charter or bylaws, every matter to be voted on by our stockholders, other than the election of directors, shall be decided by the affirmative vote of the holders of a majority in voting power of the shares of our stock entitled to vote thereon that are present in person or represented by proxy at the applicable meeting.

Our bylaws require us to include in our proxy materials for an annual meeting of stockholders the name of any person nominated for election to our board of directors by a stockholder or group of up to 20 stockholders who own and have owned, or are acting on behalf of up to 20 beneficial owners who own and have owned, in each case continuously for at least three years, at

least 3% (determined as provided in our bylaws) of the aggregate voting power of our outstanding common stock and any other capital stock entitled to vote generally in the election of directors; provided that such stockholders give us written notice of such request within the time period set forth in our bylaws and such stockholders and their nominees satisfy the other requirements specified in our bylaws; and provided, further, that the number of such nominees whose names appear in our proxy materials shall not exceed the greater of (x) two nominees and (y) the largest whole number of nominees that does not exceed 20% of the number of our directors then in office, subject to possible reduction as provided in our bylaws.

Subject to any preferential rights of any outstanding shares of our preferred stock to receive dividends before any dividends may be paid on our common stock, the holders of our common stock will be entitled to share ratably in any dividends payable on our common stock that may be declared by our board of directors out of funds legally available for the payment of dividends.

Upon our voluntary or involuntary liquidation, dissolution or winding-up, the holders of our common stock will be entitled to share ratably in any of our assets remaining for distribution to our common stockholders after payment of or provision for our debts and other liabilities and subject to any preferential rights of any outstanding shares of our preferred stock to receive distributions in the event of our liquidation, dissolution or winding-up before distributions are made to holders of our common stock.

Our common stock is not entitled to preemptive rights.

Under our charter, our board of directors is authorized, without vote or other action by our stockholders, to cause the issuance of up to 10,000,000 shares of our preferred stock in one or more series from time to time, to establish the number of shares to be included in each such series and to fix the designation, powers, preferences and rights of the shares of each such series (which may include, without limitation, voting rights, dividend rights and preferences, liquidation rights and preferences, redemption provisions and rights to convert the preferred stock of such series into other securities or property) and any qualifications, limitations or restrictions thereof, and to increase or decrease the number of shares of any such series (but not below the number of shares of such series then outstanding). Our board of directors may authorize the issuance of preferred stock with voting, dividend, liquidation, conversion or other rights (which may include, without limitation, rights of one or more series of preferred stock, voting as a separate class, to elect one or more directors, rights of one or more series of preferred stock to vote with our common stock in the election of directors, and rights to receive dividends and to receive distributions in the event of our liquidation, dissolution or winding-up before any dividends or distributions may be paid to holders of our common stock) that could dilute or otherwise adversely affect the voting power or the dividend, liquidation or other rights of the holders of the common stock. The issuance of preferred stock, while providing flexibility in connection with possible acquisitions, financings and other corporate purposes, could, among other things, have the effect of delaying, deterring or preventing a merger, change of control or other takeover of our company that our stockholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market price of our common stock, and may also adversely affect the market price of our common stock and any other securities that we may issue and the voting, dividend, liquidation and other rights of the holders of our common stock.

Anti-Takeover Provisions of Delaware Law

We are subject to Section 203 of the DGCL ("Section 203"). In general, Section 203 prohibits a publicly held Delaware corporation from engaging in "business combination" transactions with any "interested stockholder" for a period of three years following the time that the stockholder became an interested stockholder, unless:

- prior to the time the stockholder became an interested stockholder, the corporation's board of directors approved either the applicable business combination or the transaction which resulted in the stockholder becoming an interested stockholder;
- upon consummation of the transaction which resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the voting stock outstanding (but not the voting stock owned by the interested stockholder) shares owned by directors who are also officers of the corporation and shares owned by employee stock plans in which the employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or

- at or subsequent to the time that the stockholder became an interested stockholder, the business combination is approved by the corporation's board of directors and authorized at an annual or special meeting of stockholders by the affirmative vote of at least 66-2/3% of the outstanding voting stock which is not owned by the interested stockholder.

A "business combination" is defined to include, among other things and in general and subject to exceptions, a merger of the corporation with the interested stockholder; a sale of 10% or more of the market value of the corporation's consolidated assets to the interested stockholder; certain transactions that result in the issuance of the corporation's stock to the interested stockholder; a transaction that has the effect of increasing the proportionate share of the corporation's stock owned by the interested stockholder; and any receipt by the interested stockholder of loans, guarantees or other financial benefits provided by the corporation. An "interested stockholder" is defined to include, in general and subject to exceptions, a person that (1) owns 15% or more of the outstanding voting stock of the corporation or (2) is an "affiliate" or "associate" (as defined in Section 203) of the corporation and was the owner of 15% or more of the corporation's outstanding voting stock at any time within the prior three year period.

A Delaware corporation may opt out of Section 203 with an express provision in its original certificate of incorporation or by an amendment to its certificate of incorporation or bylaws expressly electing not to be governed by Section 203 and approved by a majority of its outstanding voting shares. We have not opted out of Section 203. As a result, Section 203 could delay, deter or prevent a merger, change of control or other takeover of our company that our stockholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market price of our common stock, and may also adversely affect the market price of our common stock and any other securities that we may issue.

Anti-Takeover Provisions of Our Charter and Bylaws

Certain provisions of our charter and bylaws could have the effect of delaying, deterring or preventing another party from acquiring or seeking to acquire control of us. For example, our charter and bylaws include anti-takeover provisions that:

- authorize our board of directors, without vote or other action by our stockholders, to cause the issuance of preferred stock in one or more series from time to time and, with respect to each series, to establish the number of shares constituting that series and to fix the rights and other terms of that series, which may include, without limitation, voting rights, dividend rights and preferences, liquidation rights and preferences and rights to convert the preferred stock of such series into other securities or property;
- provide that, subject to the rights of any series of our preferred stock that may be outstanding, vacancies on our board of directors or newly created directorships resulting from an increase in the number of our directors may be filled only by a majority of directors then in office, even though less than a quorum, or by the sole remaining director;
- provide that the number of directors constituting our board of directors shall be fixed from time to time by resolution adopted by our board of directors;
- require that actions to be taken by our stockholders must be taken at an annual or special meeting of our stockholders and not by written consent;
- establish advance notice procedures and other requirements for stockholders to submit nominations of candidates for election to our board of directors and other proposals to be brought before a stockholders meeting;
- provide that, subject to the rights of any series of preferred stock that may be outstanding and except as may be required by law, special meetings of stockholders may be called only by (1) our board of directors; (2) our Chairman of the Board; (3) our Chief Executive Officer; or (4) our Secretary upon the written request of one or more of our stockholders that have continuously held, for their own account or on behalf of others, at least a 20% aggregate "net long position" (as defined and determined as provided in our bylaws) of our outstanding common stock for at least 30 days as of the date such request is delivered to us and that have complied with the other requirements set forth in our bylaws; and
- do not give the holders of our common stock cumulative voting rights with respect to the election of directors, which means that the holders of a majority of our outstanding shares of common stock can elect all directors standing for election by our common stockholders.

The provisions described above are intended to discourage certain types of coercive takeover practices and inadequate takeover bids and to encourage anyone seeking to acquire control of us to negotiate first with our board of directors. However, these provisions may also delay, deter or prevent a merger, change of control or other takeover of our company that our

stockholders might consider to be in their best interests, including transactions that might result in a premium being paid over the market price of our common stock, and may also adversely affect the market price of our common stock and any other securities that we may issue. These provisions may also have the effect of preventing changes in our management.

Limitation on Liability of Directors; Indemnification of Directors and Officers

Our charter provides that, to the fullest extent permitted by law, none of our directors shall be personally liable for monetary damages for breach of fiduciary duty as a director. Our bylaws provide that we will indemnify our officers and directors to the fullest extent permitted by the DGCL. We believe that these limitations of liability and indemnification provisions are useful to attract and retain qualified directors and officers.

Nasdaq Global Select Market Listing

Our common stock is listed on The Nasdaq Global Select Market under the symbol "EBAY".

**CERTIFICATION OF CHIEF EXECUTIVE OFFICER,
AS REQUIRED BY SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002.**

I, Jamie Iannone, certify that:

1. I have reviewed this Annual Report on Form 10-K of eBay Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
